

element DISC™

“The industry called for a future-forward light. We saw an opportunity to marry high-performance LED lighting with ultimate simplicity.”

Kelly Ann Rockwell Design Engineer

From its chic, futuristic looks to its next-generation technology, Element Disc is ahead of its time and ahead of its class. Utilising innovative Thin Film LED Technology™, Disc offers seven levels of dimmability with just an effortless “pinch” of the light head. And taking advanced LED technology to a new level of sustainability, Disc features an occupancy sensor that turns the unit on or off when the user enters or leaves the area. When not in use, Disc folds into a compact nesting position, with the form of the lamp head gracefully echoing that of the base.

Features

- Revolutionary Thin Film LED Technology produces an ultra-wide footprint of glare-free light
- PIR occupancy sensor automatically turns the unit off when not in use, and back on when the user returns
- Dimmer switch provides seven adjustable illumination levels for energy efficiency and ergonomic function
- Unique design maximises light output and increases the light's usable life
- Smart dimming memory saves the last selected lighting level, even after the light has been shut off
- Even plane of illumination casts just one shadow
- Perfect internal counterbalance provides effortless, one-touch positioning
- Slender, futuristic form folds into a compact nesting position
- Replaceable head assembly allows for in-field repairs
- Universal power supply and interchangeable plug options accommodate global power outlets
- Sustainable design can contribute to the achievement of valuable LEED credits

Specifications

- Lumen output: 330 lumens
- Power consumption: 7 watts
- Colour temperature: 3000K
- Colour rendering index: 80
- Lifespan: Up to 50,000 hours
- ETL/cETL certified and CE pending
- RoHS/WEEE compliant
- Maximum reach: 710mm (28\"/>

Photometric Performance: Values Based on 610mm (24") Mounting Height
