

GUTTERLINE FLYING HIGH AT CUMBRIAN POULTRY UNIT

Food production units are fast-paced and subject to strict environmental control. So when a major poultry company needed the guttering at their main production unit in Cumbria re-lining, they wanted a robust product that could be installed quickly and easily.

Head of maintenance at the unit, had seen HD Sharman's Plygene Gutterline® system featured in trade magazines but it was a personal recommendation received by one of the company's directors that secured the contract for HD Sharman. He explains the project's importance:

"THE BUILDING IS PRETTY VAST WITH SOME PIECES OF GUTTERING MEASURING IN EXCESS OF 300 FT. NOT ONLY THAT, THE UNIT IS PRODUCTION-CRITICAL SO WE COULDN'T AFFORD ANY DISRUPTION TO ITS OPERATION."

Gutterline was the only product up to the job.

Pliable and extremely hard-wearing this "gutter within a gutter" solution is easy to install, works with the existing system and doesn't require any structural work. It offers a permanent solution and because it's made to measure for every job it provides a perfect waterproof fit - avoiding additional work and expense down the line.

Going the distance

The customer couldn't have been happier with the product and the service he received from HD Sharman:

"FOLLOWING THE INITIAL CALL, THEY SENT THEIR TEAM 120 MILES TO MEET US, LOOK AT THE JOB AND TAKE US THROUGH THE PROCESS STEP BY STEP. THEY GAVE US LOTS OF USEFUL TECHNICAL AND PRACTICAL

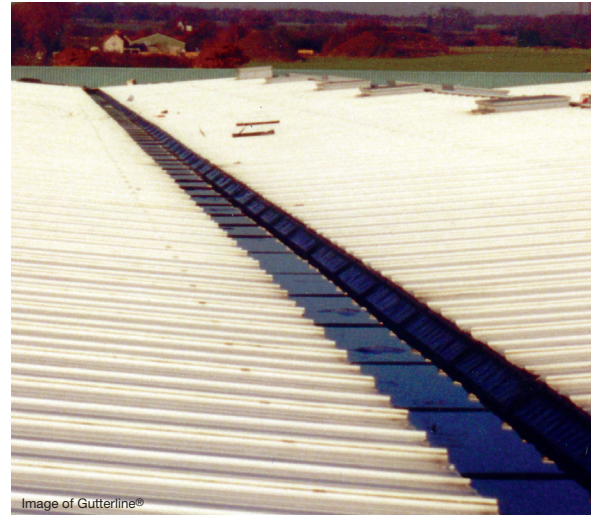

Image of Gutterline®

ADVICE SO THAT WHEN IT CAME TO THE INSTALLATION I WAS COMPLETELY CONFIDENT ABOUT WHAT WAS NEEDED – THEY MADE EVERYTHING REALLY STRAIGHTFORWARD."

By far the greatest benefit was the fact that the company could get on with running their poultry business while the work was undertaken and although this was the first time they had used the Gutterline product, they've been happy to recommend it.

Plygene Gutterline® is versatile enough to be used on any residential, commercial or agricultural building, with any type existing gutter - including valley, perimeter and boundary.

HD Sharman also has a long history of developing cost-effective products specifically for rural and farming communities including the **Plygene Silage Pit Liner** and **Plygene Strip Curtain**.
