

Floorfixx

- Fast levelling system
- Immediately ready to finish your floor
- Simple to install as a floating system
- Reduces noise (10 dB ΔL_{in} /23 dB ΔL_w)

Floorfixx comfort 10 mm

Floorfixx comfort is a system floor that, with the help of the sandwich system and interactive adhesive, quickly and easily creates a new, insulating and even underlay that can bear load immediately. It is suitable for heavy commercial use and in combination with underfloor heating.

- Renovation of poor basic floors for linoleum, cushion vinyl, PVC strips, carpet, carpet tiles and engineered wood with a minimum thickness of 2 mm
- No waiting or drying time and it can bear load immediately
- Levels out unevenness and provides maximum stability
- Insulates against impact noise and meets the 10 dB standard set by the Owners' Association
- Developed for use in projects where higher quality standards are required due to heavy traffic
- Due to the low thermal resistance, suitable in combination with underfloor heating and cooling
- For the use of engineered wood. This type of engineered wood is glued to Floorfixx comfort with adhesive without any problems

Floorfixx fini 8 mm

Floorfixx fini is a system floor that helps correct minor underlay irregularities. The self-adhesive lap joint will help you to quickly and easily create a new, insulating and even underlay that can bear load immediately. Floorfixx fini is ideal for household and light commercial applications.

- Renovation of poor basic floors for carpet tiles, vinyl flooring, and PVC click flooring
- No waiting or drying time and it can bear load immediately
- Self-adhesive lap joint
- Levels out unevenness
- Maximum stability
- Extends the service life of carpet tiles, vinyl flooring, and PVC click flooring
- Insulates against impact noise and meets the 10 dB standard set by the Owners' Association

Floorfixx regular 9 mm

Floorfixx regular is a system floor that, with the help of the sandwich system and interactive adhesive, quickly and easily creates a new, insulating and even underlay that can bear load immediately. Floorfixx is suitable for household and commercial applications.

- Renovation of poor basic floors for linoleum, cushion vinyl, PVC strips, carpet and carpet tiles with a minimum thickness of 2 mm
- No waiting or drying time and it can bear load immediately
- Dry and dust-free levelling
- Easy to install
- Levels out unevenness and provides maximum stability
- Guarantees a 100% smooth base for easy installation
- Insulates against impact noise and meets the 10 dB standard set by the Owners' Association

Floorfixx smart 8 mm

Floorfixx smart is a system floor that, with the help of the handy lap joint, easily creates a new, insulating and even underlay that can bear load immediately. Floorfixx smart is suitable for residential, industrial and commercial applications.

- Renovation of poor basic floors for PVC, carpet and carpet tiles with a minimum thickness of 2.5 mm
- No waiting or drying time and it can bear load immediately
- Levels out unevenness and provides maximum stability
- Guarantees a smooth, flat base for your installation
- Insulates against impact noise and meets the 10 dB standard set by the Owners' Association

Also use the Floorfixx smart side strips!

Floorfixx

Do you recognise that your customers have little time for installing a new floor? Estillon has the solution! Instead of wet levelling, you can save time with the Floorfixx underlay. We would like to tell you more about the Floorfixx dry levelling system and its advantages.

The dry levelling system: Floorfixx

Floorfixx is the underlay for linoleum, cushion vinyl, PVC, click PVC, carpet, carpet tiles and engineered wood. These underlays allow you to create a new, insulating and flat underlay in a dry and easy manner. Furthermore, these underlays can bear load immediately, there is no need to wait until it is dry. This is a major advantage compared to wet levelling.

Time-saving, simple and clean. And no long drying or waiting times.

With the aid of the sandwich system and interactive adhesive, the Floorfixx underlays quickly and easily create a new, insulating and even underlay that can bear load immediately. These underlays are suitable for residential and project applications. On top of that, the Floorfixx underlays insulate against impact noise. These underlays also meet the 10 dB standard set by the Owners' Associations.
