Complete, inspired design solutions

product  
catalogue

# welcome

Frem Group creates spaces that are not just offices, libraries or schools – they are places where life happens and where people connect. We transform each environment with our deep passion and understanding of furniture and space, and by creating a unique place where work can flow naturally and efficiently.

## Every journey starts with design

It is a given that a beautifully designed workplace will inspire efficient work flow and have a positive impact on your bottom line. This is the reason why our highly skilled designers are the backbone of our company. Our experienced and talented cabinet makers and engineers ensure that the highest levels of craftsmanship are continually maintained on each and every item we produce.

## Complete solution

Our vision is to deliver intelligent, considered, quality solutions through a personal, complete service, harnessing our unrivalled network of expertise. There is no challenge that we cannot overcome. We are able to bring you a complete design solution that will satisfy even the most ambitious requirements.

# contents

**08** **workspace**  
Our workspace category encompasses a wide range of traditional and contemporary reception, boardroom and desking furniture to suit every requirement.

**48** **screens & acoustics**  
Our screens and acoustic solutions help you manage sound and privacy in your work environment.

**86** **storage**  
The highest quality storage from mobile shelving through to storage walls.

**98** **seating**  
Our beautiful new seating range offers something for everyone from breakout area to bistro style seating.

**148** **libraries**  
Library shelving, signage and display products for all your library needs.

**158** **technology**  
Desk integrated IT, intelligent seating and energy saving solutions for offices and learning environments.

# our vision

Delivering intelligent, considered, quality solutions through a personal, complete service, harnessing our unrivalled network of expertise.

# environment & sustainability

## Our promise

Frem Group cares for the environment. We make products which are high quality and durable to last for a long time. Our furniture and office solutions are made of materials which are only from sustainable sources. We consider the environment throughout our manufacturing processes and we actively seek for new ways to cut down waste, to save energy and to reduce our carbon footprint.

## Our manufacturing process:

- Minimises waste
- Protects drainage
- Reduces consumption of energy and gas
- Adheres to energy efficiency
- Recycles solvents
- Recycles 50% of the packaging waste
- Uses a machinery renewal programme which means that we are constantly moving towards more energy efficient production
- Works in a strategic partnership with material suppliers who are FSC certified

Frem Group's environmental policy is applied by the staff too. Our offices utilise FG Technology (see page 158) to ensure a minimum use of energy. We store the computer hard drives in storage cupboards instead of placing them underneath the desks. We are also proud to be working in a building that holds a BREEAM\* (Building Research Establishment Environmental Assessment Method) 'Very Good' rating. BREEAM sets the standard for best practice in sustainable design and has become the de facto measure used to describe environmental performance of buildings and communities.

\* BREEAM is a registered trade mark of the Building Research Establishment Limited, a wholly owned subsidiary of BRE Group Limited, and is used by permission. Frem Ltd and its products are not affiliated, endorsed or certified by BRE Global Limited, which is the operator of BREEAM, or any other subsidiary of BRE Group Limited. All rights are reserved.

# BREEAM®

# everything starts with design

Our products ooze quality and style. We swoon for beautiful design and top class craftsmanship. No workplace needs to look and feel drab. We decorate our homes to reflect our personality, so too should every workplace reflect the personality of the company within. That is what we do: transform, beautify and improve in every possible way.

In this process you are at the centre of our world. You have been trusting us for over 25 years with your visions and dreams. Our combined passion for a stunning outcome is the basis of our long term success. Together we become a dream team – your objectives become our objectives, we adopt your vision. You get everything on your wish list and more.

# our services

**Prototyping** is a true facet of our business. We are able to produce either one-offs or limited runs of products depending on requirements. Our designers are great at coming up with creative solutions to even the most challenging briefs and their informative designs are both clear and easy to read at every level. We always ensure that our designs are easy to understand by our clients, while detailed enough for immediate commencement of manufacture. The design skills coupled with the vast manufacturing range and broad choice of materials we work with give us a virtually unparalleled ability to produce prototypes within very limited time constraints.

**Site surveys** form an integral part of successful installations, as good foundations assure a smooth running of a project. Surveys are always undertaken by staff members who have experience either making or installing furniture so that potential issues will be seen before they arise.

All aspects of **delivery and installation** are always overseen by an experienced Project Manager, who is familiar with the project from concept to completion. Our goal is always perfect delivery.

**Frem Group Manufacturing** is based in three locations: Northampton, Haverhill and Wakefield. Our manufacturing adheres to 5S manufacturing disciplines which enables us to apply good practices in production. This helps reduce waste, helps efficiency and helps our employees, as it creates a better work environment, with organised flow and optimum positions for tools and components.

From concept to creation the Frem Team will lead the way forward and demonstrate the true meaning of a working partnership. Our **aftersales service** will follow up any outstanding issues ensuring you are always updated on the progress of your project or order. No matter how large or small the project, we approach it with the same level of dedication and professionalism, working with you and understanding your needs to ensure that our products exceed your expectations in every way.

# workspace

Our workspace category offers a wide range of traditional and contemporary furniture solutions from receptions to boardrooms and desks. Our experienced and highly skilled cabinet makers and engineers ensure that the highest levels of craftsmanship are continually maintained on each and every item we produce. Our bespoke capabilities ensure that we will always provide solutions that fully satisfy requirements and expectations.

## Bespoke receptions

Your reception area creates the first impression of your company. Frem Group offers a complete solution for all of your reception area needs, whether you require a reception desk, seating, tables or a completely new look.

All of our furniture can be manufactured to any specification. Beautiful concepts can be achieved by integrating the natural look and feel of real wood with such materials as marble, granite, glass and metal. The options are endless.

If you want the bespoke solution for your reception area then our free design service will guide you effortlessly from concept to installation. It allows you to capture the essence of your brand and integrate it into beautiful furniture that will enhance the image of any business.

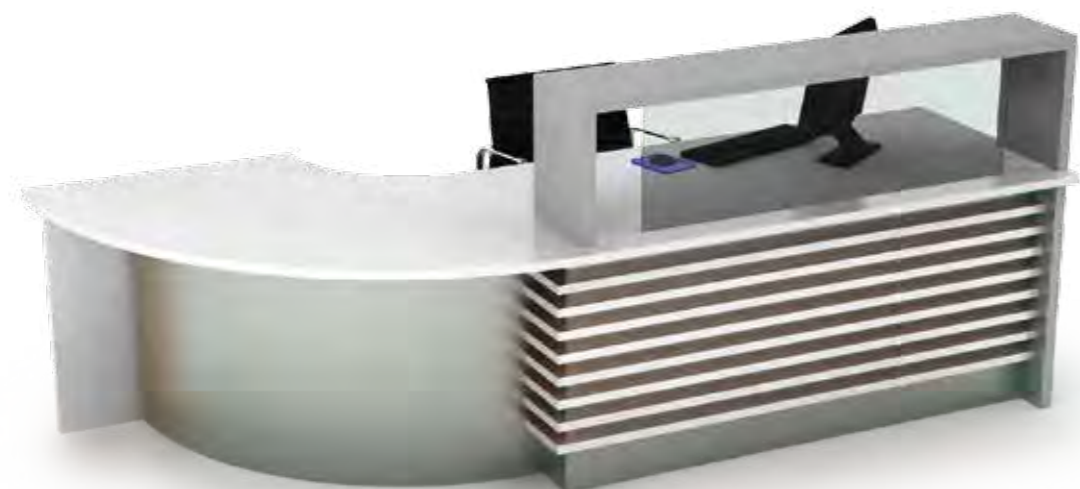

# Moda

**Moda** modular reception desk system offers maximum impact without compromising on style or exceeding the budget. Quality manufactured components, finished to the highest standards, combine contemporary design with freedom and flexibility. **Moda** reception desks are suitable for service and reception areas of any size.

## Options

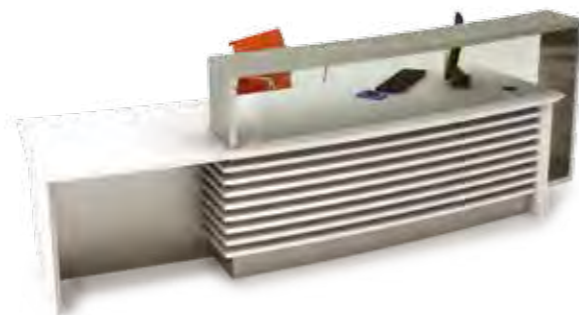

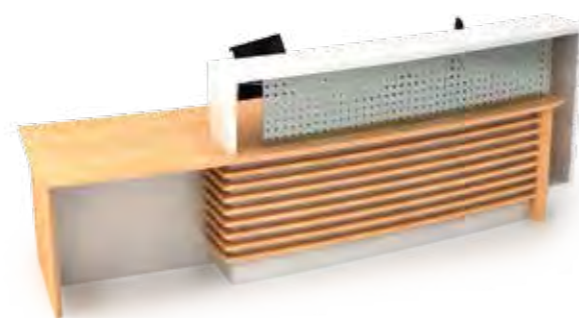

All modules are available in melamine faced chipboard, laminate or real wood veneer, offering flexibility on finish and price.

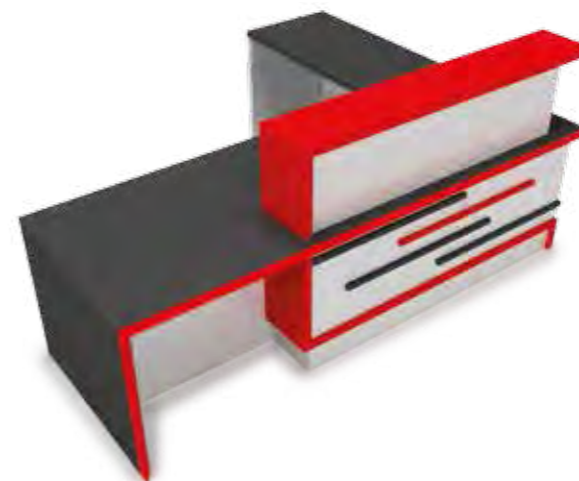

## Schema20

The **Schema20** range of reception desks is a truly design-led solution. This range bridges the gap between bespoke and modular, offering bespoke quality on a shorter lead time and at an affordable price.

## Schemalite

The **Schemalite** range offers contemporary styling with the possibility of endless colour combinations to create a dynamic solution for any reception.

# Annex & Annex Lite

**Annex** and **Annex Lite** receptions use 70mm and 45mm aluminium frames giving you a flexible solution with the look and feel of a bespoke desk. Available in a range of laminates, acrylics and veneers.

# Lumina

The white lacquered surfaces of the **Lumina** reception desk offer a truly modern aesthetic look to your work place, adding prestige and quality to the reception area.

## A2B - Vista

Considering form and function is fundamental, however, including people and their perceptions increases performance. **Vista** provides a fresh perspective on workspace aesthetics while enhancing productivity.

**Vista** offers an inventive approach to desking, bringing teams together whilst giving a feeling of enhanced personal space. The intelligent use of angles improves individual workspace and privacy levels by ensuring that although colleagues are out of the line of sight, unity can be maintained, and an open creative culture can be achieved.

