*"We would certainly consider using Easigrass™ Sport again and feel confident that it would be appropriate and beneficial to many sports."*

**Matt Johnson, Nike Events Marketing Manager**

## introduction

Easigrass™ Sport is the UK's number one installer of artificial grass sports and leisure facilities.

Family owned, Easigrass™ Sport, under the guidance of Jonathan Gallagher, has more than 25 years experience installing the world's best artificial grass products at clubs, schools, universities and for private use.

Easigrass™ Sport has evolved into three distinct businesses:

- The installation of sports pitches and courts
- The maintenance of sports pitches and courts
- The supply and installation of leisure and landscape surfaces

With over 1 million square metres of artificial grass installed, Easigrass™ Sport is recognised by governing bodies, pitch contractors and end users as the benchmark for quality work.

## mission

To raise the standards of sports and leisure surfaces through advanced and focussed installation methods, with particular emphasis on the resurface and regeneration markets.

**Quality**

**Precision**

**Performance**

**Professional**

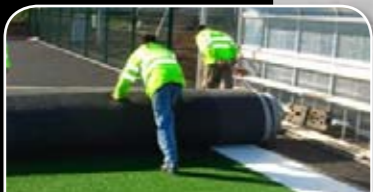

## process

Since the introduction of artificial grass in the mid 70's, over 2,500 full size sports pitches, a similar number of tennis courts and countless other installations have been built throughout the UK. As the quality of artificial grass improves and usage increases, so too does the requirement for faultless installation.

Since 1990 Easigrass™ Sport has been at the forefront of innovative and proven installation techniques, with clients ranging from Premiership football clubs, sports governing bodies and commercial organisations, all benefiting from the "hands on" approach offered by Easigrass™ Sport.

## we can

- Install onto new engineered (asphalt) or dynamic (unbound stone) bases
- Uplift old artificial grass and install onto current bases
- Offer high quality insitu rubber shockpads onto engineered or dynamic bases
- Supply a full range of leading artificial grass brands
- Offer full installation of every type of artificial grass
- Complete the offer with "in-house" maintenance
- Offer full warranties on the installation

**Rolling**

**Gluing**

**Infilling**

**Top Dressing**

*"The west way would like to thank Jonathan and the Easigrass™ Sport team for simply delivered exactly what they said, all work was amazingly completed 2 weeks ahead of schedule."*

**James Cronin, Westway Sports Centre  
Football Development Manager**

**The Team**

## resurfacing

With over 2,500 pitches and the same number of tennis courts the resurface market offers different challenges to new build facilities. Through years of experience Easigrass™ Sport understands this market better than any other business.

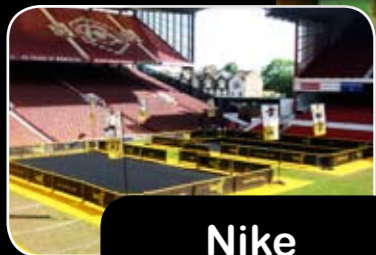

Easigrass™ Sport can work directly with the pitch or court owner. The old surface has the infill extracted before being uplifted and sent for recycling into a secondary product. From here the existing base is checked and remedial work carried out if necessary.

The chosen system is now installed, either including an insitu or pre-formed shock pad beneath the artificial surface.

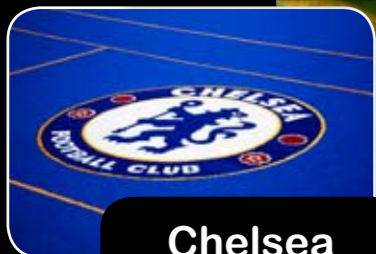

The base is now checked for levels, compaction and drainage before the chosen sports system is installed.

Adidas

Nike

Chelsea

American Express

*"A quick note to say how we appreciate the way your teams worked, both at Stamford Bridge and also the Academy training pitches at Cobham. They proved to be punctual, reliable and professional in their approach to the projects and a credit to Easigrass™ Sport"*

**Jason Griffin,  
Chelsea FC**

## events

Easigrass™ Sport is uniquely placed to offer businesses and special events an installation service for "one off" events. These include supplying and laying green and coloured synthetic turf to enhance and offer a different feel and look for an impactful appearance.

Corporations such as Nike, Adidas and American Express employ marketing departments or specialist companies to promote the brand or product offer. The creative side of Easigrass™ can work with companies as well as generate ideas and concepts that show a company off in a different way.

Some installations are permanent and are sports focussed, where as others are for a short period of time and Easigrass™ Sport will also lift and restore the area to its former state and If you have an idea, a "wacky" concept, let Easigrass™ Sport help bring it to fruition.

**Installation**

*"Once again your guys were on the ball in every aspect of their performance at the Rocks Lane project. Thank you-Easigrass™ Sport."*

**Chris Warren, Rocks Lane**

**Finished Product**

## regeneration

Surprisingly in a country which is sports mad there are many sports areas, particularly in local parks, where facilities are allowed to fall into disrepair and non use. Easigrass™ Sport can restore such areas by fixing problems such as dilapidated fencing and by installing synthetic turf bring a new use to the facility.

Choose which sports you would want on the area and Easigrass™ Sport can offer a free costing and design to convert back into full use.

## recent projects

### **Battersea Park**

"Easigrass™ Sport produced a very competitive tender and offered up the HF30. It promised to perform for Hockey and High use Football. All our existing clients are delighted and we would welcome any one to view our new Installation."

### **DC Leisure**

"We visited the CFC training ground to view the VT40 which Easigrass™ Sport installed and immediately placed our order... 7 week later the project was completed 1 week ahead of schedule and all our members are delighted with the surface."

## recent projects

### Henley

"Easigrass™ Sport completed all the works on time and within Budget. It was difficult to choose what product but in the end we opted for the HF18. The Easigrass™ Sport team where a credit to their Industry and we would certainly recommend them."

### Featherstone Sports Centre

"We had an old 18mm sand dress carpet and we were looking to upgrade to a product that would satisfy our hockey members and also give us durability and performance for Football. Easigrass™ Sport presented us with their new HF30 which ticked all our box's and having seen the quality of their Installation work we confidently placed our order. The project ran very smoothly and they completed all the works on time. First class service."

## recent projects

### CFC Academy

"The quality of the surface and the installation is excellent and the senior players have trained on it with nothing but compliments for its performance and comparison with top quality natural turf."

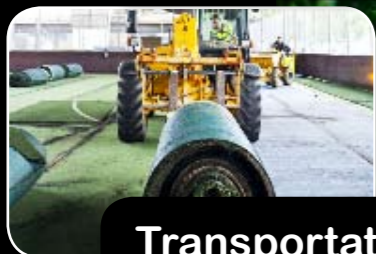

"Our experience with Easigrass™ Sport has been incredibly positive and we have no hesitation in recommending Rhino-Turf 40 to other football clubs looking for that extra special surface."

**Recyclable**

**Procedure**

**Transportation**

**Recycled**

## environment

Ongoing research shows that installing a synthetic turf sports or leisure area has a more positive impact on the environment than using natural turf. In some parts of the world, local authorities actually subsidise synthetic turf replacement of natural grass.

But, considering the environment goes further than just looking at the turf, we at Easigrass™ Sport have developed economic and environmentally friendly ways to uplift and dispose of old turf and infill materials. We focus first on reuse, then recycling and ensure that every square metre and every gram of infill is correctly accounted for.

With new materials we source from companies who use materials free from heavy metals, carcinogenic and other contaminants meaning Easigrass™ Sport is a "Green" company in more ways than one.
