

Delta Membrane Systems Ltd

n55Plus

Delta®-FM

By Delta Membrane Systems Ltd

Detailed description

A high density polyethylene (HDPE) studded membrane specifically designed for floor and wall applications, to combat dampness and contamination.

Features:

- The special low stud profile (3 mm) minimizes changes in floor levels but still provides an air gap to achieve damp pressure equalization.
- It can also be used in conjunction with thermal and sound insulation and many types of underfloor heating systems.
- The membrane provides excellent chemical resistance, is completely rot proof, prevents root penetration, and is approved for drinking water applications.

Product guidance - As Standard

Membrane:

0.6 mm.

Stud height:

3 mm.

Roll width:

2000 mm.

Compressive strength (approximately):

140 kN/m².

Options

Delta tape:

28 mm wide x 2 mm thick black butyl rubber tape for sealing joints in membrane.

Product specification
