

decking: Spiced Rum

Trex Transcend® DECKING

VISIT THE TROPICS by way of your yard

Our two premium tropical shades bring the none-too-subtle striping and rare allure of the Brazilian rainforest directly to your backyard getaway. Like real tropical hardwood, these hues feature a pronounced range of colors and streaking that varies from board to board. Our Lava Rock features a more subtle range of color; with Spiced Rum, the variety is more pronounced.

INSTALLATION TIPS

Capturing that exotic beauty when installing a Trex Transcend deck in tropical colors is as easy as mixing and matching.

To start your deck design, mix and match all tropical boards on the jobsite.

Start lining them up, putting dark against light, as a practice run to help visualize the final look. You'll see that the variety of color board by board develops its own rich, random pattern full of lights and darks.

Continue mixing and matching boards to ensure an appealing mix of light and dark tones across the entire deck.
