## B&B LOCKS - D2 series

# B&B LOCKS - D2 Series

- **ROBUST**
- **RELIABLE**
- **DURABLE**

Technical characteristics:

- Mechanical security lock with 2 self-locking bolts
- The bolts are ejected and deadlocked automatically as soon as the door closes
- always secured on 2 locking points (bolt throw 20mm)
- Both L and R - symmetrical bolts for both bumper doors and revolving doors
- unlocking by 17mm europrofile cylinder
- integrated signalisation of the bolt position (unlocked / locked)
- locking components, housing and striker plate in stainless steel
- side load resistance of 40.000 N
- backset 36mm
- security escutcheon SE-17 available (optional)

B&B LOCKS is specialized in the development and and assembly of locks for security doors, which need a robust, reliable and durable locking solution (because of security reasons, intensive use, high risk of vandalism, ...). The quality of the products, short delivery delays and excellent service (before and after sale) are important strengths of B&B LOCKS.
