

Epwin Window Systems

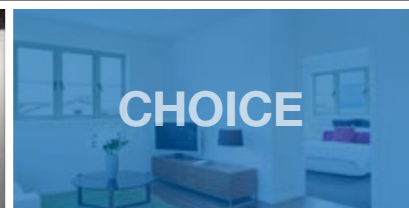

GROWTH

Because you need **MORE**
from your systems partner

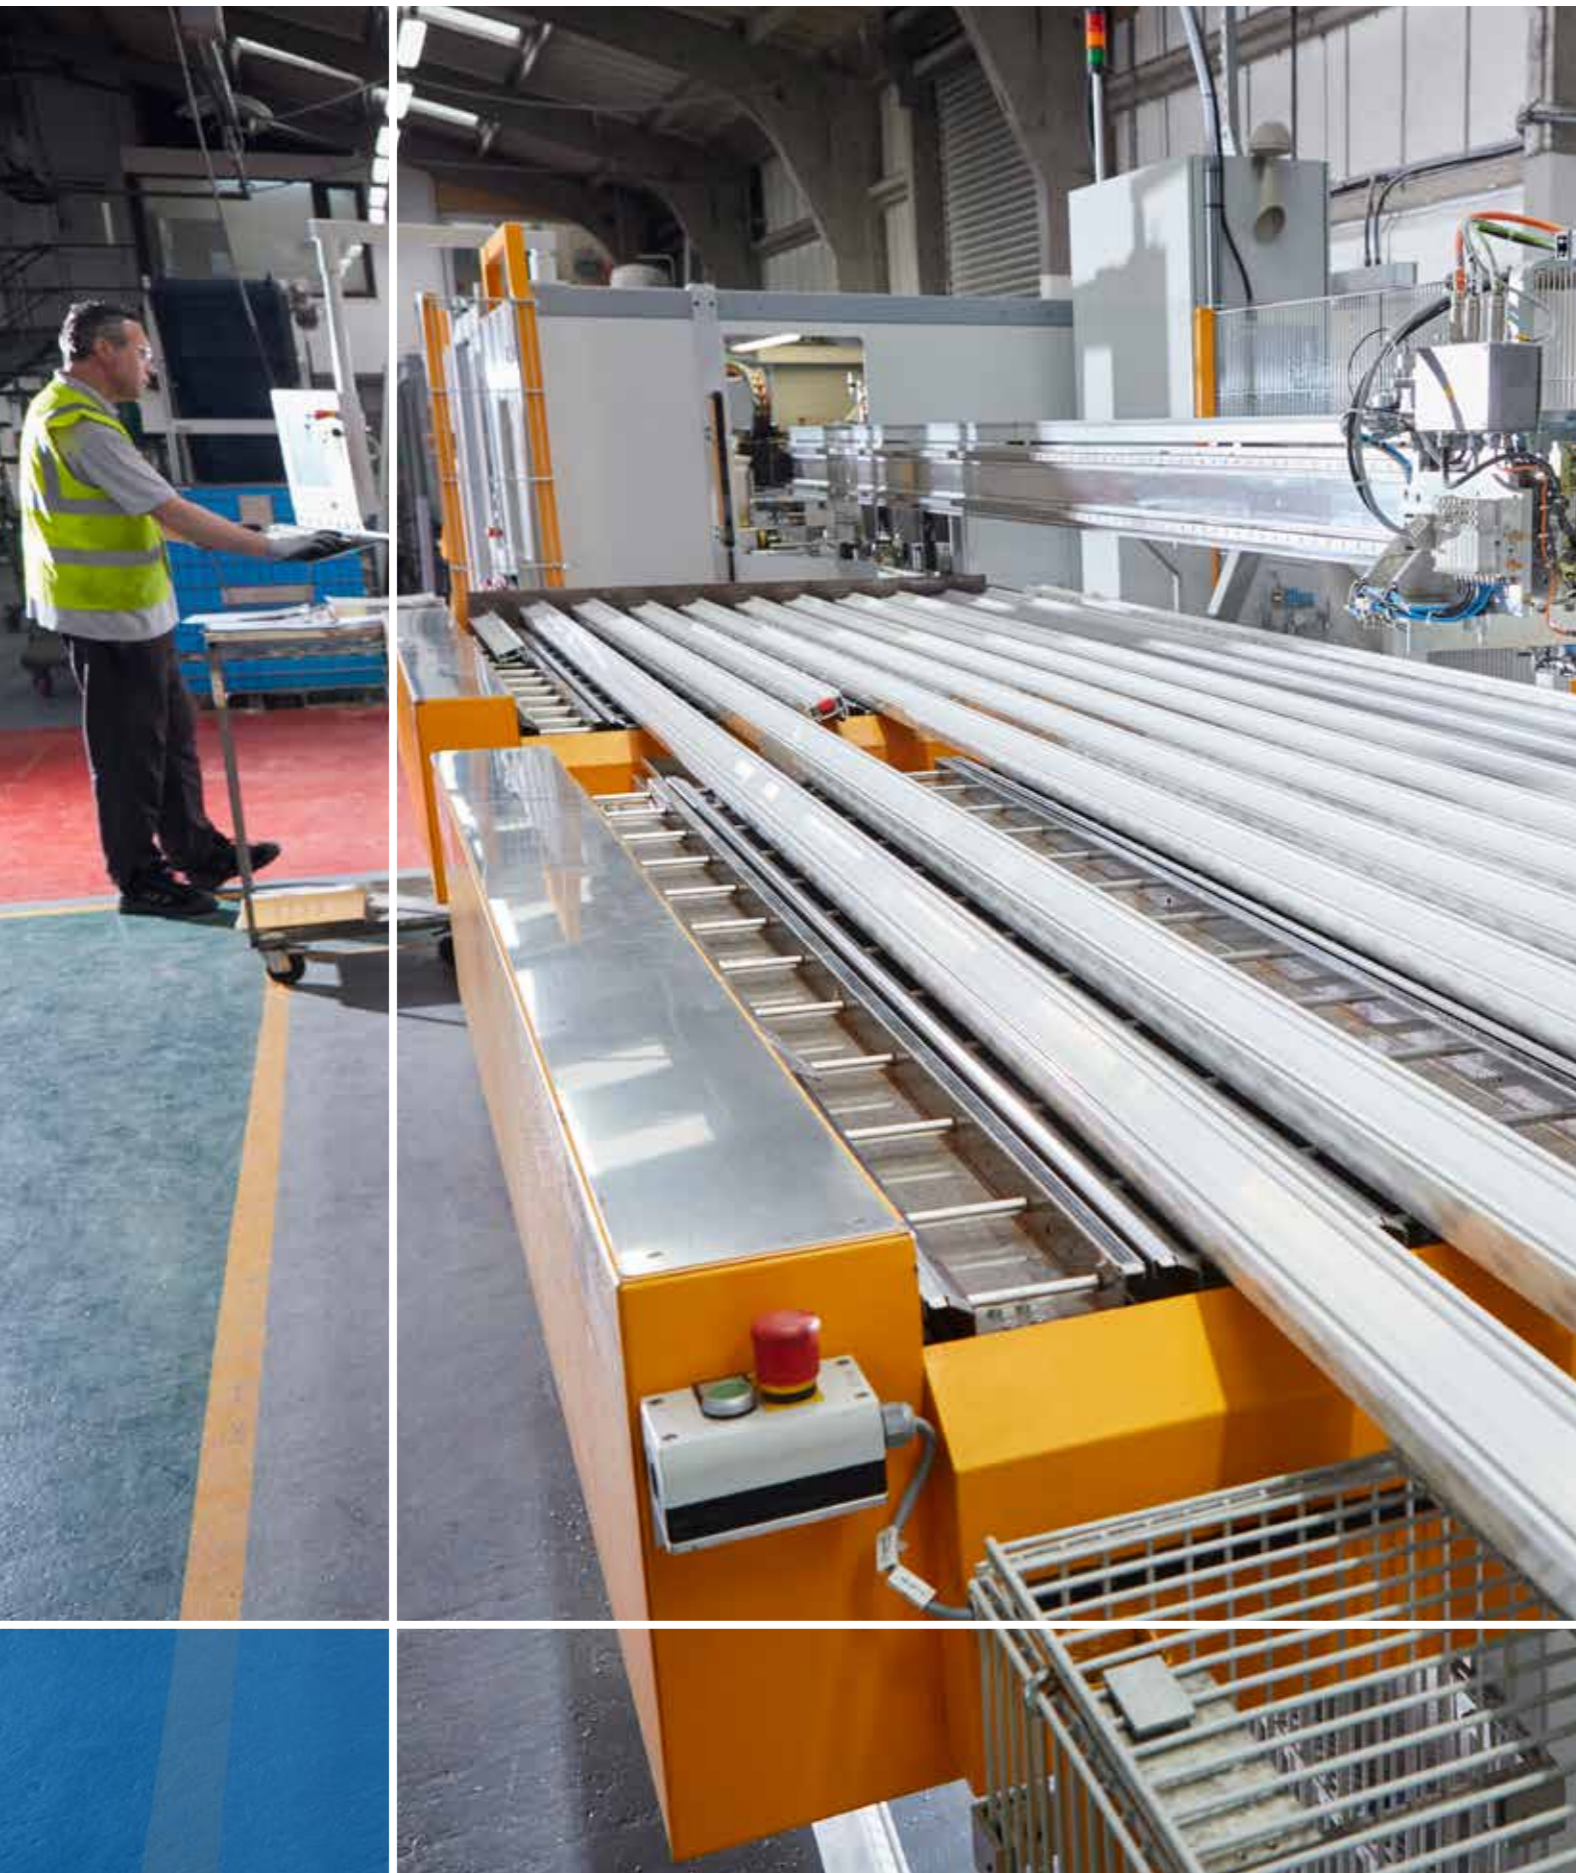

CHOICE

INNOVATION

You get **MORE** with **Epwin Window Systems**

As the UK's largest manufacturer and supplier of PVC-U window and door systems and a company that has been in business for over 40 years, Epwin Window Systems has a size and scale you can rely on.

In **Profile 22, Spectus, Swish, PatioMaster** and now in **Stellar**, you have some of the best-known product brands in the sector and the ability to fabricate a complete range of products that give you unbeatable choice and versatility.

The depth and strength of our product portfolio delivers award-winning innovation that opens up opportunities for your business.

Alongside our impressive product ranges, you also benefit from the strength of our business support. From specification and technical input to proactive marketing expertise, we are by your side every step of the way.

