

Profile 358 Secure Series

Description

The 358 Secure Series has been specifically developed for the more challenging security environments, designed to give the highest level of security combined with unrivalled see through qualities making it an excellent choice for use with camera surveillance and yet this product does not have a negative impact on its surroundings in fact quite the reverse the product blends in to the background relatively unnoticed. Profile 358 offers the perfect security solution; the longest cut through delay time and almost unclimbable makes this product a formidable deterrent... exactly the qualities specified the world over to create secure and safe environments.

Benefits

- **Rigidity** – Heavy welded flat mesh panels guarantee a very high level of rigidity.
- **Security** – Mesh apertures of 12.7 x 76.2 combine to create a barrier which has the longest cut through time and makes the fence almost impossible to climb yet gives excellent visibility for camera surveillance.
- **Fully Compatible** – With detection and alarm systems
- **Vandal Resistant** – Finger-proof apertures combined with 4mm diameter wires deters even the most determined intruders.

Range

Fence Height	Panel Height / Width		“V” Beams	Fixings / Post	Post Centres
2.0m	2.134	2.515		6	2.44
2.4m	2.438	2.515		7	2.44
3.0m	3.134	2.515		8	2.44
4.0m	4.134	2.515		11	2.44

- **Complete System** – The system consists of a full range of panel heights complete with Posts and Security Fixings. In addition to the fencing we offer a full range of swing and sliding gates to complete the Security solution.
- **Appearance** – Excellent visibility making the fence a perfect partner to the use of cameras. Aesthetically pleasing and does not impose itself visually on its surroundings.
- **Life Time** – The life of a security fence will depend upon the quality of finish; Profile 358 Secure offers the very best quality finish in the market. Starting with Pre galvanised material which is subjected to a rigorous cleaning process prior to the application of an architectural grade polyester resin powder coating.
- **Fast and Cost Effective Installation** – The profile 358 Series has been designed for rapid installation with factory fitted threaded Inserts to all Posts for Security Fixing Brackets and Posts set at 2.44m centres ensures that on site time and disruption is kept to a minimum.

Applications

Profile 358 Secure Series is highly recommended for Schools, Public Buildings, Hospitals, Police Stations, Military Sites, Power Plants, Oil Refineries, Rail, Secure areas, Factories, Car parks, Business and Retail Parks.

Panels

All Panels have a width of 2515mm ranging from 1000 to 6000mm in height. The panels are flush at the Top and Bottom. Mesh apertures are 12.7 x 76.2mm, manufactured from 4.0mm pre galvanised wire to BS EN 10244-2:2009 class D and polyester resin powder coated to give a minimum 10 year life. OR in Galfan which is a heavy galvanised process which requires no further treatment.

Posts

Generally specified to suit the application, generally the system is erected by overlapping panels and secured with a clamp bar to bolt through posts. Post sections are supplied to clients requirements or subject to calculations for wind and personnel loading. Posts are set at 2.44 centres.

Fixings

Clamp bars.

Gates

A complete range of High Security Swing Gates and Sliding Gates are available to suit all requirements.
