

A60-S

Extraordinary shapes

The organic-looking A60 luminaires are shaped like pebbles on a sea-shore. They are in three different sizes. All three sizes have different shapes and proportions. The acrylic shade has a high gloss finish in black or white. Underneath there is a cover plate in a choice of colours, creating contrasts that are both elegant and fun.

The luminaires are shaped in vacuum-formed synthetic materials, and designed for social areas in public and private buildings. They can be mounted singly, or grouped together in clusters of luminaires of varying size and form to create creative and decorative expressions. The powder-coated steel plates are available in a choice of standard colours. Steel colour plates must be ordered separately. Against a supplement in price the steel plates can be supplied in any RAL-range colour.

The A60 are available for pendant (A60-P) or surface (A60-S) mounting in three different sizes

A60-S620: Diameter 620mm, height 147mm

A60-S820: Diameter 820mm, height 176mm

A60-S1000: Diameter 1000mm, height 209mm
