

Straight Couplings

23-500mm diameter

Used for the connection of drain, waste and vent fittings for pipes of similar diameters.

Introduction

Fernco Straight Couplings are available in a complete range of sizes from 23mm to 500mm in diameter and provide an effective solution for jointing pipes with similar outside diameters. They are ideal for all repairs, whatever the pipe size or material.

Made from a durable, high quality thermoplastic compound, Fernco PVC Couplings have the dimensional flexibility that ensures a leakproof seal on any pipe materials including plastics, cast iron, asbestos cement, clay, concrete, steel and fibreglass.

Clamp bands are provided as standard in corrosion resistant Grade 1.4310 (301) stainless steel. Grade 1.4301 (304) and Grade 1.4401 (316) stainless steel clamp bands are available upon request.

Benefits

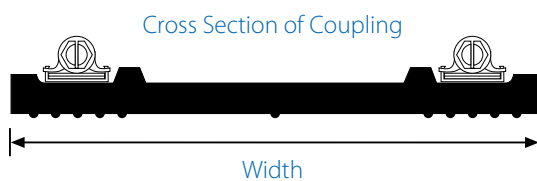

- Quick, versatile and easy to use solution for many domestic drain, waste and vent plumbing problems
- Ideal for repairs
- Can be installed onto any pipe material
- No special tools required as the range can be installed with a screwdriver, nut driver or socket
- Provide a watertight seal

Applications

- Can be used to connect plain ended pipes
- Repair of existing pipe systems by replacing short sections of pipe
- Connects short and cut lengths of pipe
- An inexpensive option when a shielded coupling is not required