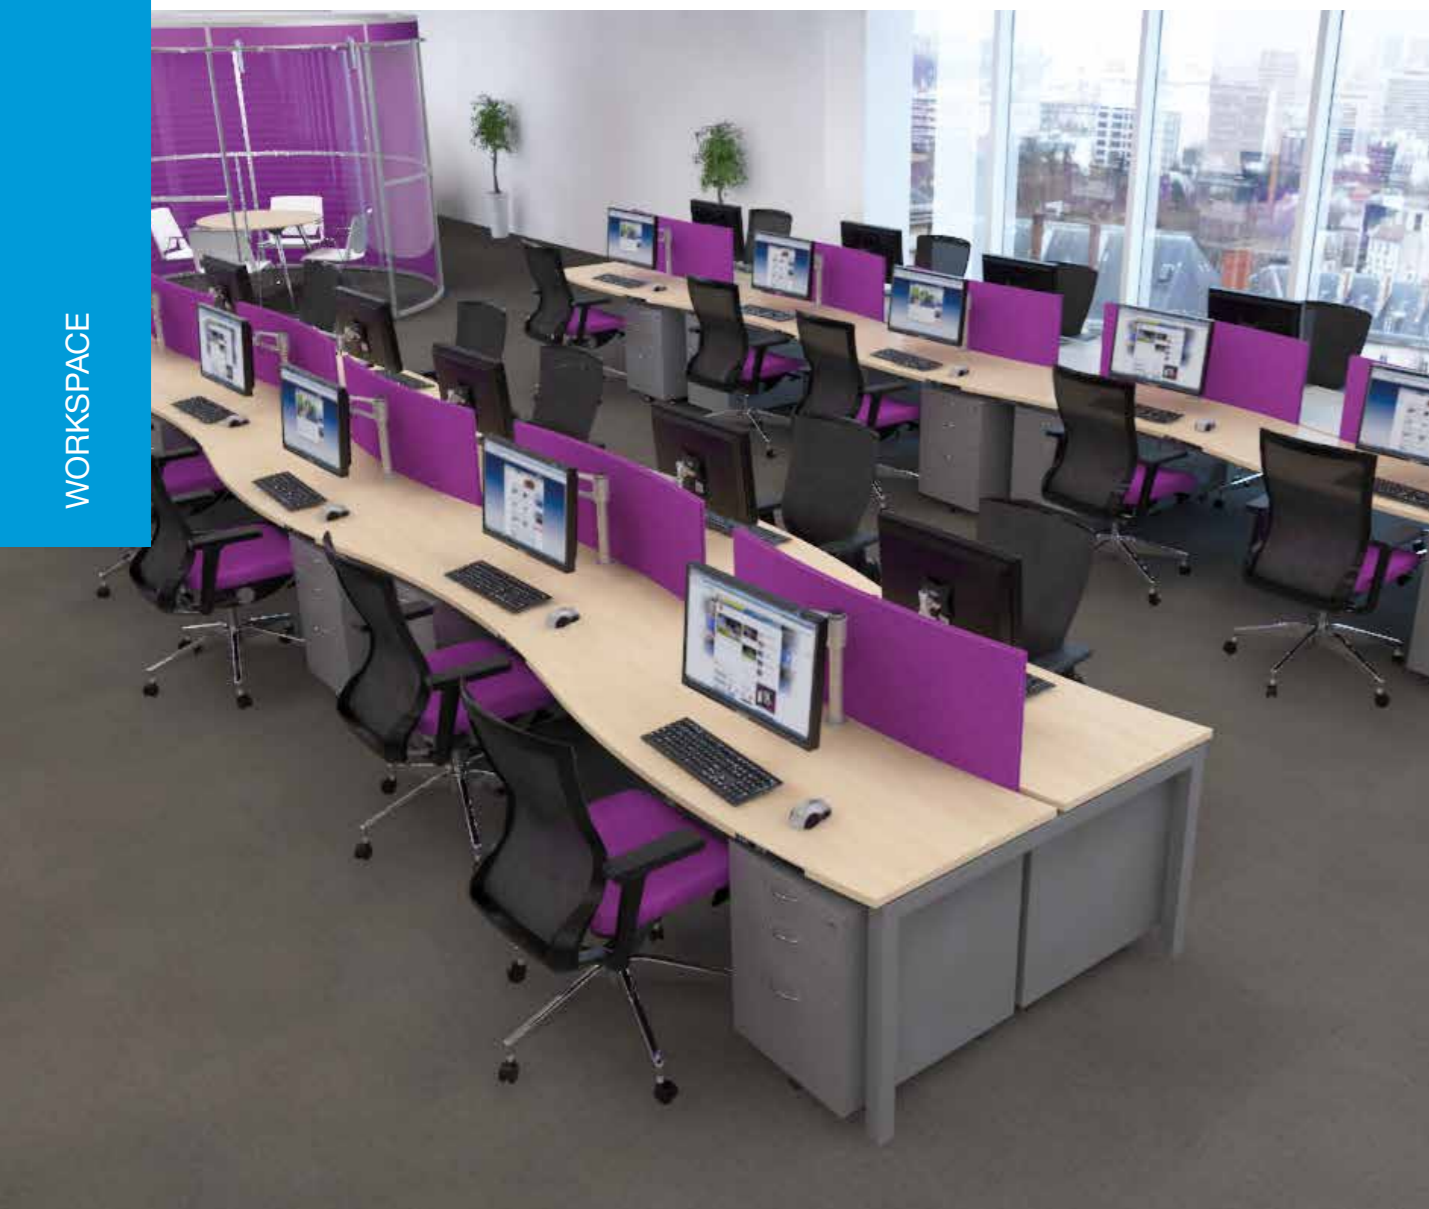

## A2B - Cyclone

Having one type of office may be efficient, but to be effective that office needs to perform in many different ways. **Cyclone** offers that flexibility, in a practical and unique way.

**Cyclone** is a contemporary modular desking system that allows flexible and dynamic configuration while promoting team work. The use of circles and linking pieces allows effective space utilisation and improves team working and staff wellbeing whilst offering a perfect alternative to the formality of straight lines.

## A2B - Flow

The **Flow** desking range offers a unique and inspiring alternative to traditional bench desking, with minimal impact to the capacity and overall footprint. This sleek bench makes for a less conventional but more interesting environment for office spaces, libraries and educational establishments.

**Flow** desking will work particularly well as an alternative to conventional benching. The addition of co-ordinated curved screens complements the profile and allows for better management of acoustics.

## Panel

**Panel** has the aesthetics and symmetry to meet the demands of evolving working environments. It brings a flexible solution when configured in clusters, and offers a bold statement as an executive suite. Elegance, durability and practicality at its best.

## Bench 80

The clean, contemporary lines of the **FG Bench** systems include recessed central legs to provide uninterrupted and flexible workspace. All **FG Bench** ranges are available with a wide variety of accessories including comprehensive wire management, system screens and storage. A wide selection of top and frame finishes allows **FG Bench** to complement any interior.

Combining design excellence with ultimate functionality, **Bench 80** sets the standard for others to follow with quality finishes and unique product features. **Bench 80** is a premium range offering a specification that is not normally expected as standard, such as sliding tops and integrated cable management. It is an integrated package that excels with flexibility and performance.

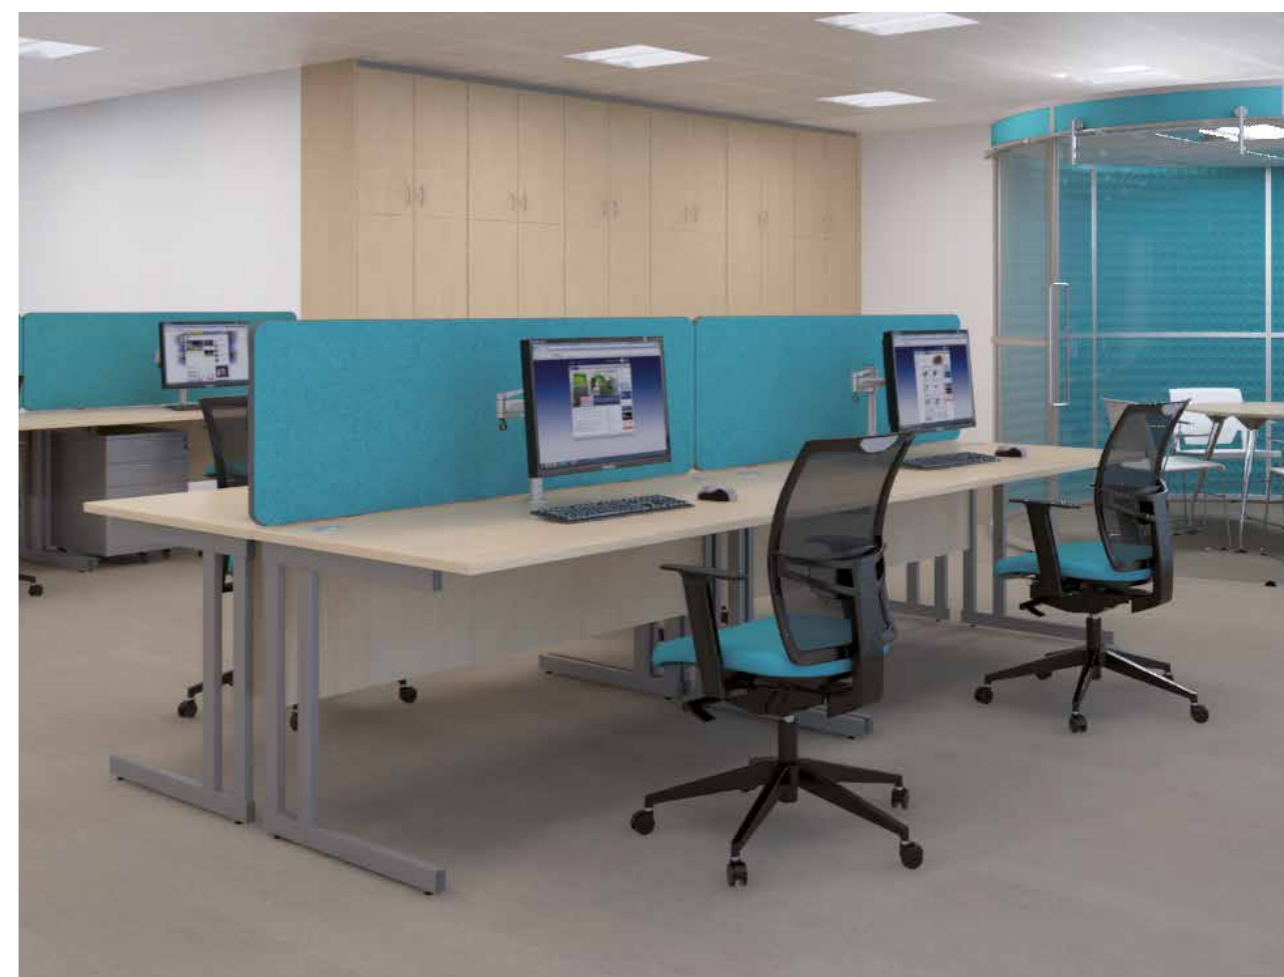

## Bench 50 & Bench 50 SP

**Bench 50** offers cost effective benching that provides optimum use of space with ergonomic benefits. It is ideal for highly populated office spaces where multiple workstations are required to suit collaborative working. **Bench 50** ensures a pleasant working environment and clean minimalist styling. The floating style top provides a contemporary look with clean lines.

While the minimalist style of standard **Bench 50** remains a popular option for many, when a high design finish is required **Bench 50 SP** presents an alternative. The splayed leg offers a subtle design change that can be enhanced with the use of finishes.

## Cantilever & Contract

**Cantilever** is a traditional workstation with simple design lines. It is highly engineered to allow the regular 'churn' that is essential to a changing environment. An integral modesty panel brings maximum rigidity, and a concealed area for cable management.

The **Contract** range provides an excellent value cantilever desking solution that is both sturdy and durable, yet stylish and functional. Manufactured to your specification, various top shapes allow for a cost-effective use of space.

# Workwall

**Workwall** is a higher level storage option and offers a vast number of variations.

**Workwall** helps you keep your work space tidy while allowing for quick access to your documents and folders. A vast variety of bespoke options guarantee that we can offer you a **Workwall** solution which is fully suited to your space and your specific requirements.

# Edge

**Edge** finds its origin from traditional refectory style surroundings with a contemporary twist. Becoming more and more popular amongst our customers, we have developed a modern solution for communal dining, informal gatherings or meetings.

What sets our product apart from that of competitors' is the vast choice of finishes and edge details. In addition, our solution offers a valuable combination of strength with light-weight quality. This makes the product ideal for educational institutions where durability and practicality are key. We further broaden the appeal by offering bespoke material options alongside the standard range.

## Bespoke boardroom traditional

The boardroom, one of the single most important areas of any corporate environment, can be enhanced by our vast experience within this field. Your boardroom needs to reflect your company's image and values while providing professional, stylish and comfortable furniture.

Whether it is a modular segmented format or a bespoke look that is required, our design team will arrive at the perfect solution for you. Frem Group can not only produce any size or shape table in the materials of your choice, but can also manufacture any ancillary item to match – the possibilities are endless.

