Delta Floraxx

By Delta Membrane Systems Ltd

Detailed description

Delta®-Floraxx is used on inverted roofs to drain water away from insulation panels under accessible surfaces. Thanks to its breathable perforation and its dimples, water and air may circulate freely on the underside so that no coherent film of water can form on the insulation. Can be used in extensively planted as well as in accessible inverted roofs covered with paving stones or slabs.

Benefits:

- Offers high drainage capacity for green roofs.
- Breathable and water-permeable due to the perforation between the storage dimples – ideal for inverted roofs.
- Capable of storing 7 L/m² of water as a reserve for periods of drought.
- Features the unusual compressive strength of 200 kN/m² thanks to its innovative octagonal dimples.
- Can be laid easily and cost-efficiently at a rate of 40m² per roll.
- Forms an excellent foundation for green roofs together with DELTA®-BIOTOPVLIES.
- Safe for drinking water and rot proof in soil.
- CE-conformable as per BS EN 13252.

Product specification

Manufacturer

- Name:	Delta Membrane Systems Ltd
- Web:	www.deltamembranes.com
- Email:	info@deltamembranes.com
- Tel:	+44 (0)1992 523523
- Fax:	+44 (0)1992 523250
- Address:	Delta House,Merlin Way,North Weald,Epping,Essex CM16 6HR
