

Sentry RF Transmitters and Receivers

Code Hopping

High Security Code Hopping factory coded

Over 260 million combinations, 66 bit

1,3 & 4 channel transmitters and 1 & 3 channel receivers

Up to eight transmitters can be used with each receiver.

Some of the obvious benefits of using Sentry remotes are:

- Total convenience
- Quality and reliability
- Eliminating the need for excessive wiring - keeping installation and maintenance costs down
- Fob transmitters
- Easy to program (enter and delete users)
- The ease of opening and closing doors, raising and lowering barriers and shutters
- Calling attention in a panic situation
- Activating various types of alarms
- Used as an accessory with many different electrical products both in industry and in the home
- Always having the switch in your hand, pocket or around your neck

Transmitters

- 1, 3 & 4 channel
- Key fob type
- Factory coded
- Cased in high quality ABS / PVC
- 433.92 MHz
- Surface mounted technology
- SAW resonator stabilised
- Power by ready available internal 12v batteries;
- Output power +1- 0,25mW.
- Stability + 1- 50 KHz.
- Size- 65mm x 32mm x 14mm.
- Range up to 100 mtrs (dependent)

Receivers

- 1 & 3 channel
- 433.92 MHz
- Surface mounted technology
- SAW resonator stabilised
- Latch/pulse selectable relay output
- Time delay option
- Normally opened/normally closed relay output
- External power 12 to 24v required
- Sensitivity 11 OdBm +
- Potential free relay outputs
- 3 Amp maximum
- UHF