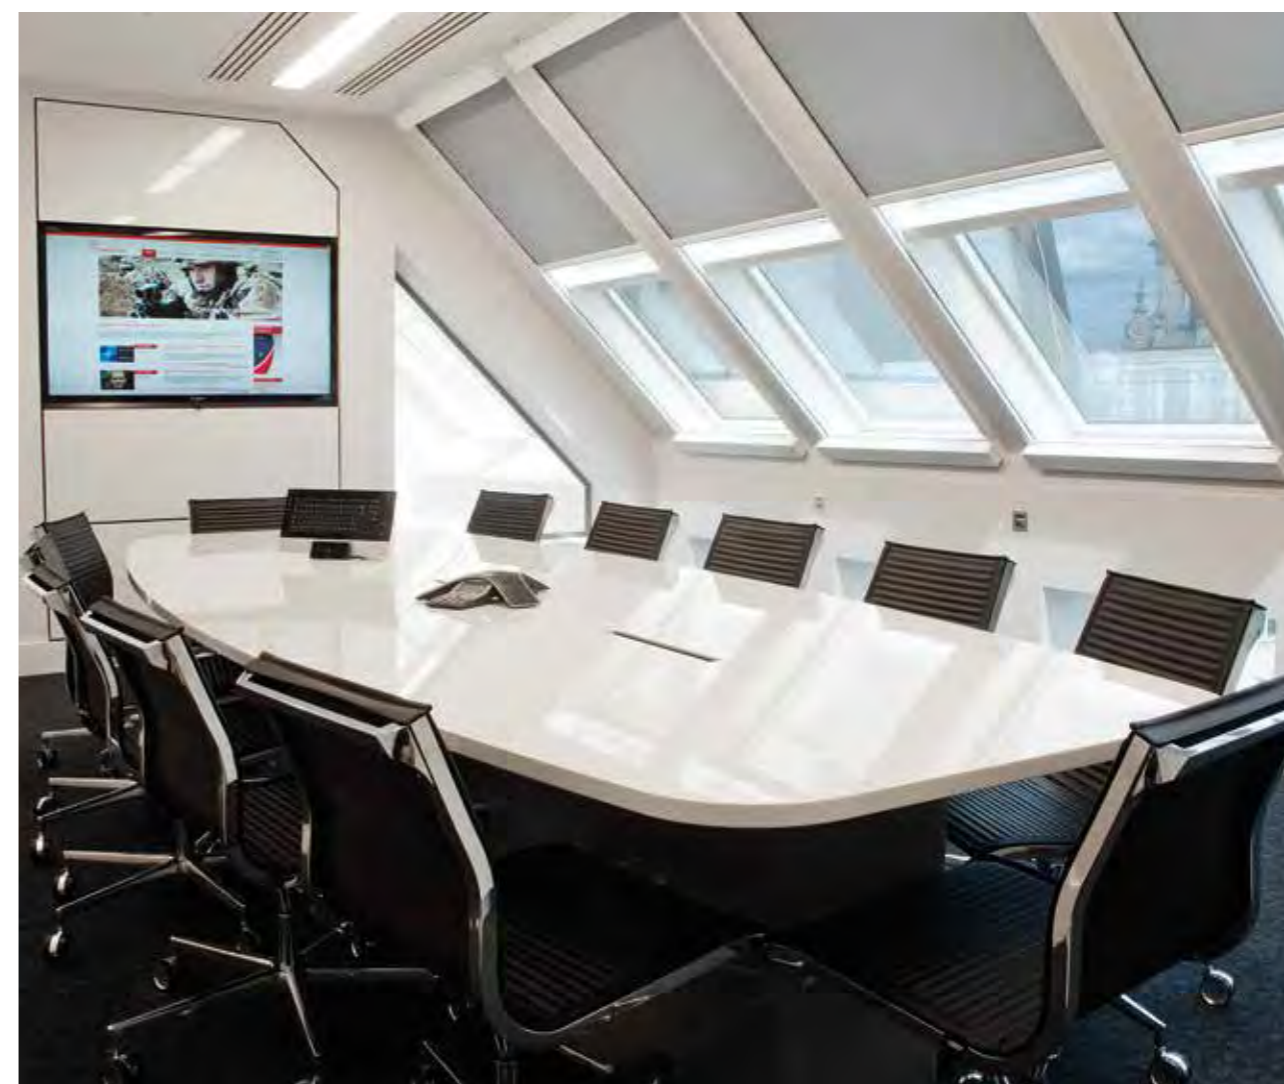

Quality traditional bespoke furniture can be manufactured to enhance all elements of the office environment and surroundings whilst presenting a timeless style.

## Bespoke boardroom contemporary

There are no limits to what can be achieved when designing contemporary, bespoke boardroom furniture. High gloss, seamless finishes executed by hand, can add minimal clean lines to modern boardrooms in a spectacular but subtle manner.

# CS One

**CS One** is an award winning, innovative table base system with a unique profile. It is designed for commercial applications and suitable for a variety of configurations including desks, meeting tables and boardroom tables.

**CS One** accommodates tops of unlimited length providing endless opportunity for a wide variety of configurations and table widths of up to 1600mm. Legs can be positioned at any point along the beam to support various table overhangs.

## CS Two

**CS Two** is a modular table system that offers a sleek and timeless design, making **CS Two** ideal for conference and boardroom tables. **CS Two** promotes flexibility and diversity with legs that can be positioned at narrow or wide stances for small or large tables.

**CS Two** comes with the option of a cable managed leg.

# CS Three

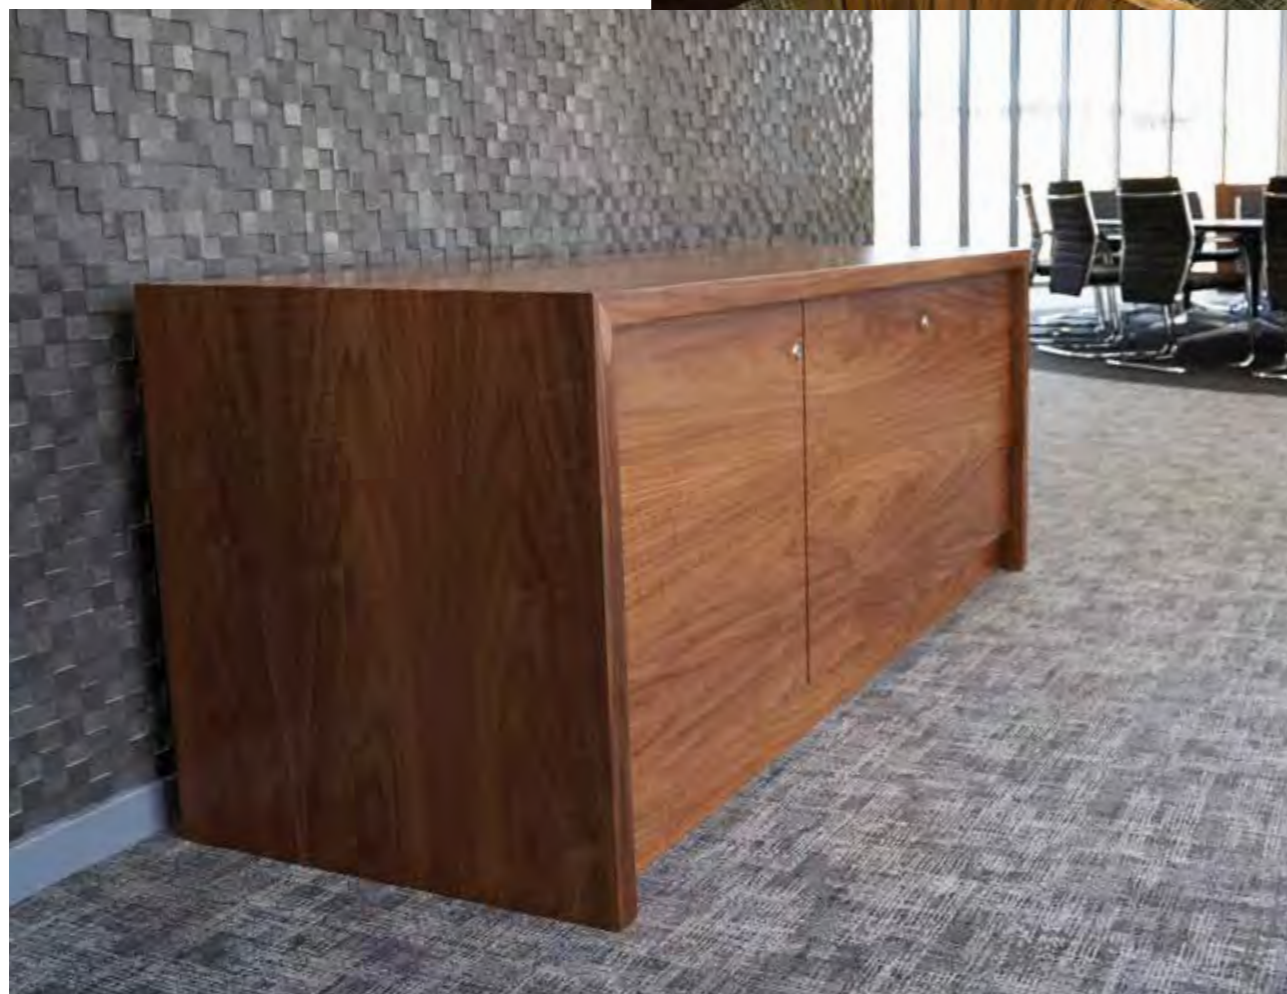

**CS Three** is highly flexible and versatile table range that provides a complete family of table options. This enables total continuity of design throughout any commercial environment.

**CS Three** tilt top tables provide a nesting table for workplaces that demand flexibility such as boardrooms, training rooms and temporary desking. **CS Three** tilt top tables are also fitted with lockable soft tread castors and are supplied with table linking mechanisms as standard.

# Credenzas

Frem Group offers a comprehensive range of **Credenzas** to complement any boardroom, meeting room or training room. A wide choice of styles, fittings and finishes ensures design compatibility with any contemporary or traditional table.

# Lecterns & AV units

We provide **Lecterns** which can be customised to your exact dimensions and requirements, and with integrated technology. A wide range of materials and styles are available along with the option to include a company logo or statement.

## screens & acoustics

We need to be productive at work but it is not always so easy. There are distractions all around us that can affect our levels of concentration. Frem Group have developed a wide range of solutions that increase privacy, improve acoustics and simply make your office a better environment to work in. Our range of products offers everything from single screens to meeting hubs with sound absorbent walls.

## Screen 5.2

**Screen 5.2** has the flexibility of creating a variety of panels of different heights and widths making the product truly versatile. At 70mm this aluminium framed system is both rigid and robust with the capability of accommodating heavy weights. The tiled system gives it a very distinctive look and allows it to carry acoustic foam on both sides of an internal frame.

# Screen 5.2

Key features of this system include acoustic blocking, acoustic absorption, floor standing, desk mounted, linking, glazing, wire management, storage and accessory rails.

## Screen 4.2

At 45mm this aluminium framed screen has the flexibility to be both curved and straight allowing a variety of configurations to be created. The 'golf ball' effect gives the screen an acoustic look as well as a very high NRC\* of 0.95. Creative use of the 4.2 system allows for meeting spaces to be integrated within an open plan environment.

\* Noise Reduction Coefficient

[frem.co.uk/screens](http://frem.co.uk/screens)

# Screen 4.2

Screen 4.2 can be used to create a flexible working space. The range of freestanding screens offers further freedom to adapt space in order to allow for maximum efficiency.

# Screen 3.2

**Screen 3.2** offers significant flexibility and versatility. This popular screen is constructed using a 25mm aluminium frame with round and square end profiles to choose from, allowing complete co-ordination with all makes of desk.

The 3.2 system allows for acoustic absorption, floor standing, desk mounted, wall mounted, linking, glazing, accessory rails and pinnable surface.

# Screen 3.3

**Screen 3.3** is a 35mm aluminium framed screen with a distinctive curved profile and robust rail system enabling a maximum carrying capacity. The extra load bearing capacity allows the integration of 25mm of acoustic foam either side of a blocking rubber core. When combined with the contour screen this system creates a welcoming aesthetic.

# Screen 3.6 Zip

**Screen 3.6 Zip** offers a distinctive quilted fabric design detail, resulting in a clean, soft aesthetic with no need for edging or capping. At 35mm thick, and using Camira's Second Nature fabric with a colourful heavy duty zip linking method, this screen delivers the ultimate contemporary look and feel.

# Screen 2.1 & 2.2

**Screen 2.1** is an entry level, 30mm thick, fabric covered screen with plastic dumbbell linking. This product is ideal for large areas which must be screened off cost effectively.

Key features of this range includes floor standing, linking, curved and sloped/wave top.

**Screen 2.2** is an entry level fabric covered screen. While similar to the 2.1 screen, the 2.2 is 42mm thick, allowing for the addition of glazing.

Key features of this range include floor standing, linking, pinnable, curved, glazing and sloped/wave top.

## Screen 2.3 & 2.4

**Screen 2.3** is a timber framed screen, which allows you to achieve a more natural look and feel. It also gives you the design aesthetic that only wood can provide.

Key features of this range include floor standing, linking and lattice inserts.

**Screen 2.4** is a dedicated and robust mobile screen that can be used around the office, in the classroom or in the training room.

Key features of this range include floor standing, whiteboard, pinnable, mobile and magnetic.

# Screen 1.1, 1.2 & 1.3

**Screen 1.1** is an entry level, 28mm thick, desk mounted fabric covered screen with the option of a plastic or fabric covered trim.

Key features of this range include desk mounted, arc/wave top and pinnable surfaces.

**Screen 1.2** is a simple desk mounted 5mm acrylic screen.

Key features of this range include desk top mounted or fly by, arc/wave top.

