

Product overview

Designed for the protection of pavements and hard landscaped areas, the ribbed RootDirector system prevents root swirl and diverts root growth downward and outward thus avoiding the unsightly and hazardous root damage so commonly seen in urban areas.

The RootDirector's rigid, one-piece construction makes installation simple. As a product within the 'Arborsystem' range, it is compatible with the RootRain irrigation system, RootCell / StrataCell load bearing soil soil structure and our extensive tree grille and guard range. The RootDirector 'RS' range is specifically designed to locate securely into the RootSpace soil cell system.

Features

Integral ribbed construction which prevents root swirl

Protection for paved surrounds

Benefits

Encourages deep root growth

Improved drought tolerance

Great enhanced tree stability

Simple to install

100% recycled material

NBS Specification

Available on the NBS website

Technical Specification

Material
Recycled HDPE

Finish
Natural

Colour
Black
