

Resysta® Facade

Resysta® rightly claim that 'some miracles happen'. Resysta® is a cutting edge material development that combines the pleasing aesthetic qualities of hardwood whilst overcoming the inherent problems of timber. Resysta® does not rot and is resistant to insect and fungal decay. Resysta® does not fade to grey in sunlight, nor will it swell or shrink in water, whether fresh, salt or chlorinated. Resysta® is very stable, even in the harshest of climates and has admirable ecological credentials due to its ingredients, which are rice husks, mineral oil and rock salt. Resysta® can even be recycled.

All of these qualities produce an exceptionally low maintenance material. Whether left raw, lacquered with Resysta® Glaze or painted with Resysta® Colour Concept, no loss of colour occurs except for an initial minor settling after installation. Resysta® is an extruded product which is available in a range of profiles, including claddings, facades and sun and rain screening.

As if these qualities were not enough, Resysta® tests to B2(E) fire rating, has a class 1 durability rating (the highest resistance to wood destructive fungi) and has a Brinell hardness value of 81.1 N/mm². Resysta® can be drilled, sawn, mitred, sanded and fixed with ordinary timber tools.

Resysta® has been accredited with an Environmental Product Declaration (EPD) to EN15804 which reinforces the product's excellent environmental story.
