

In response to serious flooding in 2005 the Environment Agency commissioned a flood alleviation scheme to ensure that residents would not have to suffer for a second time. To ensure the integrity of the steelwork and long lasting colour they selected Colourgalv as a sustainable and affordable coating.

Colourgalv can be guaranteed for up to 25 years and is virtually maintenance free. Highland are the only company in Scotland who are Akzo Nobel Approved Applicators for powder coating onto galvanized substrates.
