

REFLECTIT™

A shiny reflective look can add sophistication to any façade. Metal is a great complement to other finishes, and until now there have been limited and expensive options for achieving this appearance. Dryvit's Reflectit coating, used as the finish for any of our external wall insulation systems results in a lightweight, energy efficient and cost effective, engineered cladding.

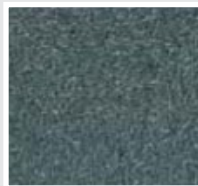

An array of textures, including smooth is available and there is a wide range of colours to select from.

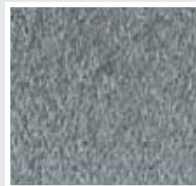

254 Sierra Rose
