

Aria StorageWall

Generated on 05.12.2017

Detailed description

Aria StorageWall has a unique aluminium structured carcass. The aluminium is punched to a 25 mm grid system, allowing the internals to be adjusted in +/- 25 mm increments without the use of tools. The system is manufactured and installed to suit specific site dimensions. It is designed to maximize storage space from floor to ceiling, be installed quickly and is fully demountable allowing the units to be relocated, modified and/or recycled.

Product guidance - As Standard

Modules:

All modules are available in eight widths and three depths:

- Width (single door):

- 400 mm.
- 450 mm.
- 500 mm.
- 600 mm.

- Width (double door):

- 800 mm.
- 900 mm.
- 1000 mm.
- 1200 mm.

- Depth:

- 412 mm (A4).
- 472 (Foolscap).
- 600 (coats).

The height is entirely bespoke to room requirements – the manufacturer will attend the site to measure up once an order has been placed. There is a large range of standard finishes from which to choose, as well as a large range of internal options. Standard products can be made unique through the use of applied graphics and special finishes.

Carcass:

Punched aluminium profile, with 5 mm anodized finish and melamine faced particleboard in light grey as standard. Dual compound PVC sealing strips to prevent ingress of dust and improve acoustic properties.

Performance:
