

Easy as 1, 2, 3

Fixing Advice for SmartBoard Composite Decking System

- 1 Fit over joists placed at 400mm centres
- 2 Maintain a 5mm gap between ends and sides of adjacent boards
- 3 Face fix using SmartBoard colour coordinated screws.

5mm gap between adjacent boards Face fix using two 63mm SmartBoard Composite Decking Screws per joist Fit boards over supporting joists at 400mm centres

5mm gap between ends of adjacent boards or fascias

Also great for fascias (again fix using two 63mm SmartBoard Composite Decking screws every 400mm)

What to Expect

SmartBoard contains wood fibres that are susceptible to differences in colour and appearance. It is normal to experience some colour variation between boards upon fitting them.

SmartBoard will weather to a lighter shade and the colour of boards will become more consistent with time. It is normal for the striped look of the ribbed face to become less evident with time.

SmartBoard may become marked if scuffed during fitting or in use. Marks caused by scuffing are normal and will gradually fade with time.

It is normal for tide mark type water staining to appear on new SmartBoard decking after the first few bouts of heavy rain. The appearance of tide marks will diminish and become less apparent with time as the washing effect of rain diminishes and the weathering effect of ultra-violet light takes place.

Do not use any other type of screw or fixing to fit SmartBoard decking.

The future of composite decking

- / Easy to fit
- / Low Maintenance
- / Matt Finish
- / Brushed Feel
- / 90% Recycled

SmartBoard Wood Plastic Composite Decking

SmartBoard is a reversible decking with an appealing, tactile brushed matt finish creating a more natural surface than most composite alternatives.

SmartBoard available in 3 colours

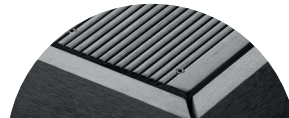

Size: 20mm x 138mm x 3600mm

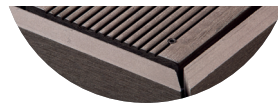

SmartBoard is the future of composite decking as it combines the benefits of wood plastic composite technology disguised to look like timber decking.

The solid structure and special formulation of SmartBoard means it can be face fixed with colour coded screws to retain that classic look more generally associated with timber decks. Manufactured from waste wood residue combined with recycled hard plastic such as shampoo bottles also makes it environmentally friendly.

SmartBoard comes with a 25 year residential warranty providing the reassurance that it will outlast most varieties of timber decking.

Also good for fascias

Smooth or ribbed look, with a low risk of slip surface*

SmartBoard colour coordinated decking screws

Work smart, use SmartBoard screws for a smart finish

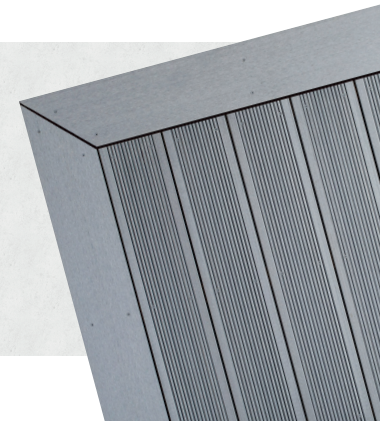

- / DOESN'T LOOK OR FEEL PLASTIC
- / COLOUR WILL LAST YEAR AFTER YEAR (see over)
- / LONG LASTING
- / LOW MAINTENANCE
- / EASY TO CLEAN
- / WON'T SPLIT OR ROT
- / ECO-FRIENDLY, 90% RECYCLED
- / SUPER SIMPLE TO FIT!

TOP TIP

Add a unique look by framing your SmartBoard deck as shown.

*Mean wet pendulum test value 54 (slider #55/TRL) where values of 36 or greater are classified as presenting a 'low risk of slip' by the UK regulator the H.S.E.