**Screen 1.3** is a free standing desk screen primarily used on bench desking systems where no lateral screens are provided. Available in 5mm acrylic and 9mm fabric wrapped.

Key features of this range include free standing, acrylic/fabric wrapped and arc/wave top.

# Screen 1.4 & 1.5

At only 18mm thick **Screen 1.4** is an extremely simple and elegant fabric wrapped screen.

Key features of this range include desk mounted, pinnable surface and arc/wave top.

**Screen 1.5** is an entry level acoustic screen that significantly reduces reverberation. Slide on lateral screens complete this range.

Key features of this range include acoustic absorption, desk mounted, 40mm thick and arc/wave top.

# Acoustics

As we move into the world of high speed technology, the limitations on productivity are no longer related to processing power but on our ability to carry out tasks efficiently.

The creation of suitable acoustic spaces is essential in optimising our productivity in any work environment. Frem Group provides clients with expert advice on how to incorporate intelligent acoustics design into their projects.

Through the implementation of the three key acoustic components – Absorb, Block, Cover – creating effective sound environments is as simple as A, B, C.

## A = Absorb

Reduces reverberant noise.

Our range of acoustic screens, ceiling elements and wall panels all provide high degrees of absorption to reduce reverberant noise. The broad range of options allow our clients to control reverberation without compromising the desired aesthetic.

All absorbers are formed from acoustic foam, glass fibre or polyester and are designed to absorb at the frequencies that count. When in doubt, our team of acousticians are available to provide guidance on how best to achieve the desired result.

# Acoustics

## B = Block

Disrupts the sound path.

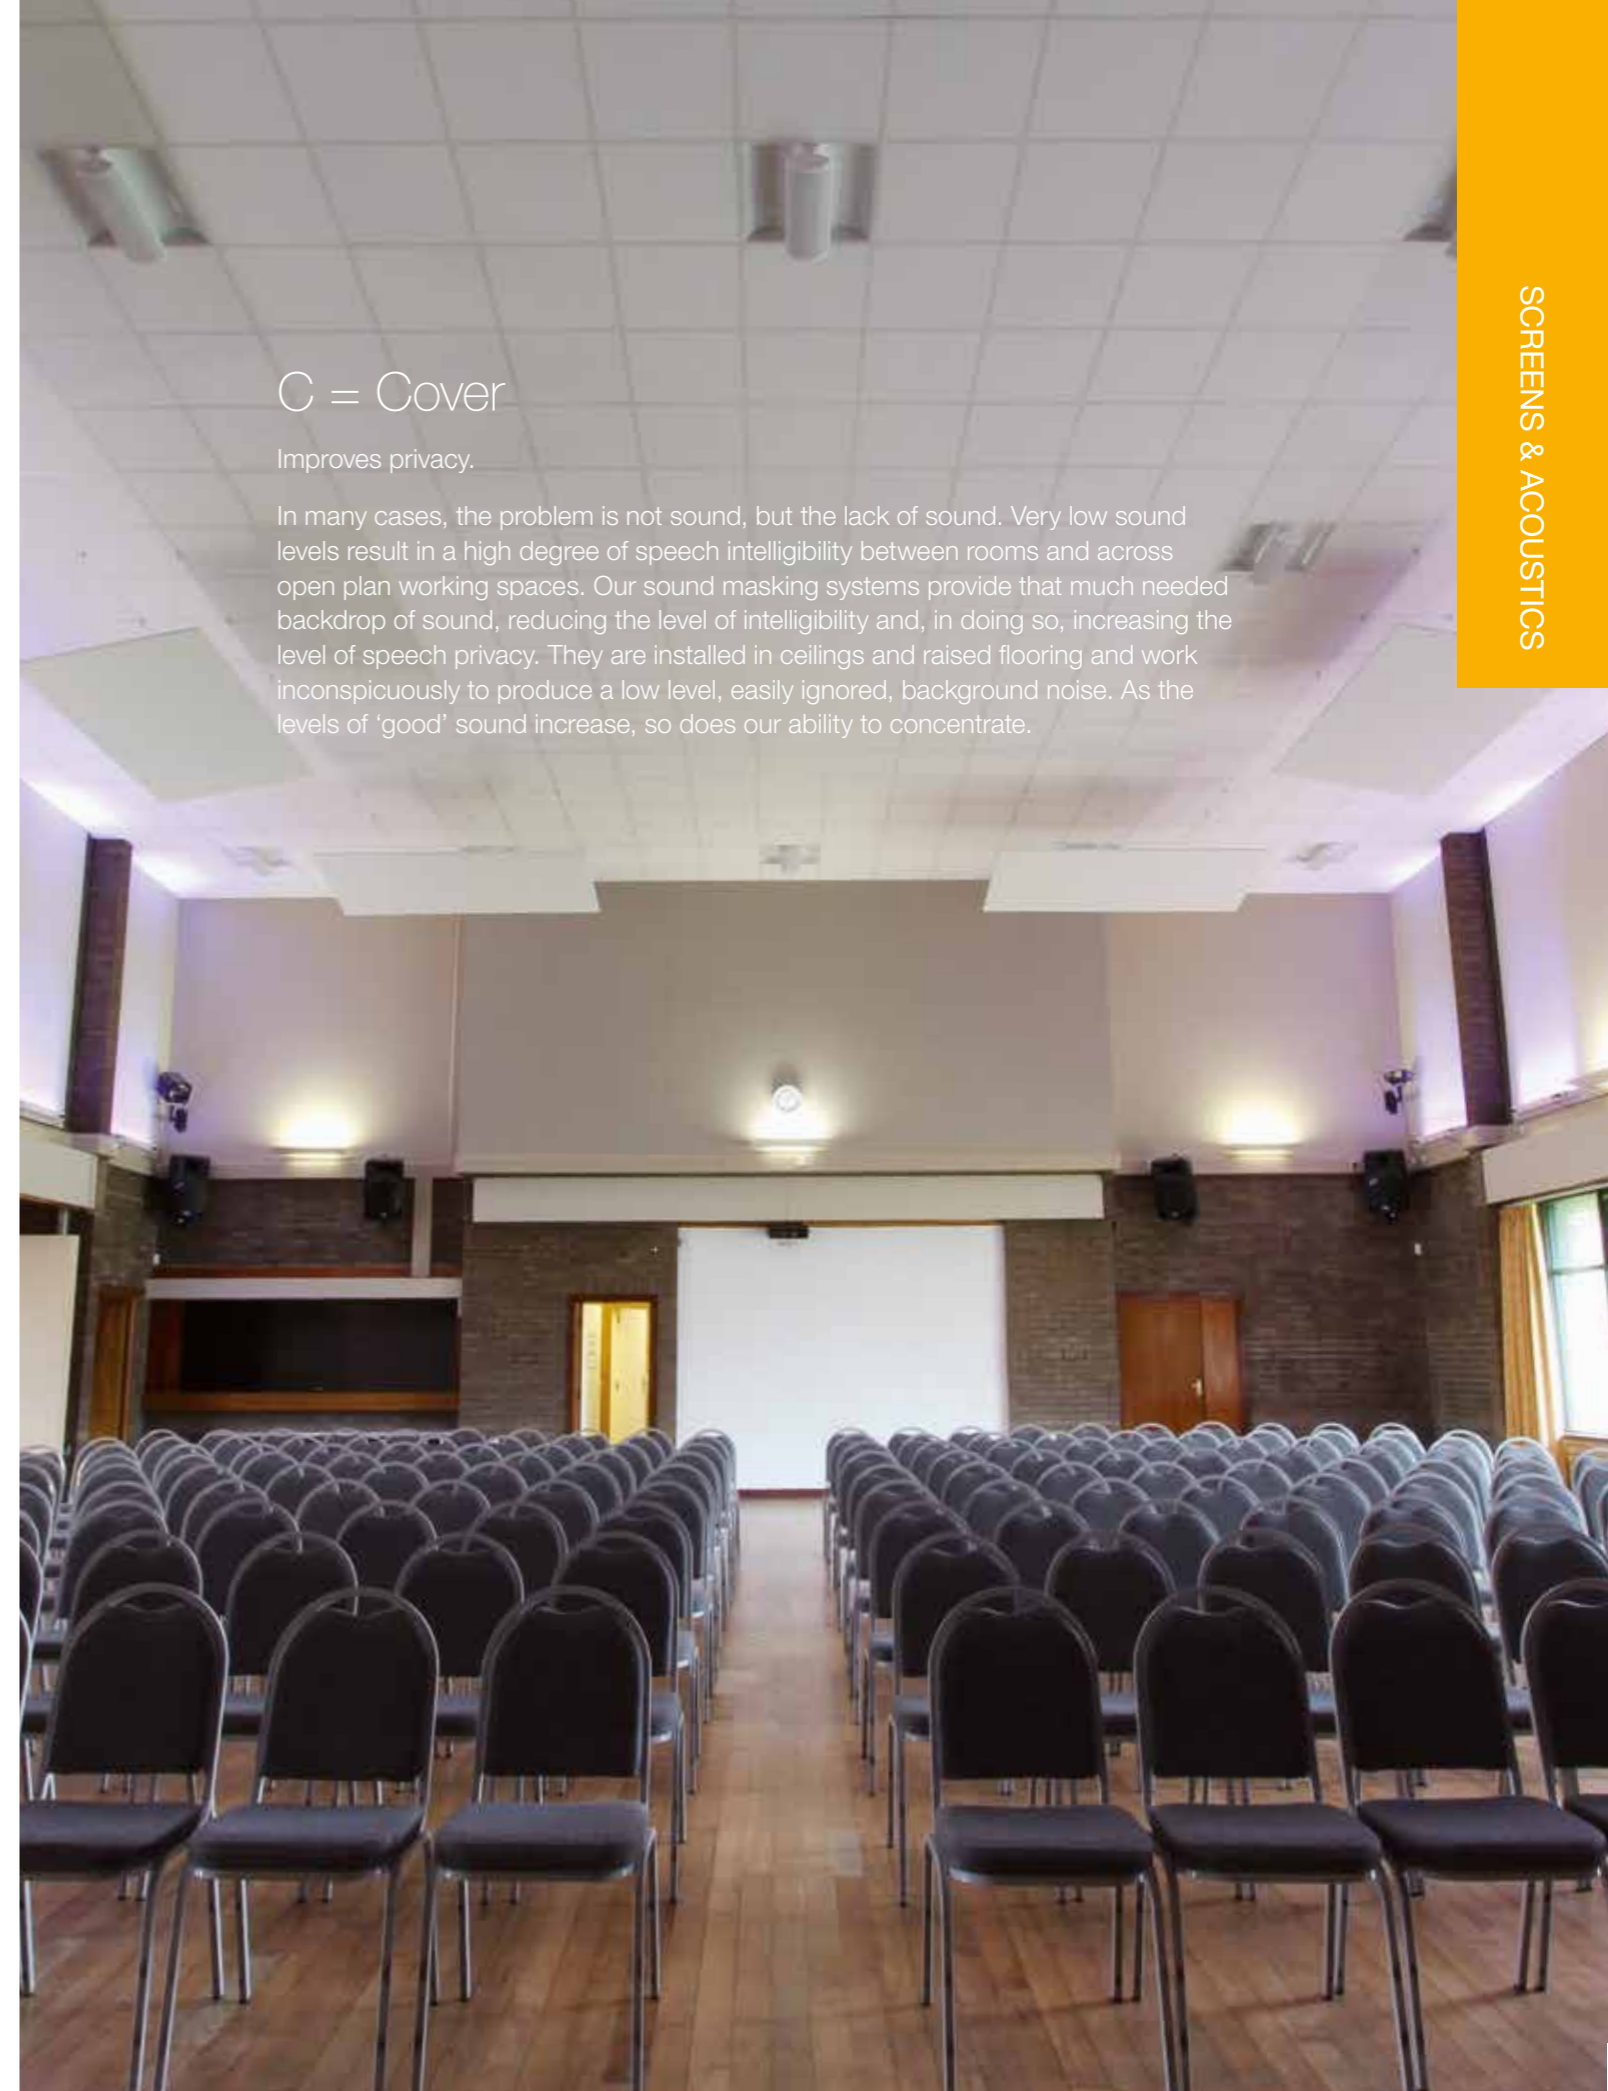

All of our screens and pods are laboratory and field tested for their blocking power. Different degrees of privacy can be achieved through the use of screens of varying height and performance. Most of our acoustic screens have both absorption and blocking properties for optimal results.

## C = Cover

Improves privacy.

In many cases, the problem is not sound, but the lack of sound. Very low sound levels result in a high degree of speech intelligibility between rooms and across open plan working spaces. Our sound masking systems provide that much needed backdrop of sound, reducing the level of intelligibility and, in doing so, increasing the level of speech privacy. They are installed in ceilings and raised flooring and work inconspicuously to produce a low level, easily ignored, background noise. As the levels of 'good' sound increase, so does our ability to concentrate.