So, if you are looking for a systems partner for growth, there is only one answer. **Epwin Window Systems.**

Stable and Strong

Epwin Window Systems has been at the forefront of the industry for over 40 years thanks to a remarkable level of stability. It has allowed us to lead the way in product innovation and continuously invest for the future of our own business and that of our customers' businesses too.

2019 will witness the expansion of our extrusion capacity by more than 40%, increasing our foiling capacity by a further 30% and investment in a brand new 300,000 sq ft state-of-the-art warehouse and distribution centre in Telford. This wide programme of investment allows us to continue to deliver exceptional products and service to the UK market.

Three renowned systems brands **that give you MORE**

In Profile 22, Spectus and Swish you have the best-known window and door brands in the sector. Each brand has its own distinctive system, so whatever your market sector, there's an Epwin Window Systems solution for you.

Three distinctive systems for diversity and opportunity

Optima from Profile 22 is an award-winning system that has established itself as the commercial system of choice.

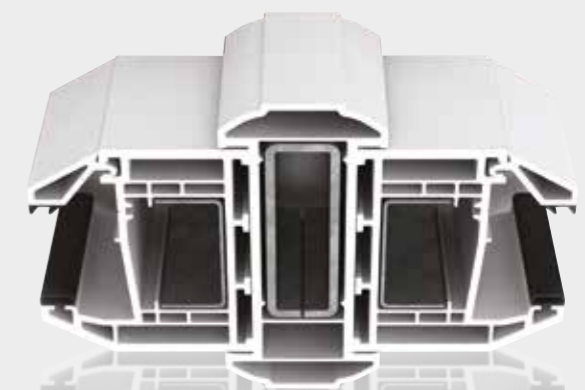

Spectus is a market-leading system that is widely recognised as having the most complete product range in the market.

Swish 24/7 from Swish Windows and Doors is a retail-focused system that is recognised and trusted by 7 out of 10 homeowners and delivers everything they expect.

One universal set of ancillaries for simplified stockholding

Profile 22, Spectus and Swish 24/7 are all very different systems. But they all share the same range of over 80 universal ancillaries, making dual sourcing easier to manage.

Five 70mm window and door systems to **give you MORE possibilities**

Epwin Window Systems has five 70mm window and door systems, each with a distinctive look and market appeal.

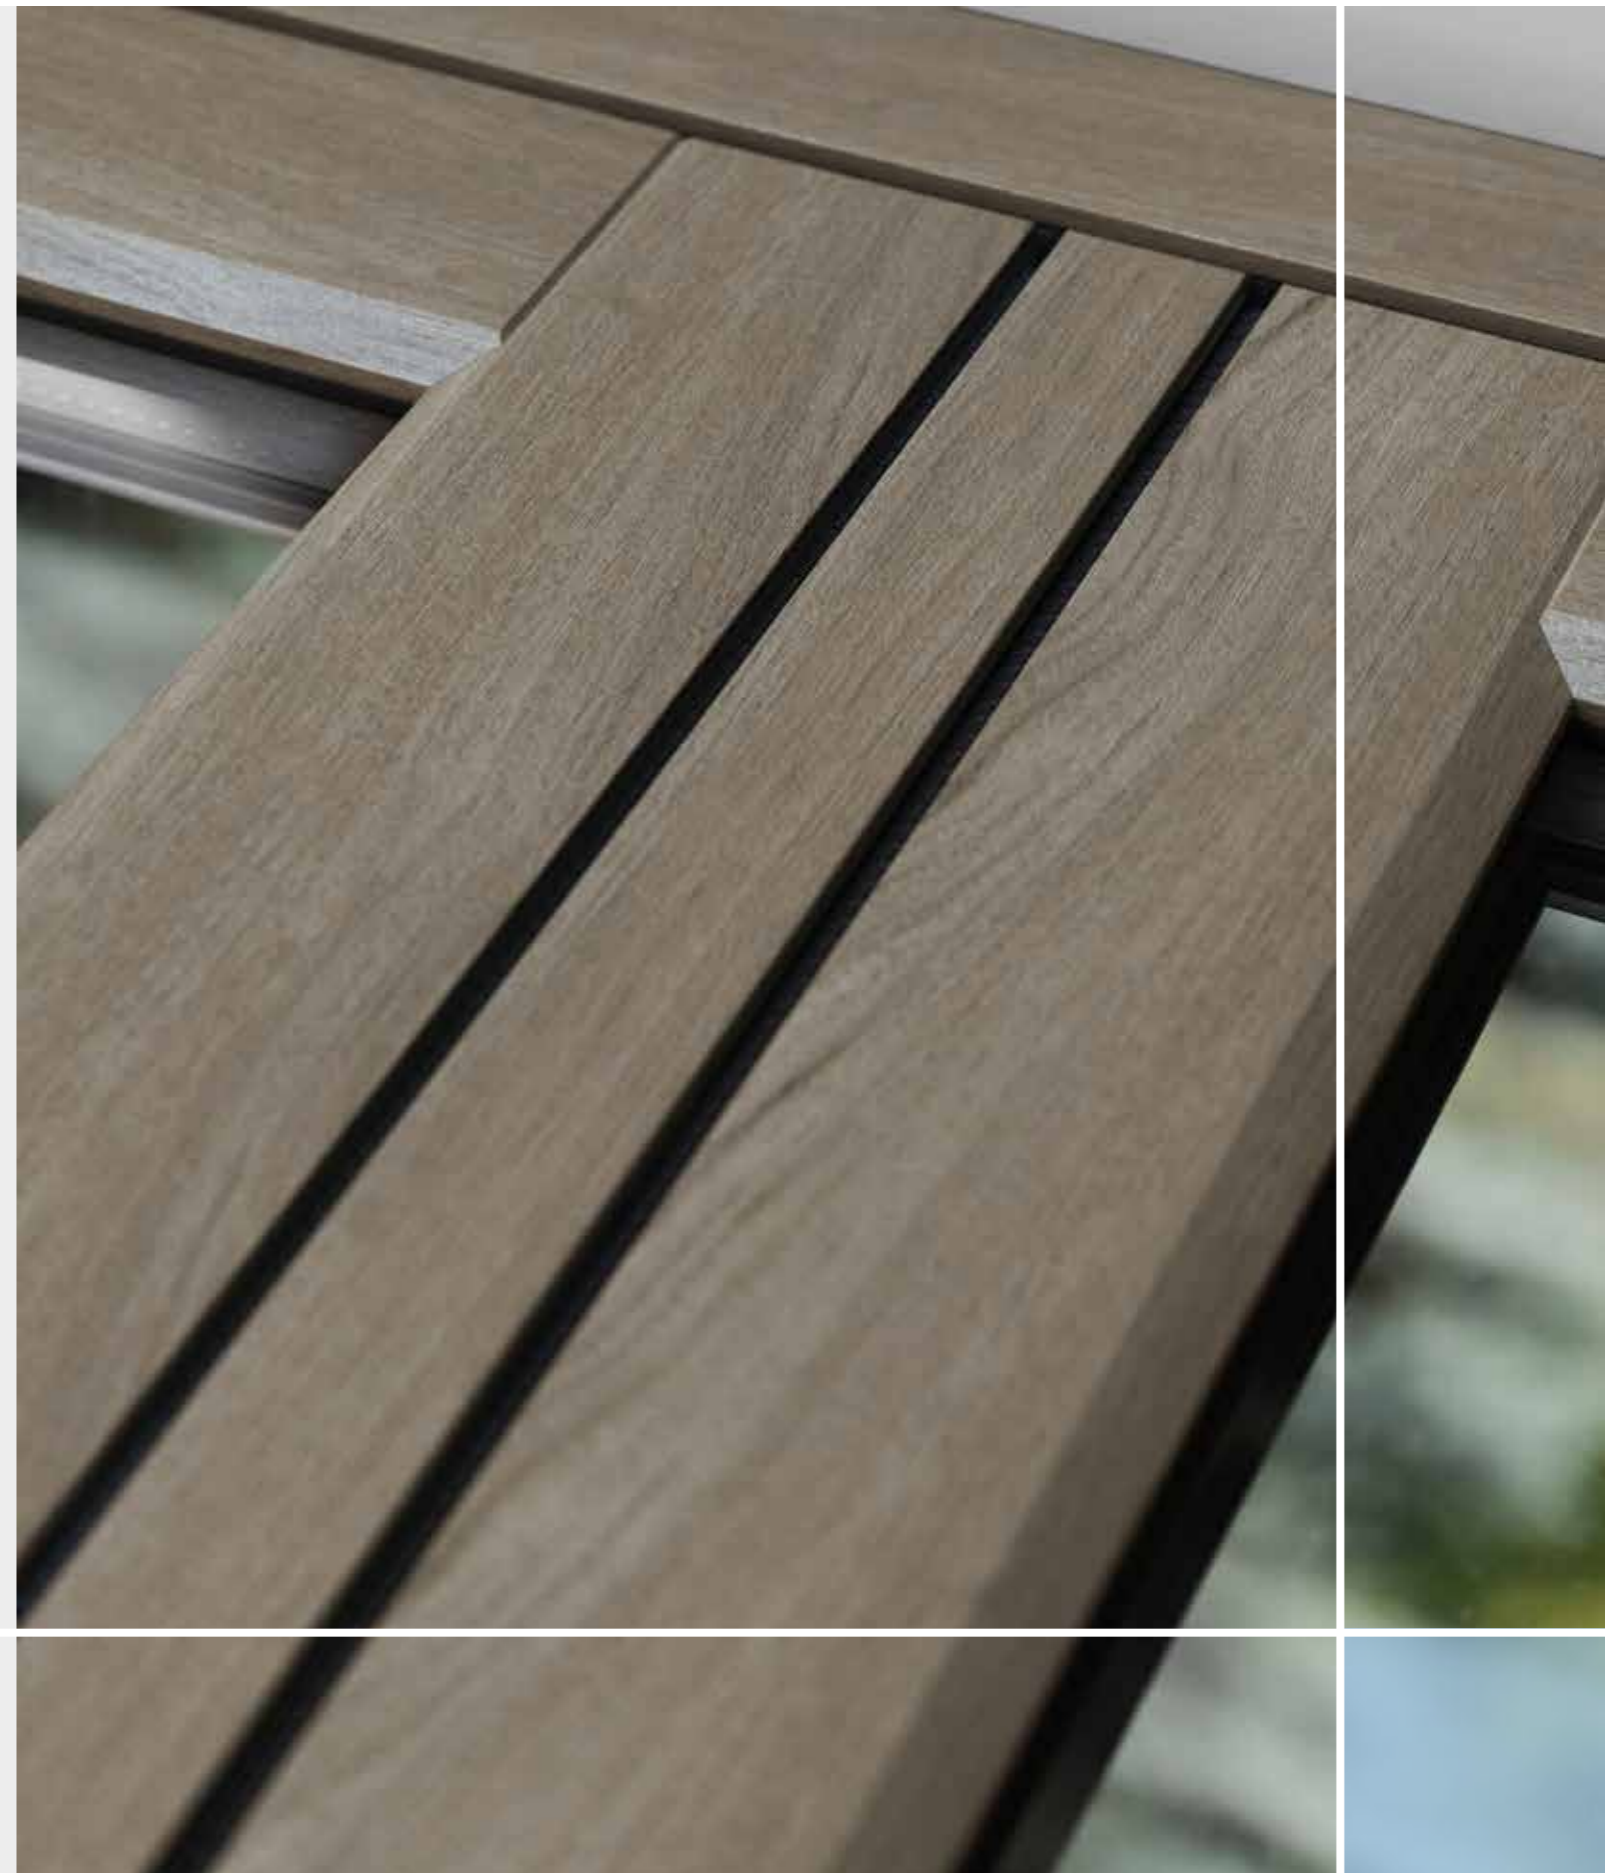

The award-winning Optima system from Profile 22 is available in Chamfered and Sculptured options. Its intelligent design, outstanding looks, technical advantages and exceptional build quality give you a clear competitive advantage.

