EVOKIT

We are in Rotterdam, important port city located in the province of South Holland in the Netherlands. Ermetika and its distributor were consulted by the teams in charge of the hotel renovation of the iconic Savoy hotel.

The main focus of the regeneration of the hotel is to optimize the living space in the rooms where every square meter counts. For this 74-room project, we supplied our Evokit model as well as the architraves. The result is beautiful, functional and efficient.
