*magnetic opening system for double doors*

WITH THE **PUSH & GO EVO SYSTEM**, LOCKING THE SECONDARY DOOR LEAF IS QUICK AND EASY, THANKS TO THE **MAGNETIC LATCH** THAT STOPS THE DOOR LEAF WHEN IT RETURNS IN CLOSING POSITION.

CELEGON OPERATES **WORLDWIDE** IN THE DEVELOPMENT, ENGINEERING AND **MANUFACTURE** OF INNOVATIVE SYSTEMS FOR DOORS AND FURNISHING.

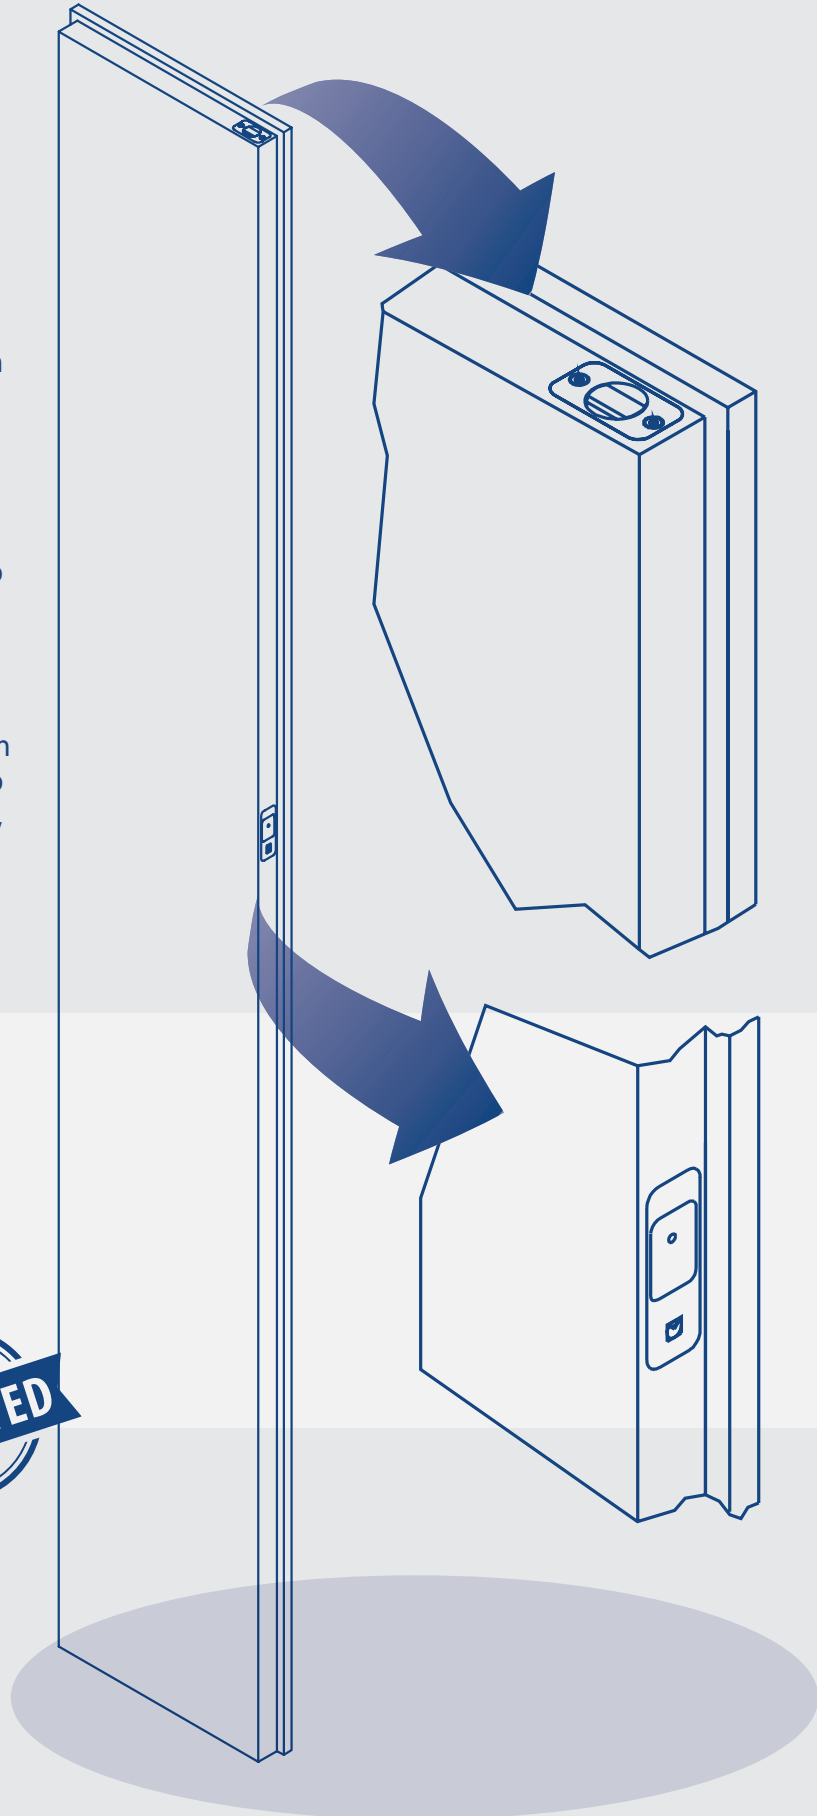

Celegon presents Push & Go EVO, the new magnetic system for unblocking the semi-fixed leaf of double doors. Push & Go EVO unlocks the semi-fixed part by simply pressing a button. Door closure is guaranteed by an invisible magnetic system, simply by pushing the door into position.

The operation and ease of use are especially useful in places where the double door is opened frequently and where emergency situations require the door to be opened quickly, such as hospital wards, rest homes, schools and apartment buildings. Compared to traditional bolt, Push & Go EVO improves the look of the door and makes it much easier for anyone who is less physically strong to unblock the door, such as children, the elderly or the disabled. Push & Go EVO can be installed at a height that is just above the normal lock.

Push & Go EVO, in chrome-plated metal, is supplied in a practical, universal installation kit for application to double doors of any height or thickness with circular, flush-fit, Ergon or Compack folding opening systems.
