## Stûv Stories

Welcome to the world of Stûv! Our products provide ways to layout and rearrange your interior. The story that they tell is straightforward and warm, simple and efficient. A story where appearance is functional and where objects blend into the architecture. Quality and perfection are the watchwords at Stûv. To improve is to simplify. This means humanising design. It also means constant innovation until a perfect harmony is found between pleasure and respect for the environment. Stûv is a state of mind.

Stûv Stories +Stûv 21

Stûv, the creator  
of the retractable  
glass door

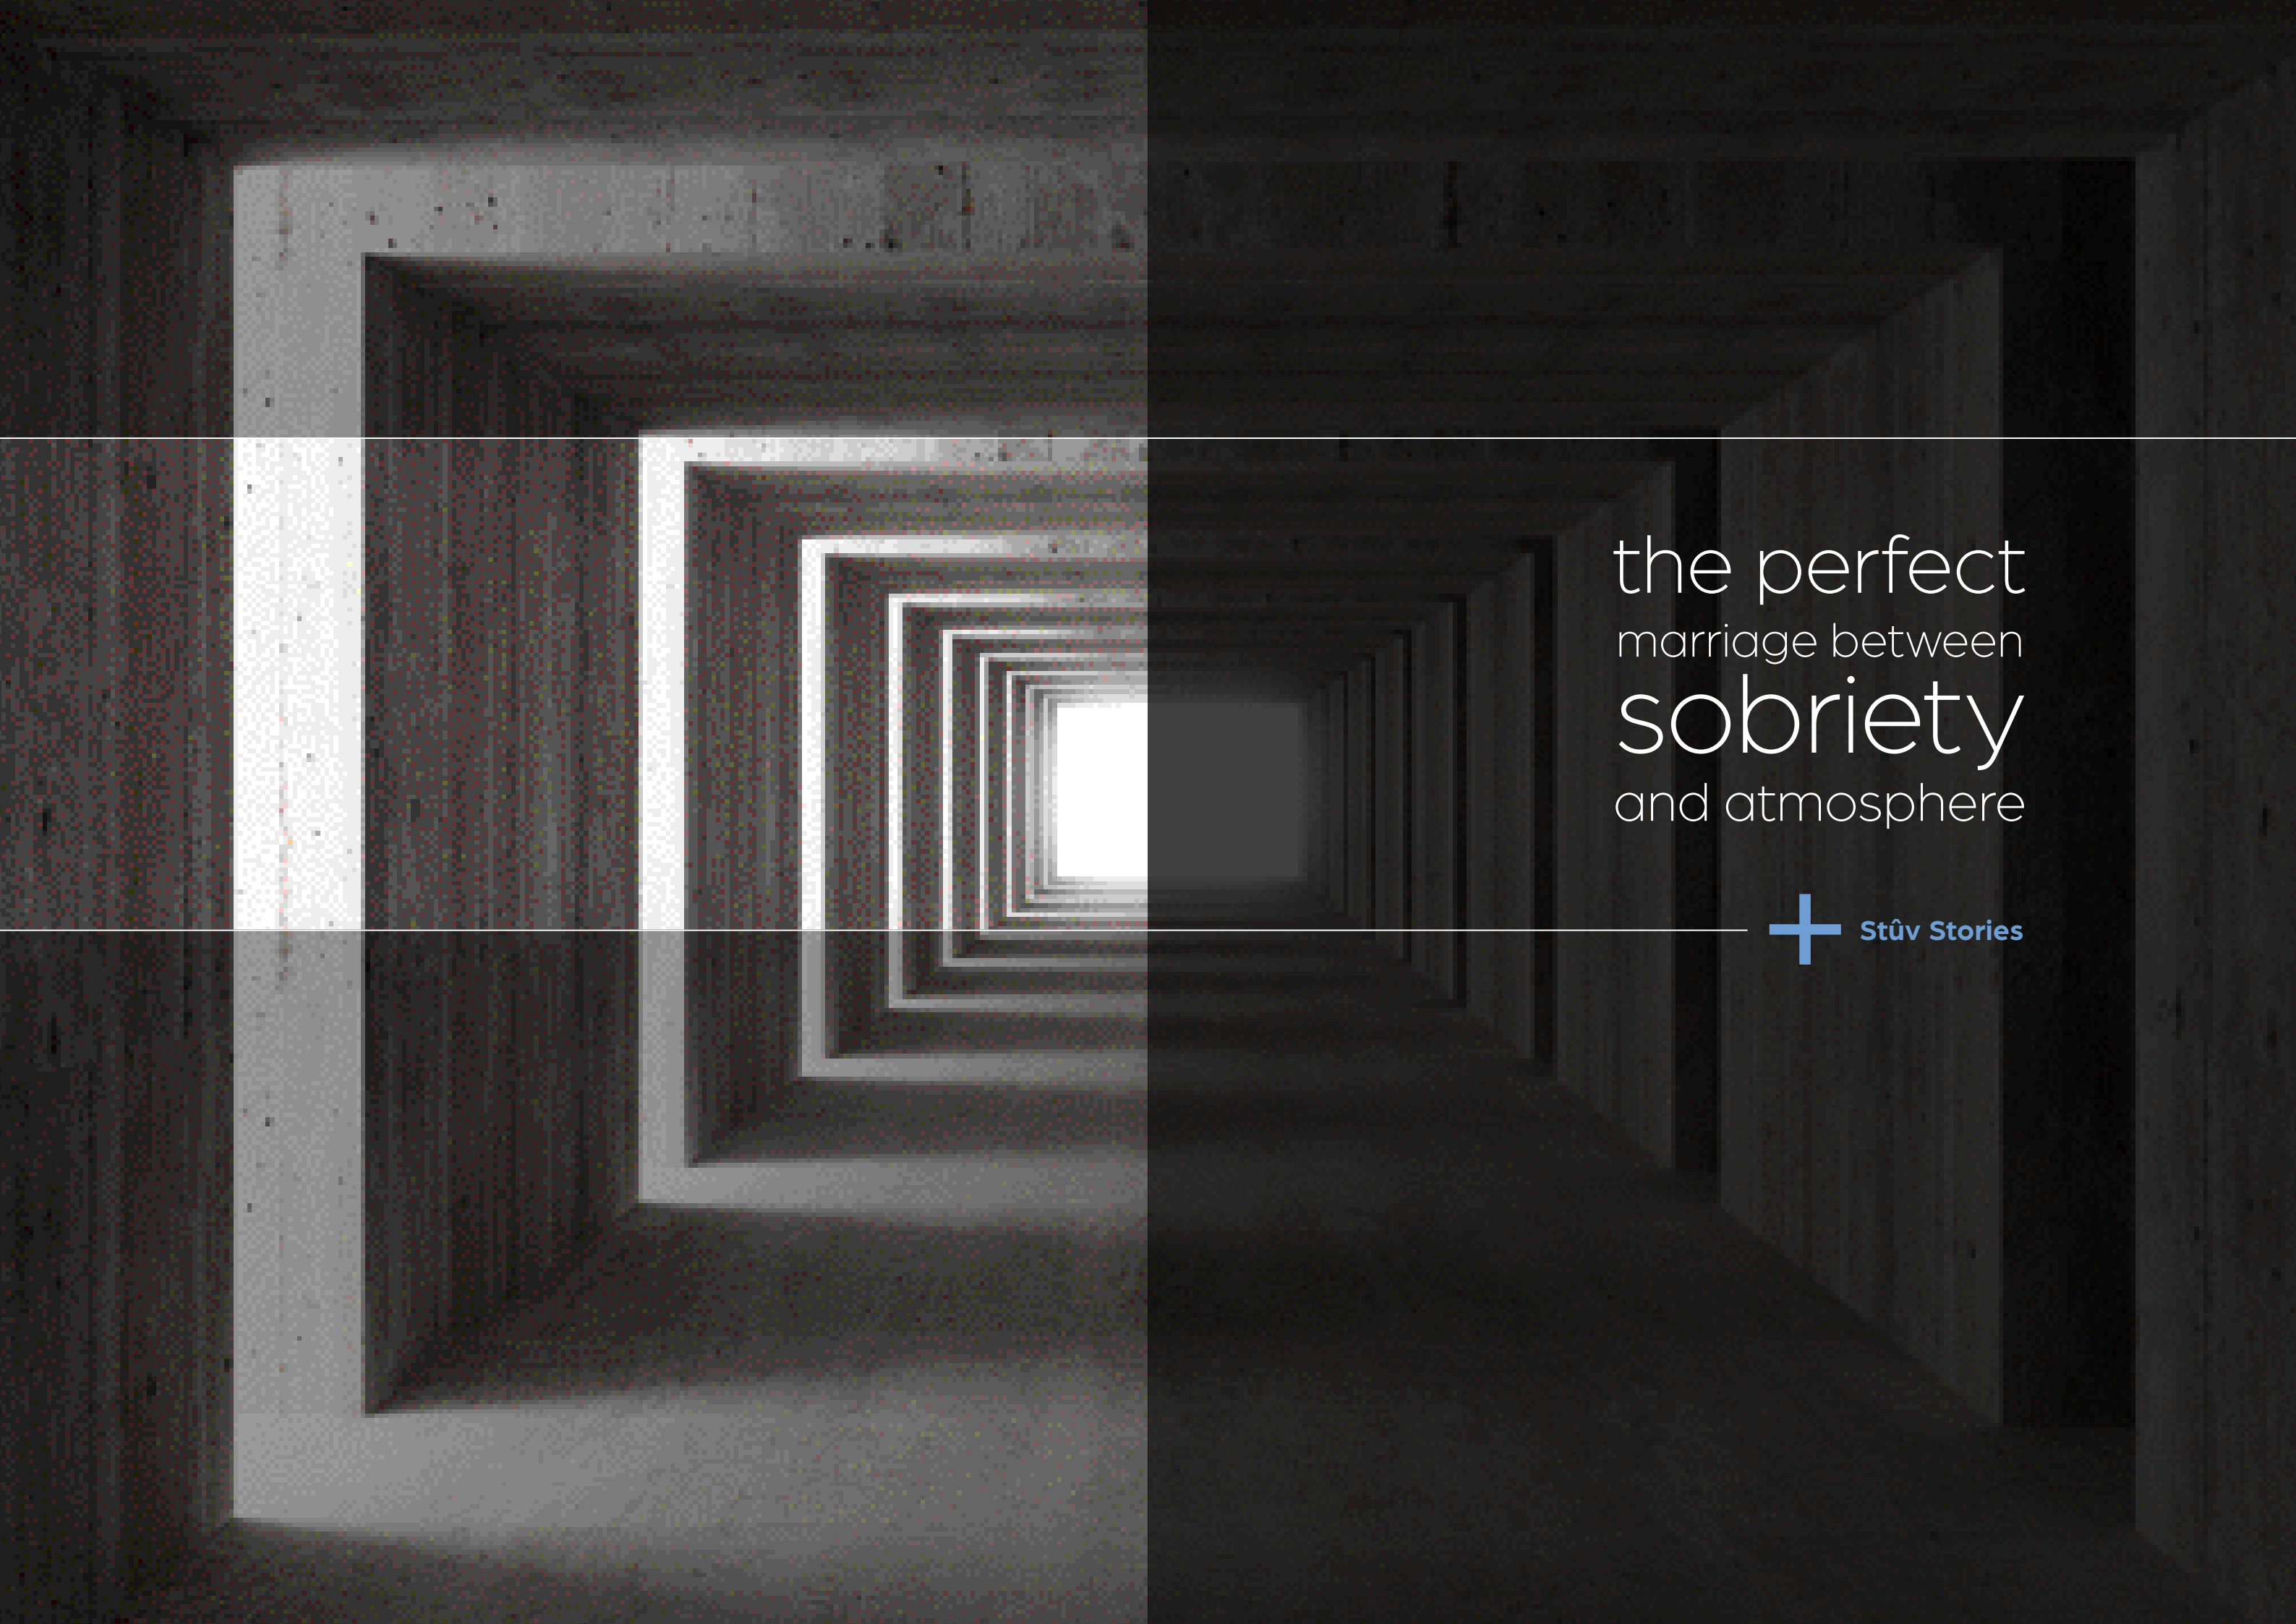

**Stûv Stories +Stûv 21-family**

# A family of products both open and closed

The Stûv 21 range is a typical family. Sober and discrete, with a focus on the purity and beauty of the fire. However, it is also an open family full of warmth and fun. A fireplace which is open and closed at the same time thanks to the window which can be slid partially or fully. The Stûv 21 is available in a single-face or double-face model and in a number of different sizes. The frames, front panel and casing complement the fireplace to ensure a perfect finish and enhancement. The Stûv 21 family, the unique combination of optimum performance and atmosphere.