## Screen 5.2 Pods

**Screen 5.2 Pods** offer a high degree of speech privacy. This is linked to the amount of speech disturbance between two people who are not in conversation with each other. The degree of speech privacy in any situation is established by measurement of the Privacy Index. The Privacy Index is expressed as a percentage where 0 is no privacy and 100 is complete privacy. We offer services to measure your speech privacy and recommend product and acoustic solutions that can have a highly positive impact in your work environment.

The breadth of choice in dimensions, materials, finishes and colours, ensures **Screen 5.2 Pods** fit beautifully into every environment to deliver required privacy levels. Available in glass and tiled options.

## Screen 4.2 Pod Lite

**Screen 4.2 Pod Lite** is our range of modular, light weight acoustic pods. Available in 1600, 2000 and 3000mm diameter variants, these pods create an effective acoustic environment within all office spaces for meeting places, breakout areas and individual quiet workspaces. The design of the pod structure, panels and optional ceiling optimises sound reduction and sound absorption whilst maintaining existing free flow of air.

# 4.2 Pods

Easily installed and relocatable.

Available in 1600, 2000 and 3000mm diameters.

Image courtesy of Mix Interiors Feb 2015.

## Metro

**Metro** is a unique concept for meeting spaces, designed for total flexibility with the ability to change the acoustic environment in seconds.

# Acoustic Hubs

**Acoustic Hubs** provide meeting and workspaces with acoustic value. The broad range of sizes, shapes and available components ensures all needs can be accommodated to provide individually tailored solutions.

# storage

Frem Group understands the importance of effective and efficient storage systems in the modern office environment. Square footage is expensive and nobody is keen to spend it on storage. The great news is that we have plenty of options for you. Streamline your office with superb storage solutions which are labour saving, cost effective and simply work flow must-haves!

## PURE+

**PURE+** steel storage system is built to the highest standard and specification whilst maintaining an elegant appearance. Its robust construction ensures longevity that makes it exceptional value for money. **PURE+** storage boasts a number of unique, innovative features including a fully welded carcass, carefully finished corner and edge details plus colour co-ordinated handles to integrate fully with the adjacent environment.

**PURE+** epitomises elegance with clean lines and joint free drawer fronts, doors and flippers. The system has been specifically designed to allow for easy reconfiguration during office churn and changes. Its integrated base along with a unique domed leveller provides maximum strength and stability as well as ease of movement. This allows for units to be moved whilst loaded.

## PURE+ Lockers

**PURE+ Lockers** are ideal for personal storage. Offering a wide variety of locker sizes, they can be configured to adapt to any specific requirements. **PURE+ Lockers** are available in a range of lock types and styles, such as standard keyed lock, manual combination lock and card access or electronic locks. Standard key locks can be suited as required.

## Fremtrac

**Fremtrac** mobile shelving system allows you to either halve the space required for your shelving, or double the storage capacity within the same footprint of traditional shelving.

Mobile shelving is ideal for general office filing and archiving, surgery and hospital records, library and museum archives, schools and colleges, solicitors practices and retail storage. **Fremtrac** is 100% relocatable, making it cost-efficient with minimal environmental impact.

### Non-disruption Installation

**Fremtrac** mobile shelving is a surface mounted system requiring no additional building works or fixing to the floor. Installation is noise and dust free and quicker than most other systems, keeping disruption to a minimum.

### Single or Double

Double skinned units provide a clean front line, concealed fixings and ease of adjustment to form a premium product. They are ideally suited to the storage of books, valuable documents or files susceptible to damage from protrusions. They provide clear uninterrupted access to the full width of the shelf and form a practical storage solution for all types of installations where aesthetics and performance of stored media is important.

Single skinned units provide for cost competitive systems that utilise the latest manufacturing techniques to provide the perfect blend of strength, versatility and a pleasing aesthetic.

# Fremwall

**Fremwall** is an infinitely flexible storage wall solution that can be individually designed to meet your exact requirements. Whatever your specification, we can achieve it with a variety of finishes, internal storage fittings, waved or even curved doors and graphic panels.

**Fremwall** allows designers the freedom to create units that reflect the style of the company or environment. The units can be manufactured in a range of finishes including real wood veneer, laminate, glass and MFC.

The options include up and over doors improving accessibility and reducing retrieval time.

**Fremwall's** structural design allows for it to be used either as standard storage cupboards or as room dividers, complete with pass through doors. It can therefore eliminate the cost and loss of space associated with standard walls and partitions.

**Fremwall** represents fantastic value for money offering many premium features as standard:

- Soft seal edging reducing noise and dust penetration
- Adjustable levellers to increase stability, reduce

point loads and minimise the transmission of noise above or below the unit

- Threaded structural fixings to enable the unit to be dismantled and relocated
- 22mm thick panels offering strength, stability and durability
- 180 degree opening hinges on all doors allowing them to be completely folded back to minimise the risk of damage or collision in busy areas
- Secure three point espagnolette locking mechanisms with locks having numbered cores which can be removed and changed

## Picture racking

Our range of **picture racking** is the perfect choice if you wish to store valuable artwork both efficiently and safely. We can configure our **picture racking** to your exact requirements, aiding you to achieve the maximum storage density possible.

Our **picture racking** can be either suspended from above or floor mounted. The option of ceiling suspension racking ensures that your floorspace can be kept clear. A floor mounted system is the perfect choice where there are high ceilings or a lack of suitable structure to affix to.

## Rotari

**Rotari** storage is a high density, fast retrieval rotary filing system offering a higher level of efficiency than traditional filing cabinets. While the files rotate the operator stands still. Rigid steel case, flush fit closure and lockable door provide maximum security.

# seating

Every shade, every shape, every curve and straight line has been included in our extensive seating range. Comfort. Durability. Value for money. This is the kind of seating range that people want to choose from. It has style. It screams quality. It makes a positive difference to any corporate ambience.

# Hubb

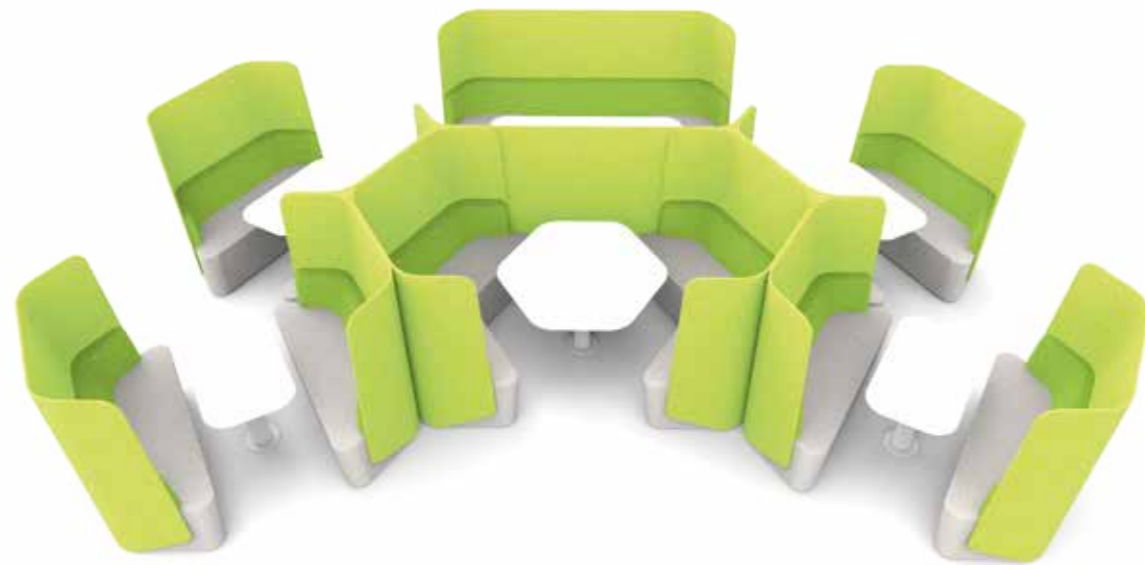

*Rock Galpin*<sup>TM</sup>  
Rock Galpin Studio

Based on an efficient in-line seating system this design uses a number of common parts to achieve economic and large scale compact and intimate seating areas suitable for meetings and private work. From an in-line arrangement to a nucleus configuration for even larger scale applications this system has huge flexibility to adapt.

Scaleable, suitable for small to large scale applications. The addition of an end panel makes booths completely private with a closed end.

## Options

- Compact, space saving
- Private
- Ideal for impromptu long stay meetings
- Modular system from 5 parts only + table
- Scaleable, suitable for small to large scale
- Welded fabric acoustic high back
- Laptop sockets
- Modular system
- Sofa option, removing back

# Us series

**Us series** is a comprehensive range of modular upholstered seating to suit any workspace. Available from low back to a fully enclosed booth. The **Us series** comes with a range of accessory stools and tables.

## Options

- Us Booth
- Us Wing
- Us Three tier
- Us Two tier
- Us Single tier
- 75mm or 100mm side panels
- Us Stools
- Convex or concave units
- Single or double units

## Meet

**Meet** is a modular soft seating sofa ideal for reception or breakout areas. Its wide variety of options will ensure that **Meet** will fit around you and the requirements of the space.

### Options

- High or low back
- With or without arms
- Chaise Longue

## Crystal

**Crystal** is a high back fully upholstered seating comprising varied modules to allow complete flexibility. Back height can be adapted to suit any specific requirements.

### Options

- Single or double seater

## Discreet

The **Discreet** is a high back seating unit, ideal for small breakout meetings in any area.

### Options

- Single or double straight sections
- 45° convex sections
- 45° concave sections

# Pearl

**Pearl** is a contemporary, fully upholstered soft seating range with a distinctive style. Complementary tables are available for reception or breakout areas.

## Options

- Single armchair
- Double seater sofa
- 3 seater sofa

# Sphene

Simple design lines of **Sphene** allow this range to blend with most environments. The robust and durable frame makes the range ideal for ever changing work places. Fully upholstered angular design with chrome feet.

## Options

- Single armchair
- Double seater sofa

# Carnelian

Classic contemporary design of **Carnelian** can complement any environment. Deep seat cushions offer ultimate comfort.

## Options

- Single armchair
- Double seater sofa
- 3 seater sofa
- With or without buttons

# Waltz

The **Waltz** fully upholstered chair comes with four chrome legs and a wide seat for enhanced comfort. Its unique design makes this chair ideal for receptions, breakout areas and executive offices.

A comprehensive range of tables are available at various price points to complement the seating range. This includes coffee tables, meeting room tables and tables suitable for reception and breakout areas.

## Options

- Single seater
- Double seater
- With or without arms

# Auditorium, lecture theatre & retractable seating

A comprehensive and complete range of retractable, auditorium and lecture theatre seating satisfying all spectator seating needs.

A fresh approach on venue seating allows for most requirements to be fully satisfied.

Flexibility is the DNA of this range and with experienced planning, can be designed to compliment any space.

Retractable seating brings flexibility, auditorium seating provides comfort and style and lecture theatre seating enhances learning spaces.

## Retractable seating

The stylish and practical **Auto-Q** retractable seating completely transforms a flat floor into an auditorium in minutes. All at the touch of a button.

**Auto-Q** is ideal for multi-functional spaces and uses a wheeled framework and automated control for simple and effective operation.

The tiered structure supports individual seats, flooring, steps and safety rails. When closed, the retractable seating stores compactly against the wall.

With a range of seating styles and finishes **Auto-Q** is ideal for educational environments, leisure centres, sports halls and conference centres.

## Auditorium seating

With comfort, flexibility and functionality the auditorium range provides a perfect solution.

Latest manufacturing techniques and materials provides reliability and durability.

Including the award winning Jump Seat with its innovative folding mechanism, it is a popular choice for constrained spaces. It can be floor mounted, fitted flush to a wall or specified with a movable base for complete flexibility.

Ideal for corridors, waiting rooms, libraries or any other public space.

# Lecture theatre seating

Available in either standard or bespoke solutions the lecture theatre range affords complete flexibility and maximises the use of any space.

With choices of seat style, colours and finishes it can be adapted to suit any environment.

Accessories include fixed writing ledges to the rear or fold away writing tablets.

The range can be supplied with tiered flooring to provide a complete solution.

# libraries

The modern library is a social hub, a place to meet and hang out, learn, research and explore. Without that social buzz, the library could become extinct. Colour is liberally used, as well as soft seating, high tech IT benches, coffee breakout areas, meeting rooms and children's areas.

## Latitude

The **Latitude** shelving system is a firm favourite with librarians and designers. With the ability to customise components and accessories to fit the clients' needs precisely, this system is cost effective and will bring a touch of finesse to both traditional and contemporary interiors. This stylish and versatile but affordable shelving system can be designed with maximum flexibility.

