

gtEco-Dek Aluminium Grille

Introduction:

Manufactured from aluminium, the new gtEco-Dek from Green-tech is an open grille system allowing essential water, air and nutrients to pass through to the tree's roots.

The gtEco-Dek grille boasts a non-slip, ribbed finish, is lightweight for ease of installation and is fully recyclable. Virtually maintenance free, once installed the aluminium will generate a protective oxide film coating over time, providing additional corrosion resistance.

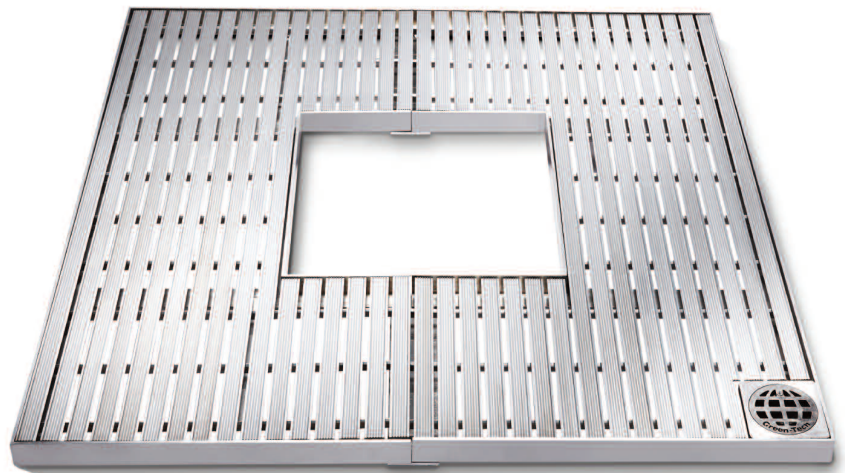

Features:

- Lightweight
- Environmentally Friendly
- Robust and structurally sound
- Available with a powder coated finish

Size:

Bespoke measurements to suit individual landscape designs.

Please consult a member of the team.

Material:

Aluminium Grade 6082