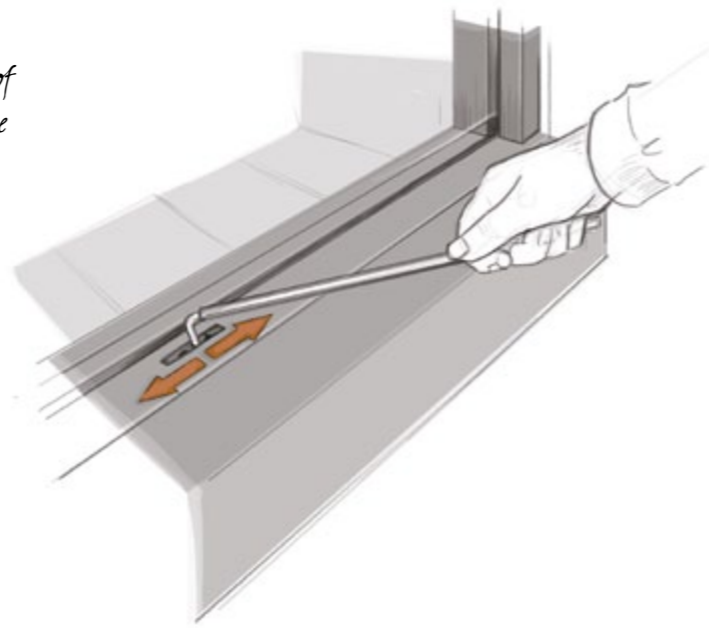

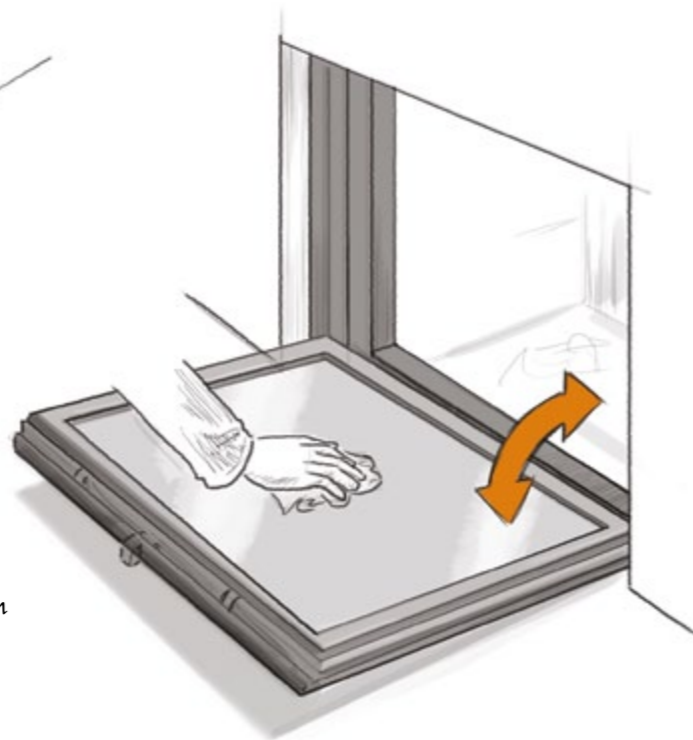

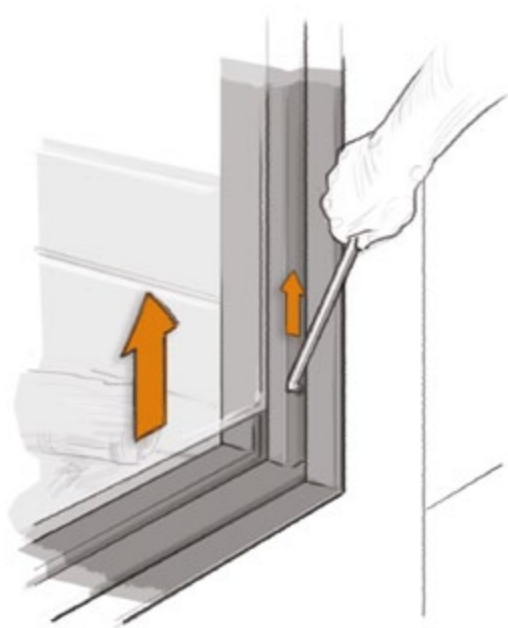

the perfect  
marriage between  
**sobriety**  
and atmosphere

 **Stûv Stories**

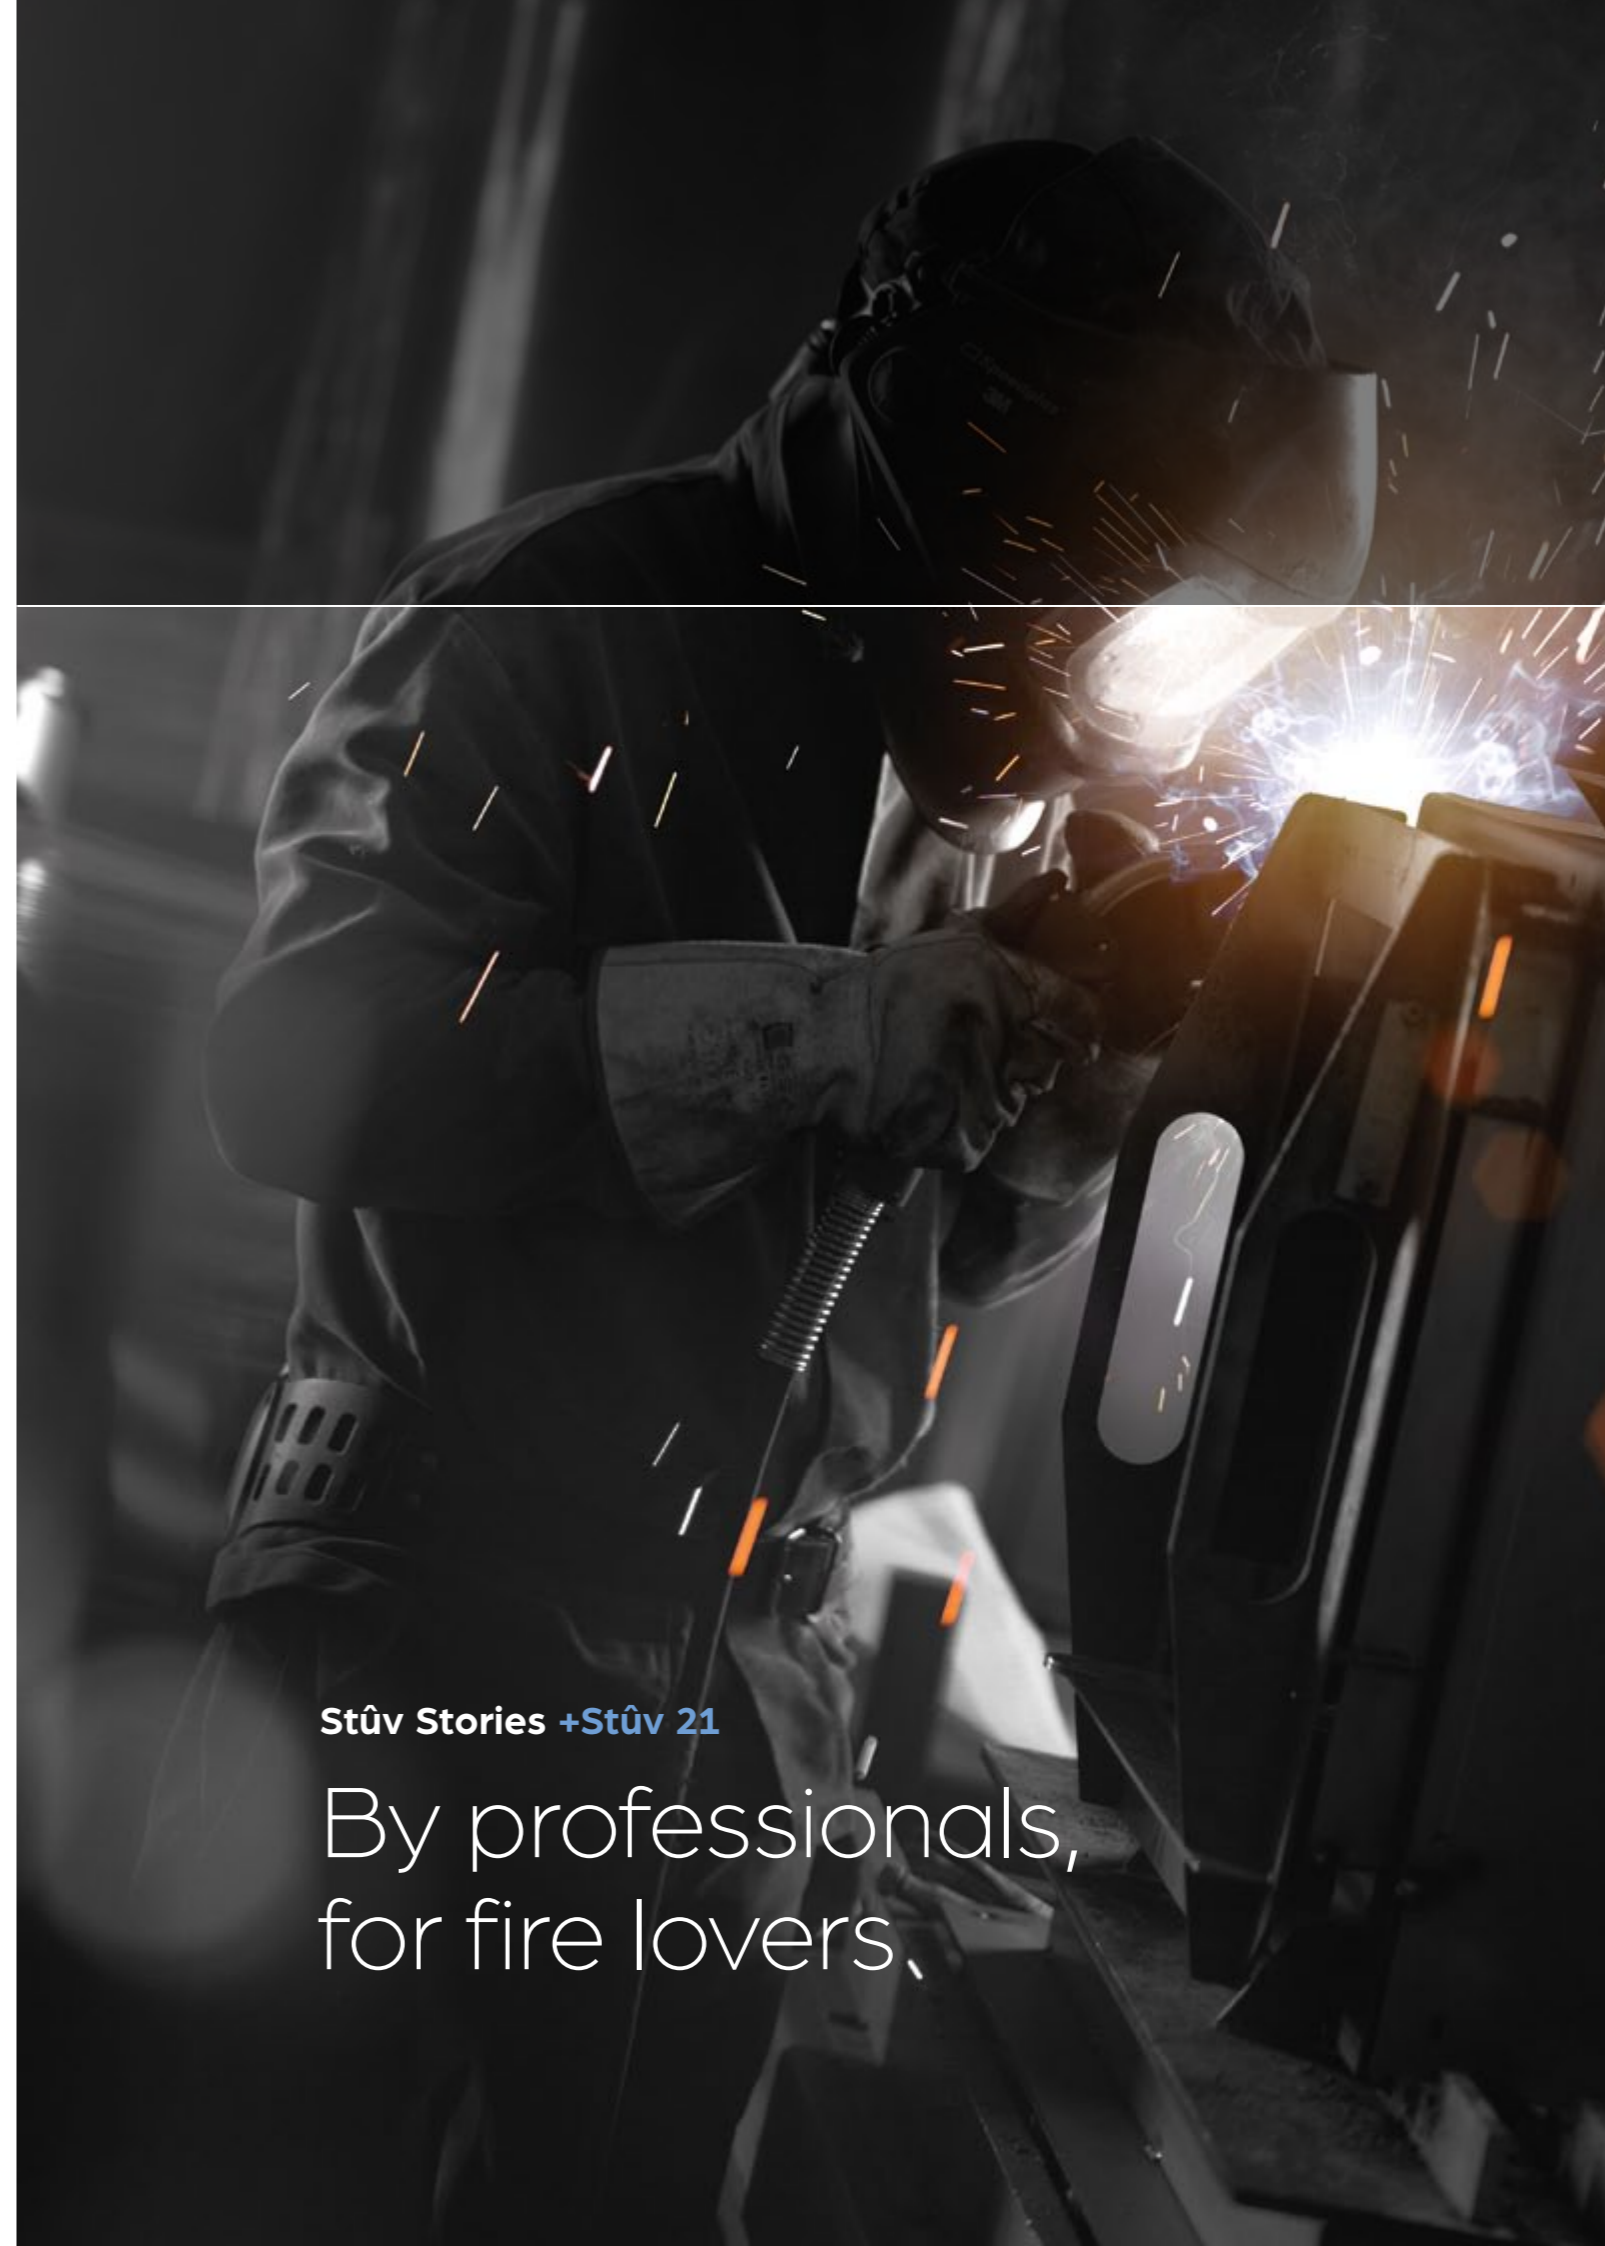

The valve allows one to regulate the volume of air entering the apparatus and therefore the amount of heat released.

The valve allows one to regulate the volume of air entering the apparatus and therefore the amount of heat released.

