

Membrane

We only use the highest quality PVC from European suppliers. Our standard PVC is 650 gsm and U.V Stabilised, mould inhibited, Acrylic lacquered and more importantly flame retardant to British Standards 7837 as well as many other international standards.

We also offer colours from our Premium range of 680 gsm, and an Opaque quality for block-out requirements.

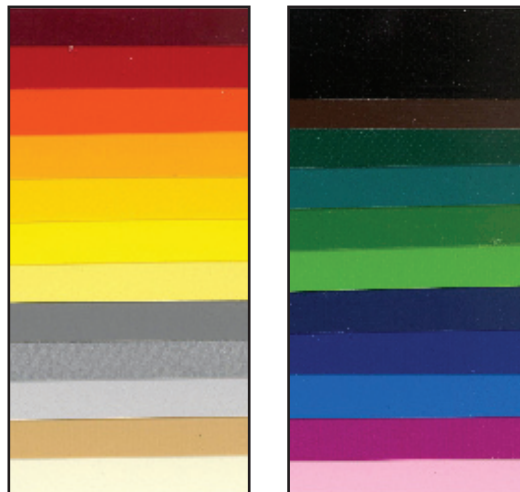

Our durable shade sails come with a 5 year warranty as standard which is unique to J&J Carter Ltd. All of our shade sail PVC can be digitally branded to suit your project.

In addition to White and White Opaque our standard house grade PVC colours include:

Ask us about non standard colours. We have access to a variety of European PVC coaters who will be able to fulfill your requirements.

New Cover-Brite™ range for 2010 include:

All prices quoted are ex. Works Basingstoke and subject to VAT. Our normal terms of business apply at all times.

Recycling & Re-use

J&J Carter are the first marquee manufacturer to take an active role in the disposal of "end of life" PVC marquee panels. Please visit our website for full details.

All metallic parts are removed and panels baled for the recycling facility. The panels are then broken down to pellet form and used in the manufacture of industrial products such as road cones and pallets.

Please see our website for full details.
