

delmatic

the lighting management company

leaders in advanced lighting control solutions and smart building technologies

Our open networked, wired, wireless and IOT lighting management solutions are at the forefront of innovation. Our expert application of the most advanced DALI-2, Lon, BACnet, IP and MQTT technologies delivers unparalleled insights and shares real-time intelligence with other connected IOT systems to optimise energy efficiency and sustainability, simplify installation and reduce costs.

the widest range of DALI-2 certified products

smart modules, smart ready

Our IP DALI-2 Buswire Modules are class leading Ethernet to the Edge DALI routers, combining DALI-2 functionality with granular BACnet/IP and MQTT integration.

IP DALI-2 Buswire Module

DALI-2 Buswire Module

innovative sensors for every application

Our range of smart sensors includes the smallest multisensors on the market, granular real-time space-utilisation sensors, and multi-discipline microsensors with environmental temperature and humidity measurement.

DALI-2 Micro Multisensor

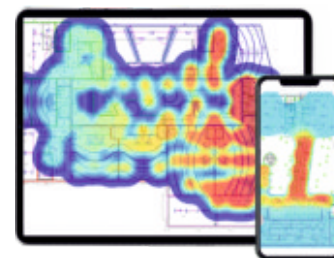

DALI-2 SpaceApp Microsensor

DALI-2 Multi-discipline Microsensor

monitor, manage, configure

Lightscape graphical software provides real-time intel and data sharing via MQTT, while smart touchpanels and touchpads deliver powerful local control of lighting and other integrated services.