In order to facilitate the cleaning and maintenance of the window, the frame can be tipped without having to dismantle it.

Stûv Stories +Stûv 21

By professionals,  
for fire lovers,

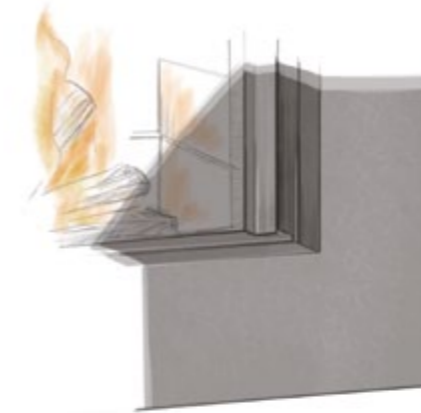

## Stûv Stories +Stûv 21-65-C

- + Heat strength regulation
- + Ability to be connected to the outside air
- + Air-funnelling option
- + Fan option

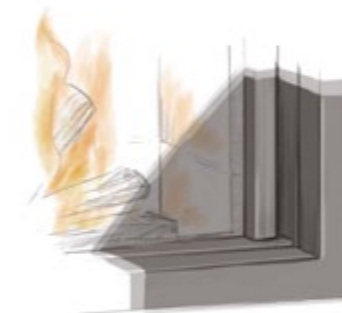

# Choose a suitable frame

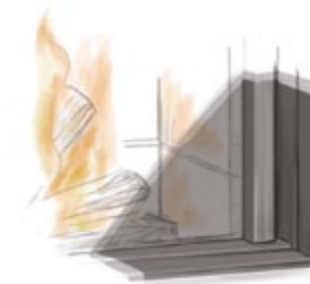

model shown: Stûv 21-65C with fram SF4 RAL 9010

*Stûv SF4: large frame available in many different colours. Also available in customised sizes.*

*Narrow frame in StuvGrey steel*

*Thin frame in 4mm StuvGrey steel*

## Stûv Stories +Stûv 21-65-H

- + Heat strength regulation
- + Ability to be connected to the outside air
- + Air-funnelling option
- + Fan option

model shown: Stûv 21-65H with frame SF6 RAL 9010

## Stûv Stories +Ready-to-fit SF15 fireplace

- + Steel chimney integrating air convection inlets and outlets - no need for decorative grilles
- + Easy installation
- + The front panel can open to allow maintenance or access to regulation elements.

## Stûv Stories +Stûv 21-75

- + Heat strength regulation
- + Ability to be connected to the outside air
- + Air-funnelling option
- + Fan option

Enjoy your fire the  
way you want it

## Stûv Stories +Stûv 21-85

- + Heat strength regulation
- + Ability to be connected to the outside air
- + Air-funnelling option
- + Fan option
- + Available in two interior shades: light or dark

A stylish fire...

