Natural & mechanical

Perforated
Huge choice of options

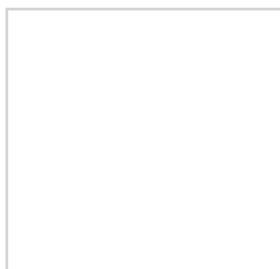

5 Bar
Patterned plate

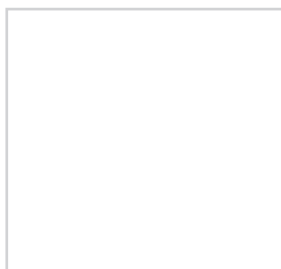

Embossed
Texture adds character

Add another visual dimension to your facade with our wide range of natural and mechanical finishes.

Natural and mechanical provides you with the option of accentuating the colour or finish on your facade. Our finishes offer contemporary and flexible design options that generate a fusion of texture across the building envelope.

Brushed
Grain polished satin look

Polished
Bright polish finish

Corten Steel
Chemically altered finish

Along with our standard range we offer a full range of RAL, Syntha Pulvin and British Standard colours.

If you require any further information, please call our architectural customer services on: 01482 320336, or email us at info@eltherington.co.uk.

All colours and finishes are as a guide only.

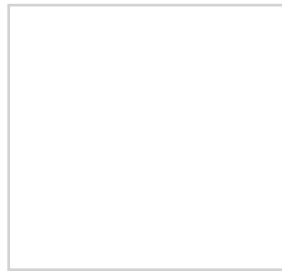

Material

All our material choices provide you with a high performance facade solution.

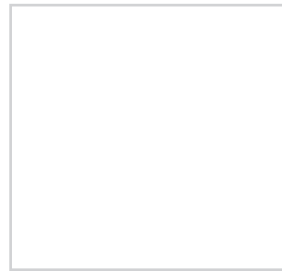

The range offers the best of both worlds: lightweight and strong with the aesthetic appeal of materials made from nature.

Choosing your material is your first step in specifying a facade that will bring your design to life. Once you have chosen the material, we are able to offer you an unprecedented selection of colours and finishes.

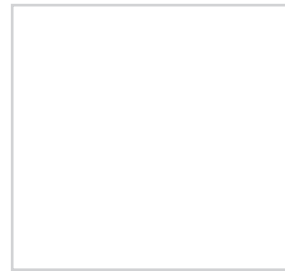

All our materials are from environmentally responsible sources. Eltherington recycles material from the production process wherever possible. All of the materials shown here are recyclable.

Aluminium
Natural mill finish

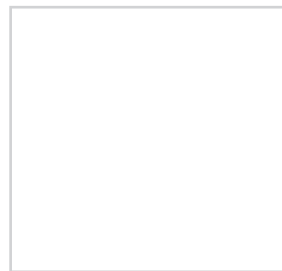

Stainless Steel
304 and 316 grades

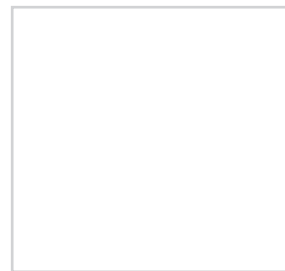

Rimex
Aluminium or steel finishes

Zinc
Zinc metal finish

Copper
Plain and pattered

Brass

RAL 1036
SW241F

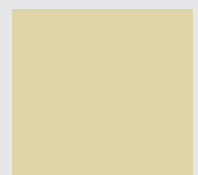

RAL 5025
SW247F

RAL 9006
SW206G

Naturals

RAL 1013

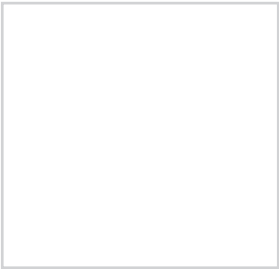

R

Polyester powder coated

Available on most of our materials, although predominantly used on steel and aluminium, Polyester Powder Coated (PPC) creates a visually engaging finish.

Tough, durable and with excellent hardness and abrasion / impact resistance, it is particularly effective on buildings in harsh environments.

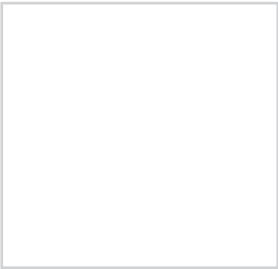

PPC offers excellent weatherability along with chip and corrosion resistance. It also provides excellent edge coverage.

Anodised

Eltherington anodised finishes have been an enduring choice for building specifiers over the years. Timeless in its appeal, the effect is highly suited for creating real architectural impact.

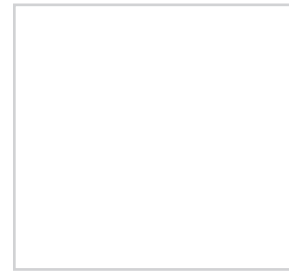

Anodising accentuates the natural qualities of aluminium to create a strong, contemporary finish with excellent corrosion and abrasion resistance.