Wooden end panels are available in beech, oak, maple and ash as standard. Other wood finishes are available on request.

Wow end panels are available in beech, oak, maple, and ash. They also come in all epoxy powder coated standard shelving colours.

The **Latitude** shelving system can be tailored to match either modern or traditional interiors, and comes with a range of accessories.

## Calypso

The **Calypso** shelving range is a hugely versatile system that provides the perfect blend of style and functionality. High quality manufacturing processes and materials ensure that the **Calypso** system is a competitively priced premium product.

**Calypso** shelves can be easily adjusted if display needs change. The option of a 3-way positioning system allows the flexibility of choosing from three different display angles. Available with either open tops or canopies.

Matching paperback spinners complement the shelving and provide high volume display. A wide variety of colour options are also available.

## Mirage

**Mirage** is a brand new shelving system that offers cost-effective, simple and stylish library shelving. In its minimalist look and feel it has a modern edge to it while it sits comfortably both in modern and classical style library environments. This shelving system is ideally suited where budgets need to be managed to the maximum.

The **Mirage** shelving system looks light and elegant while it is structurally very strong. The system is fully adjustable and provides the option for spine or face on display of books or other media.

The **Mirage** shelving comes with sleek end support panels which are made of 25mm MFC. The end panels are available in beech, maple and white as standard. The metal shelves are supplied in white or light grey paint, and are epoxy polyester powder coated steel.

This shelving system is highly user-friendly. The shelves are supported by easily removable brackets ensuring quick reconfiguration as required. Shelves can be either flat or reclined backwards for improved display at lower levels. The same shelves and brackets can be used as display shelves providing greater flexibility.

Available in both single and double-sided versions, and in a choice of various heights.

## Reflection

**Reflection** is a traditional cantilever shelving design proven to be cost-effective and robust across thousands of libraries.

Fully compatible with the original Reska shelving, **Reflection** is an extremely versatile shelving system ideal for both academic and public libraries.

# Freedom

Effective library displays are an essential ingredient in today's engaging library environments.

The **Freedom** range is an innovative, design-led range of high quality, durable library display units.

A range of high impact colourful library display products are designed to meet the challenges of demanding library environments, enhancing any library interior.

The range includes display furniture which is suitable for adult library spaces, teenage areas and children's areas within library environment. Wall mounted library displays are also featured in the **Freedom** range.

The selection of library display units have been designed specifically with young adults in mind and are ideal for non-standard format items such as graphic novels and manga.

# Graphics, signage & display

The right graphics, signage and displays help to enhance any library.

Creating either themed areas or functional information graphics and signs offers the perfect finishing touch.

# technology

Frem Group's technology sector is an innovative provider of integrated technology solutions for schools, libraries and workspaces of every kind. Solutions include remote controls and desktop sensors that optimise energy use and simplify the integration of today's ever-present technology. Our breadth and depth of project experience within the office furniture, education and library sectors ensures comprehensive assistance in both large and small projects.

# Desk Integrated Technology

## Did you know?

- In an air-conditioned environment, lighting accounts for 20-25% of electricity use, IT and small power accounts for 25-40% and heating/air-conditioning 40-50%
- UK Government Energy Savings Opportunity Scheme (ESOS) applies to all organisations with over 250 people
- FG Technology can deliver up to 2000 kWh savings per PC per year
- Potential Return on Investment (ROI) of less than 1 year

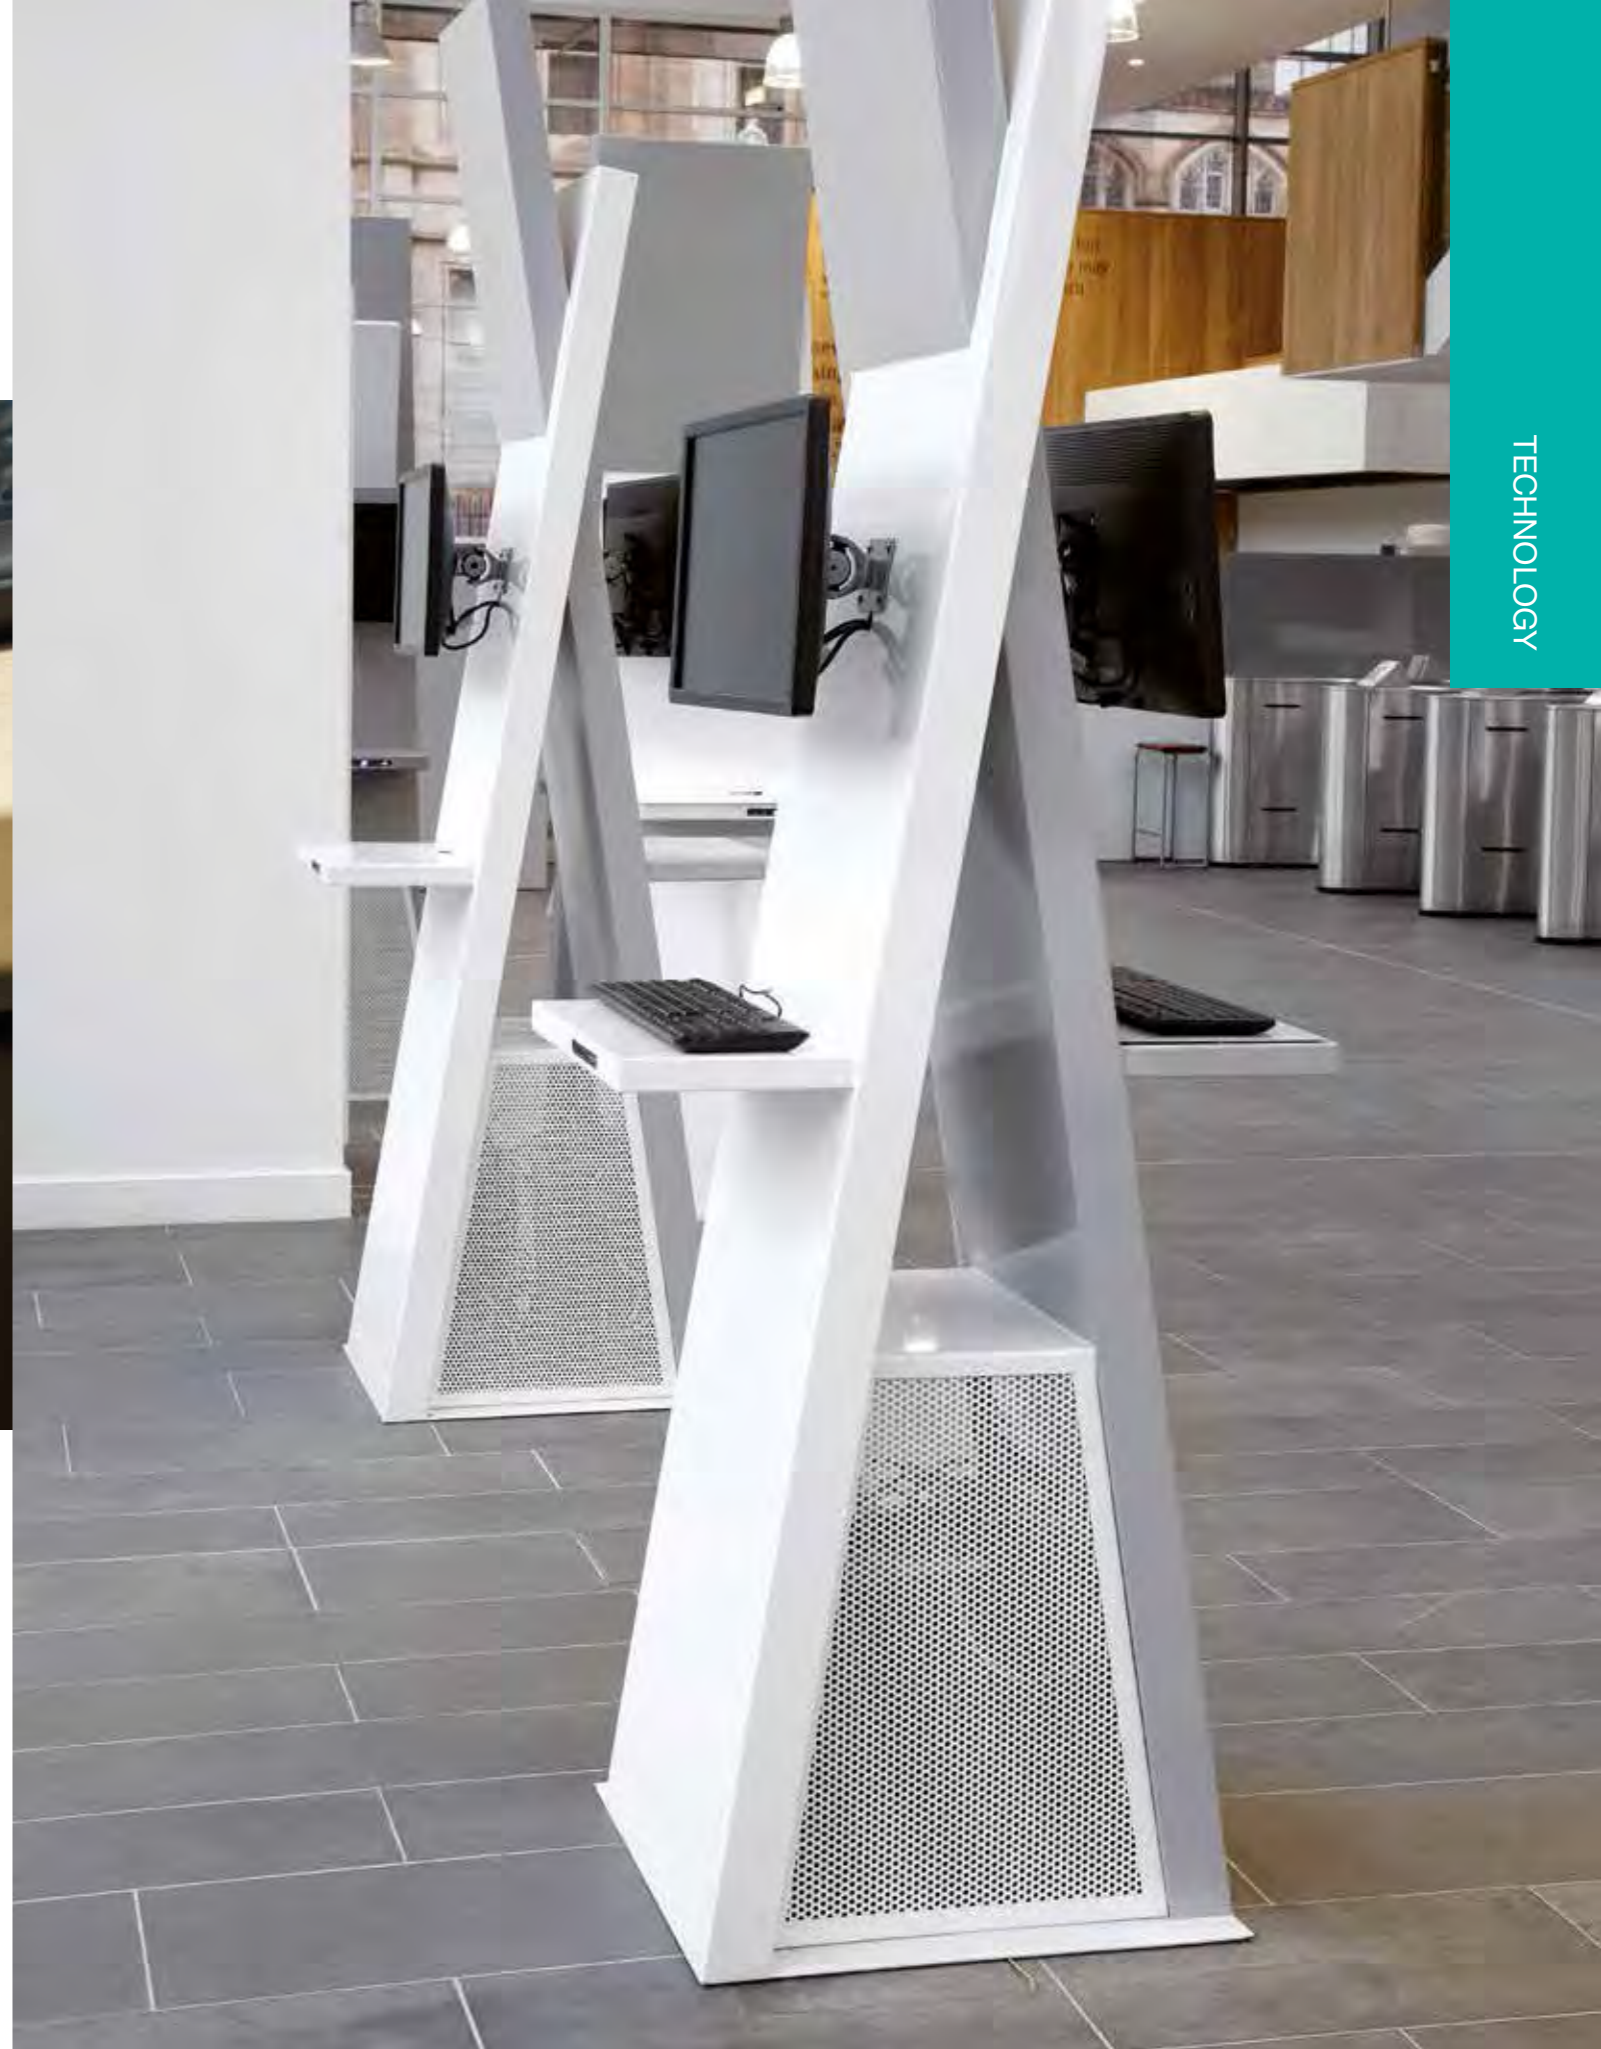

A patented unit which allows for remote control of a PC. This unique solution improves office aesthetics, maximises space and security as well as reduces energy consumption.

