pleasure

A LUMINOUS EXPERIENCE

The led lights around the perimeter give the spa a spectacular appearance, they not only set the mood but they can also help you to get into the hot tub in the dark. Sit underneath the waterfall and enjoy the twinkling of the lights around you. (Not available for J210)

THE EXPERTS IN HYDROTHERAPY

Depending on model selected you can experience between 4 and 7 different hydromassage stations within your hot tub, each seat shaped to cradle the body and offer optimum comfort. Within each station the jets have been positioned carefully to target the body and provide different hydromassage experiences to suit your needs.

UNDENIABLE QUALITY PLUS

Thanks to its layered and bonded resin and acrylic structure, the special Trifusion™ shell not only increases the spa's strength and resilience but also significantly improves its inner heat insulation, reducing energy consumption in cold climates. The ClearRay® UV light filtration system is cleaning and sanitising your water at all times.

A MUSICAL PLEASURE

The audio system consists of an iPod/MP3 port and four waterproof speakers positioned on the spa deck, in self draining surrounds. This stereo system includes Bluetooth. (Not available for J210)