The flagship Spectus Elite 70 system is available in a classic Bevelled shape and an attractive Ovolo with matching beads. Its track record of installation in millions of properties across the country speaks for itself.

The homeowner-focused Swish 24/7 system offers a classic Sculptured shape. Recognised by 7 out of 10 homeowners, it is a clear retail favourite.

Every system can be used to fabricate the full range of window and door styles, including, in the case of Optima, a French casement option.

And every system covers the basics as standard, including impressive thermal efficiency and excellent security credentials.

A **63mm** window and door system to **open up MORE opportunities**

When a 63mm system is required, Spectus Elite 63 is the answer.

It has a choice of a Bevelled or Ovolo shape with matching beads and can be used to manufacture a full range of window and door styles.

And like all Epwin Window Systems products, the Elite 63 system has been engineered to be easy to fabricate and install.

MORE versatility and simplicity

With Epwin Window Systems, creating perfect projects is easy.

Our systems have a wealth of glazing options to help you tailor thermal efficiency levels to meet the most demanding requirements.

Our universal ancillaries range is the widest on the market so there is never any need to compromise on the level of finish.

Our extensive range of coloured and woodgrain foils helps you open up opportunities in this fast-growing segment of the industry.

And in our Safeware brand, ordering hardware is made easy because every item in the extensive range is compatible with our systems.

Market-leading specialist windows that give you **MORE** in high value markets

A Flush Casement Window System and a Vertical Slider System that give you the heritage edge

Our Flush Casement Window System replicates the original features of timber casements more accurately than rival products and gives superior thermal performance too.

The Spectus Vertical Slider, which includes a mechanically jointed option, is the UK's market leader and is widely recognised as the best PVC-U sliding sash window there is.

A Flush Tilt & Turn System and a Fully Reversible Window System that offer powerful commercial benefits

When it comes to medium and high rise applications and inaccessible locations, Epwin Window Systems has the solutions.

The Flush Tilt & Turn Window System can be fabricated at large sizes and has the sash positioned inside the frame for the sleek, flush appearance traditionally associated with aluminium.

The 70mm Fully Reversible Window System is a cost-effective commercial solution that offers exceptional thermal efficiency and a striking, modern look.

Trail-blazing door systems that bring **MORE** to your portfolio

Market-leading sliding patio doors from PatioMaster

In PatioMaster you have the UK's leading sliding patio door experts on your side. From inline sliding patio doors to the innovative Triple-track with its two or four sliding sashes, PatioMaster doors feature advanced design and engineering. Every door is built by sliding door experts, adding value to your reputation and delivering the high quality products your customers demand.

Value-added composite doors with Frontier

Our Frontier range of 44 and 48mm timber core composite door leaves gives you what you need to compete in this growing market. Designed to fit and complement our window systems perfectly they offer superb aesthetics, impeccable security and excellent thermal efficiency.

An **extraordinary aluminium system** that opens up **MORE options**

Stellar is the latest addition to the Epwin Window Systems portfolio and it sets a new standard for the aluminium sector.

The system has been designed from the ground up to deliver over and above any other aluminium system on the market.

It is quick and easy to fabricate and uses less material so it gives you considerable cost- and time-efficiencies.

It comes with all the accreditations and guarantees you would expect from an Epwin Window Systems product, as well as all the reassurance of manufacturing excellence.

The frames are slimmer than any other competitor and the glazed area is bigger. The performance figures are exceptional too, so on every level you have powerful benefits to offer your customers.

The Stellar range includes casement windows, flush and fully flush casement windows, fully flush residential doors and lift and slide patio doors. There is also the Stellar aluminium bifold door, which uses lightweight aluminium for the frames and sashes and a choice of PVC-U or aluminium beads alongside them. The result is a bifolding door that performs perfectly and complements the full range of window styles.

Quite simply, the difference is Stellar.
