### About FastCover Flooring™

FastCover flooring™ tiles are suitable for a wide range of uses including; Marquee Flooring, Temporary Playgrounds, Construction Site Walkways, Factory and Warehouse Flooring, Equestrian Flooring, Livestock Flooring and much more!

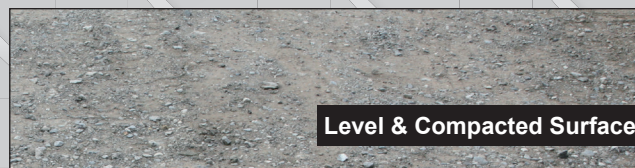

Made from 100% recycled PVC, they provide a strong, durable anti-slip surface at an economical price. Tiles have integral interlocking lips to enable smooth joins without trip hazards. Edging ramps provide a gentle transition to ground level.

#### Installation guide

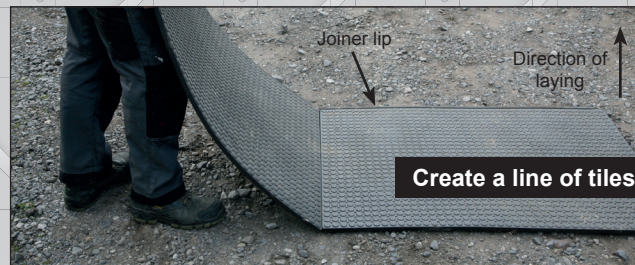

##### Step 1.

Ensure the base on which the tiles are to be laid is level and compacted to the correct standard.

**Level & Compacted Surface**

##### Step 2.

Lay a line of FastCover Flooring™ tiles along the starting line, with the joiner lips at the leading edge

**Create a line of tiles**

##### Step 3.

Start laying in the right hand corner of the proposed area, placing the next tiles over the joining lips.

**Add the next row of tiles**

##### Step 4.

Lay the tiles, working forwards in lines. Joints may be half overlapped for extra durability.

**Continue installing**

##### Step 5.

Complete the area by adding edge ramps to ensure there are no trip hazards.

**Add the ramp edges**

#### Ground-Guards - TOP TIP!

To get the best results and performance from our FastCover Flooring™ ground protection mats, ensure that the ground is compacted and level before beginning the installation process.
