

# RootRain Linear Drain

For hard surface drainage

## Overview

The RootRain Linear Drain is a versatile stormwater management solution designed for permanent installation in hardscape surfaces. Allowing stormwater runoff to be directed from sidewalk or street wherever desired, to any underground system, including into SuDS tree pit areas for irrigation. A fully customizable product, the Linear Drain perfectly compliments GBU's full range of below and above ground tree planting solutions.

## Features

- Customisable steel construction
- Inlet top available in numerous finishes
- Compatible with any hardscape surface

## Benefits

- Can provide irrigation and aeration to tree pits
- Deals effectively with stormwater runoff
- Heal safe option available

## Technical Specification

Code	Width	Length	Depth	Outlet dia
GBULD-100	50 - 150mm	600mm - 3mtr	50 - 100mm	60-80mm

Part	Material	Finish	Colour
Body	Mild steel	Galvanised	Natural
Lid options:			
	Weathering steel	Natural uncoated	Natural
	Mild steel	Powder coated	(Specify colour)
	Mild steel	Galvanised	Natural
	Stainless steel	Pickled & passivated	Natural

## Optional features

### Lid:

- Heal safe
- ADA Compliant

### General:

- Concrete anchor straps
- Debris filter
- Silt trap

## Storage

- Not applicable

## Maintenance

- Jet-wash annually