The unit sits within the desks work surface and duplicates the key PC controls at the user's fingertips. This means any industry-standard PC can be hidden up to 20 metres away from the desk whilst retaining full functionality.

The Remote Control works with all standard PCs and does not affect the manufacturer's warranty, only requiring a PCI card to be inserted in the PC. The Remote Control is simple plug and play technology. PC and Remote Control are connected by data cable (via the PCI card), needs no software installing and does not affect the running of the PC.

## Benefits include:

- Clean, aesthetic lines with no clutter or visible cables
- Space saving
- Difficult to damage or steal
- Fully and easily upgradable
- Safe and ergonomic
- Versatile and silent IT
- Green – save up to 1 tonne of carbon per PC, per year

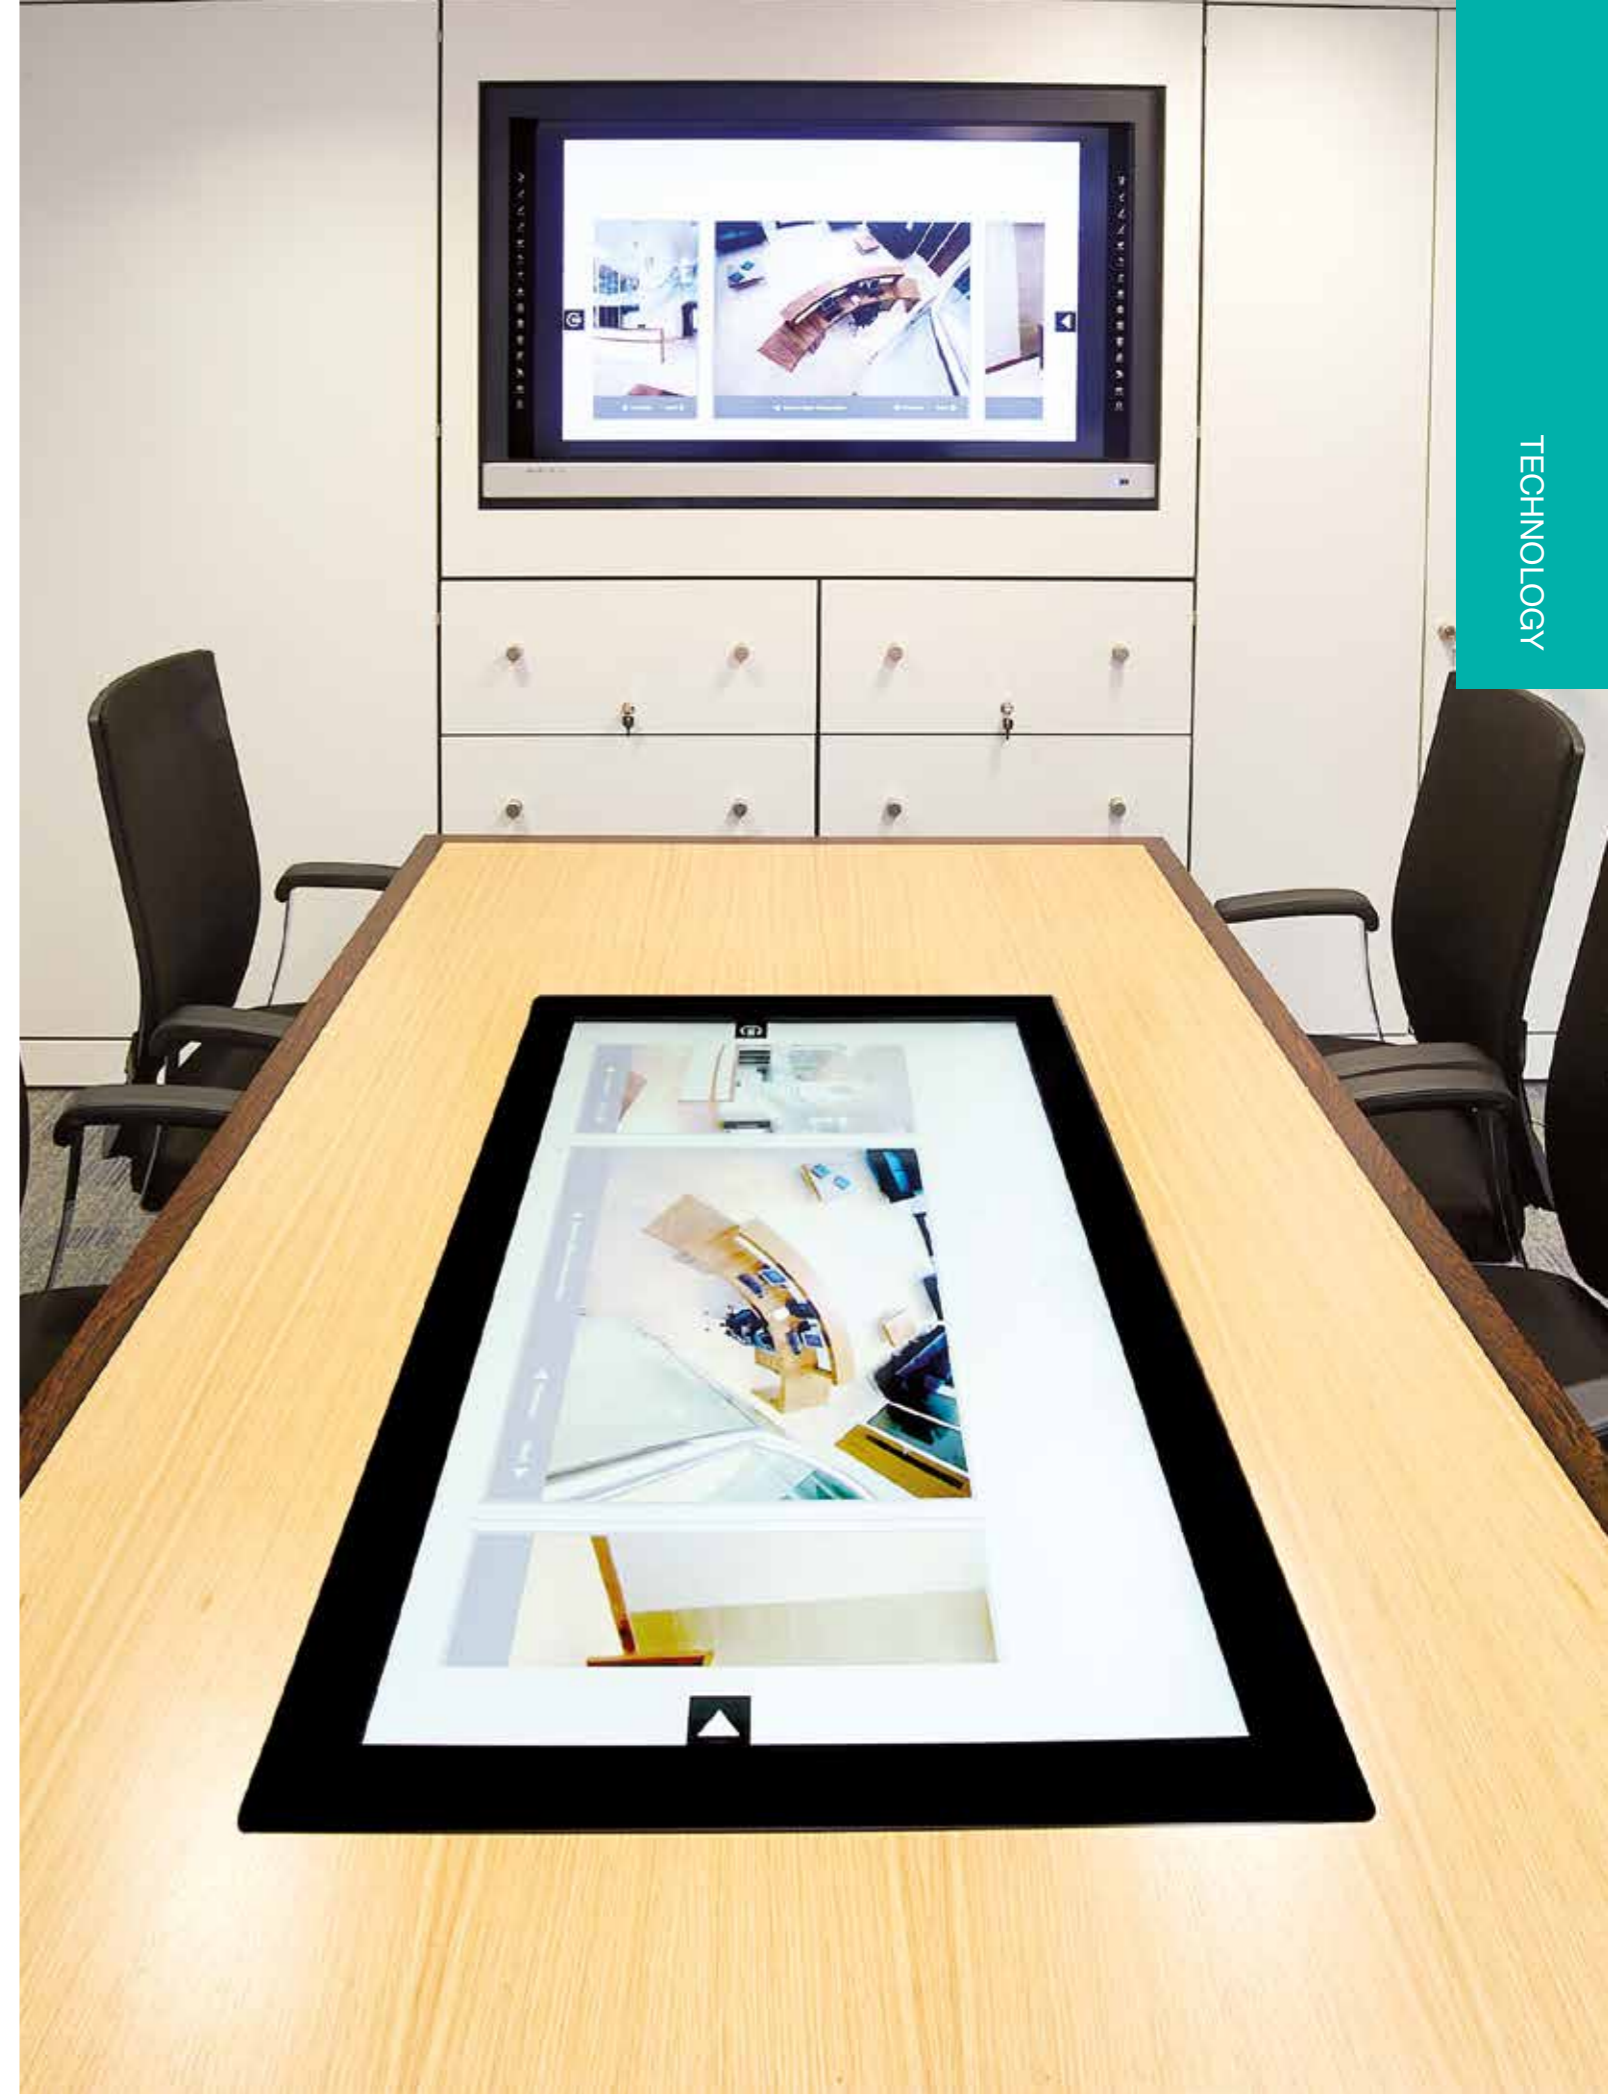

## Multi-touch

Utilising the latest technology, **Multi-touch** provides the ultimate wow factor for the product user experience! A great tool for educational institutions, collaborative working, retail outlets and property companies.

