

Dolphin Blue Infrared Taps

The majority of Dolphin Infrared Taps are now equipped by default with Neoperl Cascade PCA aerator which incorporates a 3.8 litre per minute flow regulator.

Pressure Range for Dolphin Blue Taps – 0.5 - 8.0 bar (7-116 PSI).

For areas where the pressure is greater than 8 bar, use a pressure reducing valve.

Other flow rate regulators are available on request. Please call the Dolphin Blue Technical Helpline on 01424 202224 for assistance.