Sober, it blends perfectly into any interior

# Wonderfully purified design

## Stûv Stories +Stûv mobilobox and log trolley

- + Mobilobox: everything is to hand (matches, maintenance products, barbecue kit, kindling etc.)
- + Practical log trolley, with simple and sleek lines: an essential accessory for all Stûv stoves.

## Stûv Stories +Stûv barbecue

Would you like to feel like you do in the summer all the year round? Now it's possible! Cooking food is healthier with the Stûv barbecue, as it is placed in front of the flames and not above the embers. Kebabs, sausages or fish is cooked in this way by radiation and not likely to get burnt by the drops of grease which flare up when they come in contact with burning charcoal. Installing the grille on the stove is child's play and, so that nothing spoils your pleasure, the chimney draught sucks away all the smells!

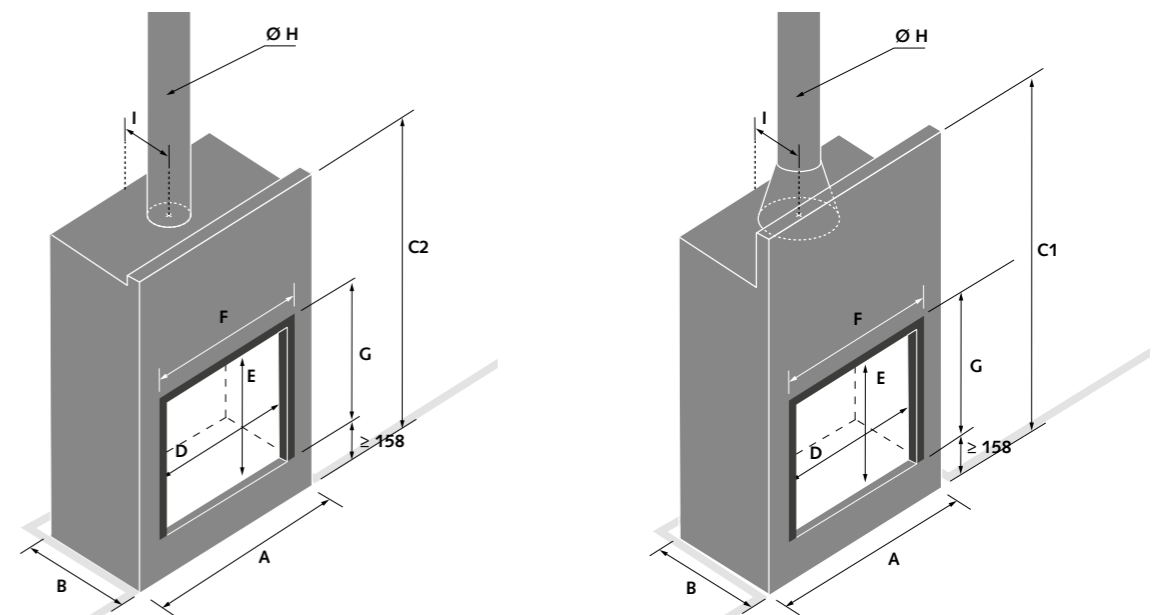

# Stûv 21

## The constant search for improvement...

Stûv invests enormously in research and development in both its own laboratory and thanks to its partnerships with specialists in the field of combustion. Each detail is important in optimising the performance of the stove. Stûv devices meet the most stringent standards in terms of respect for the environment. We prioritise ergonomics and simplicity at all stages – installation, use, maintenance – so that every user can use their Stûv exactly how they want it. This is the reason we provide detailed installation instructions, we select our sales network and organise training sessions for our retail and installations partners.

### The Stûv guarantee

- + Stûv fireplaces are renowned for their design and performance. They are also solid, reliable and durable.
- + The fireplaces and their components are made in Europe with the utmost care. A well-maintained Stûv fireplace is for life.
- + This is why Stûv offers the users of its products an extended guarantee. Three years' guarantee in addition to the legal guarantee.
- + In total, 5 years on the body of the fireplace, 3 years on the electrical components and 3 years on the other components.

### What do you need to do to benefit from this extended guarantee?

Complete the guarantee form that you will find at the end of the user manual and return the hard copy to Stûv or – the easier option – complete the online form at [stuv.com](http://stuv.com).

All Stûv fireplaces are designed to burn wood with a humidity level of less than 20 %.

All Stûv fireplaces were tested according to EN 13240 CE and EN 13229.

Complies with standards :