A product designed to provide an interactive platform that will drive economies of scale controlled from a single content management system. Choose from any interactive packages, which may differ for each site, and update the site from a dashboard content management interface.

## Intelligent workspace

The **Multi-touch** screen can be easily located in any of the tables shown in this brochure including **Edge** as shown below. A modern solution for communal discussion, informal gatherings or meetings where technology collaboration is imperative. The ability to pull up and share data from the web or from personal data sources, for shared input and output, makes this refectory style solution ideal.

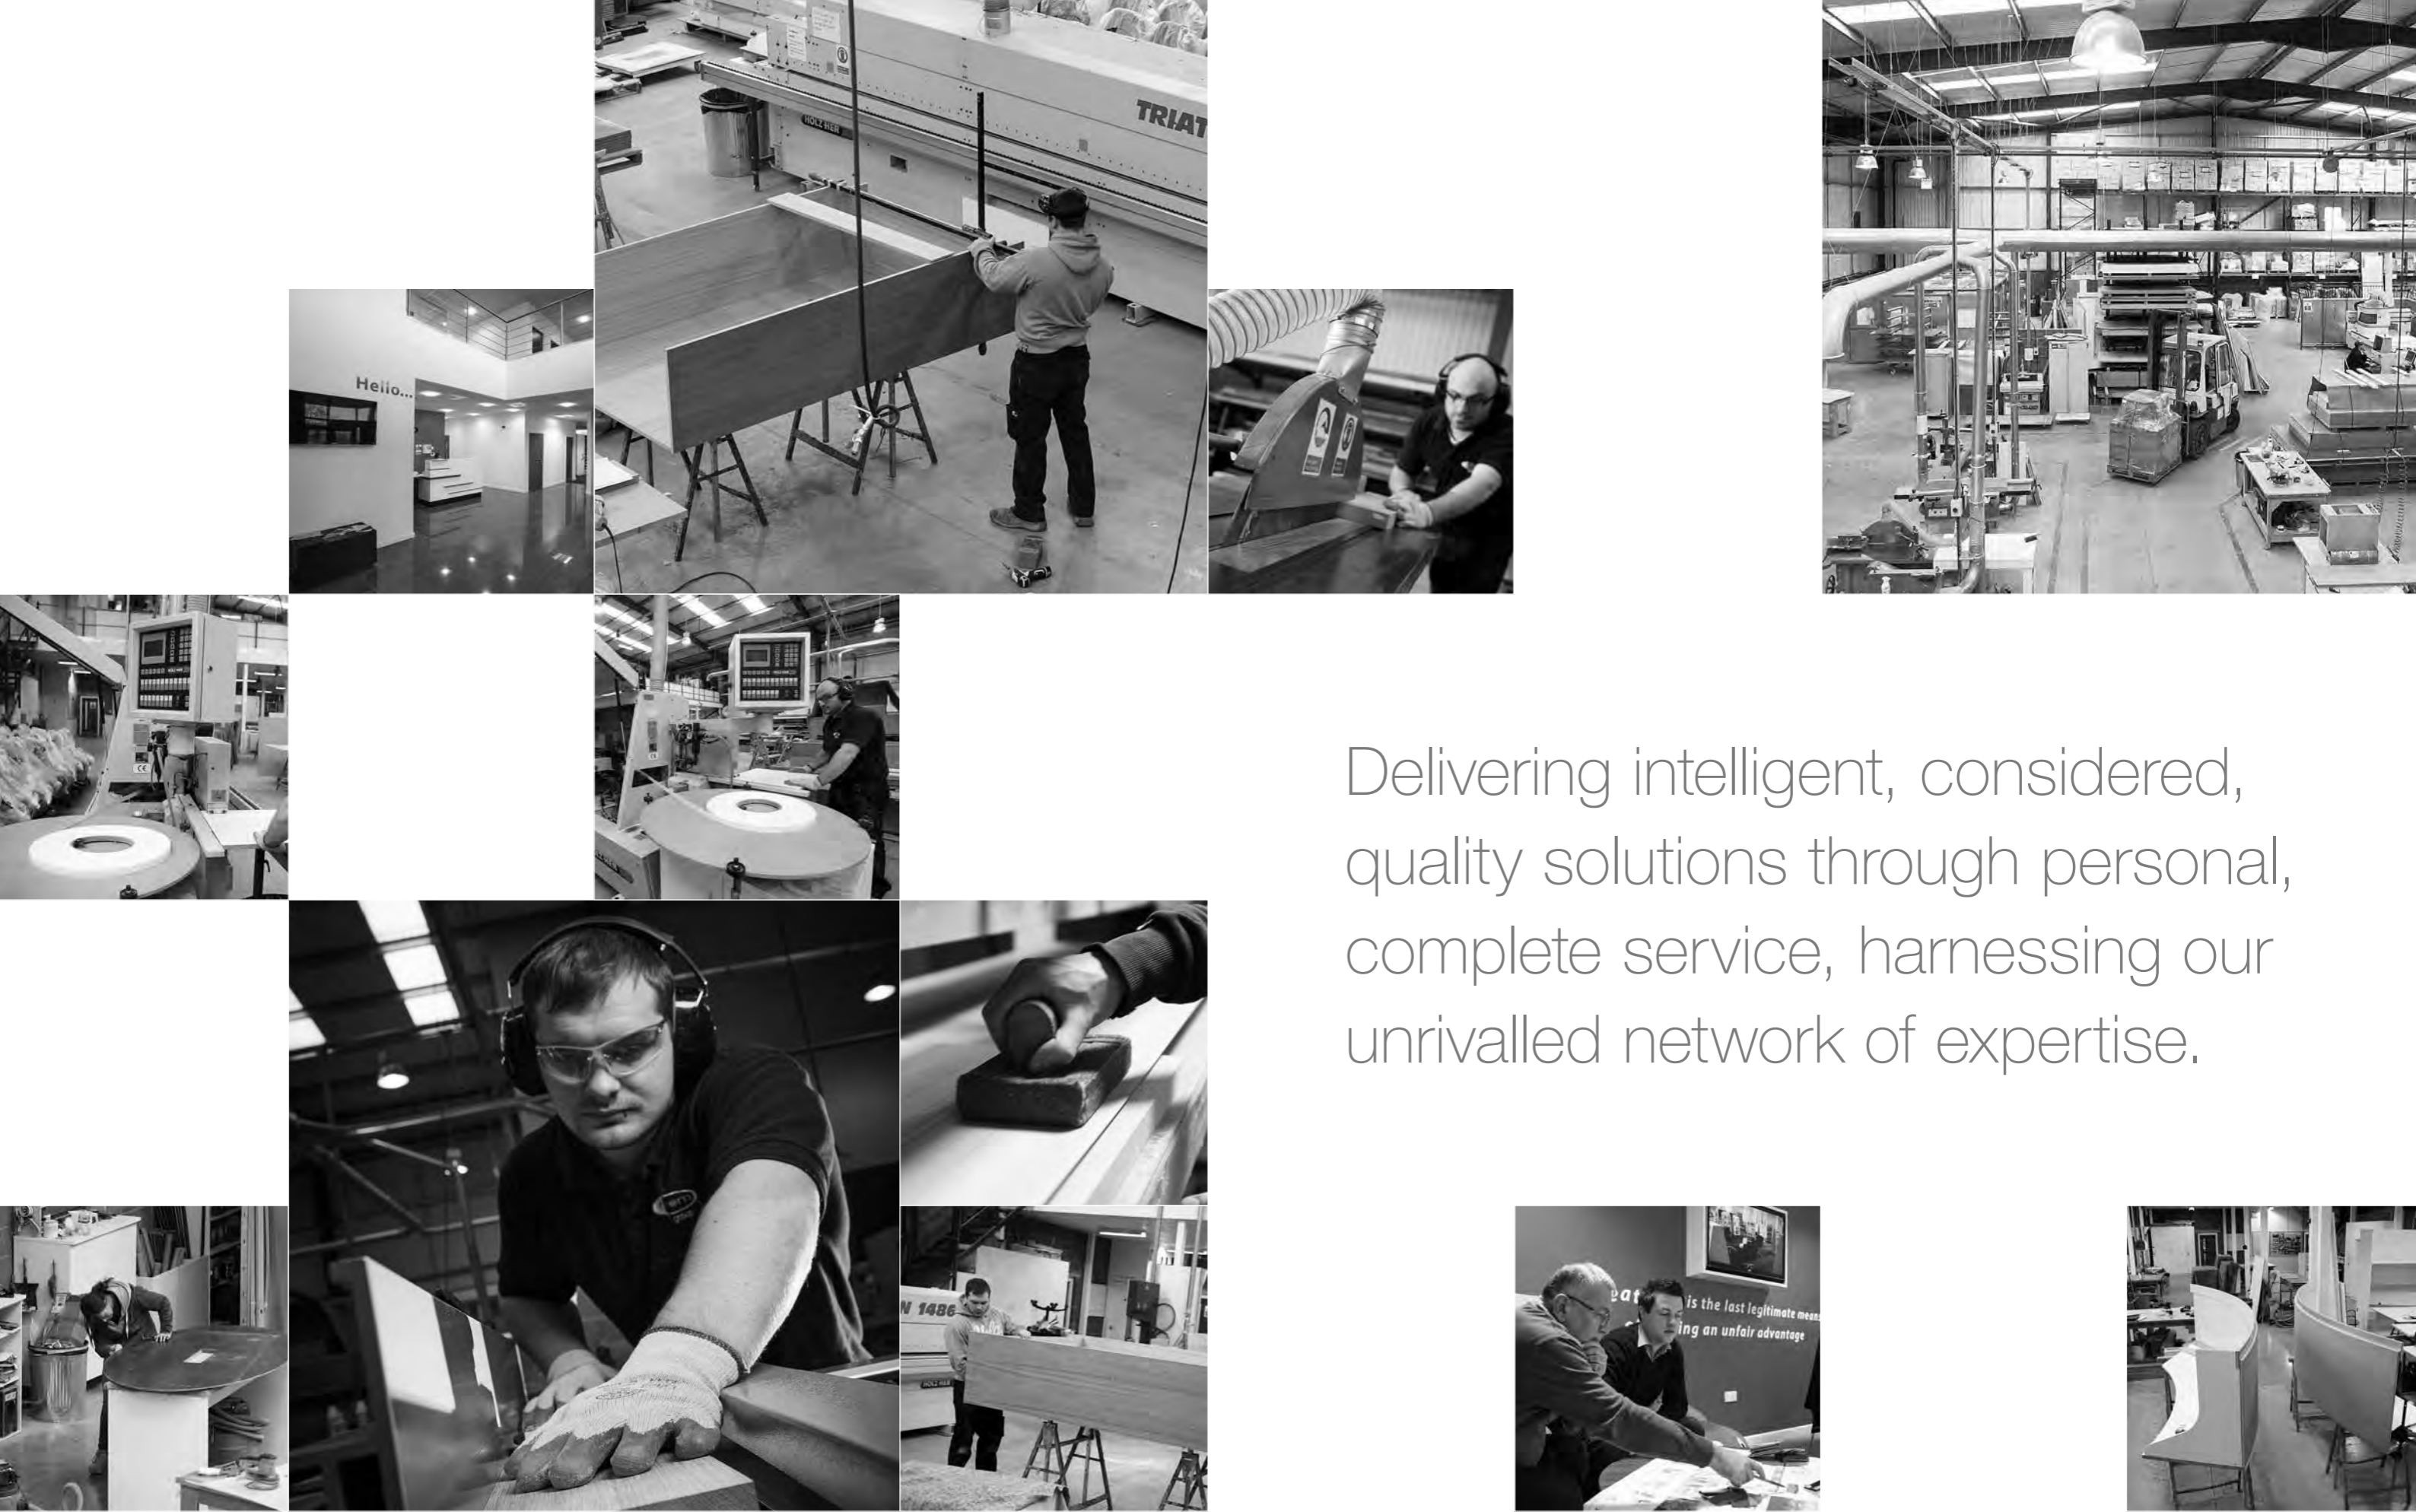

What sets this product apart from alternative options is the vast choice of finishes and edge details. In addition, this solution offers a valuable combination of strength with light-weight quality. This makes the product ideal for educational institutions where durability and practicality are key. The appeal is further broadened by offering bespoke material options alongside the standard range.

## Intelligent seating

A world first from Frem Group, as we introduce ground breaking technology to integrate into your office seating. Linked to an app on a phone, our latest technology allows recognition of the user of the chair, details of occupation time and even customise the desk and the screen colours to the user! A product that takes our office furniture technology integration on to a whole new level.

Delivering intelligent, considered, quality solutions through personal, complete service, harnessing our unrivalled network of expertise.
