PRODUCT OVERVIEW

RENDER SYSTEM

Polymer Plain Render

SUMMARY

M.R. Polymer Plain Render can be applied as a one or a two-coat render system, depending on project requirements. It is ideal for coating large elevations and creating feature bands on building facades.

Product Overview: Polymer Plain Render / Masonry Paint

- A BBA approved, fully warranted system when used with Alumasc EWI systems
- Effective life in excess of 30 years when used with Swisslab or Swisspan EWI systems
- A durable, lightweight alternative to traditional sand and cement
- Fully weather resistant whilst remaining vapour permeable
- Highly resistant to impact damage
- Class 0 surface spread of flame
- M.R. Polymer Plain Render must be over painted with M.R. S6 Masonry Paint

Applications

- Suitable for one or two-coat, painted application over most building surfaces
- Used to coat large elevations and create feature bands around windows or doors
- Can be used as the facing for Alumasc's insulated render systems
- Fully compatible with Alumasc's Swisslab and Swisspan External Wall Insulation systems

Colour Options

- 8 standard Polymer Plain Render colour options
- Render system must be over painted with M.R. S6 Masonry Paint
- 18 standard M.R. S6 Masonry Paint colour options available

Installation & Maintenance

- Installed by a national network of Alumasc registered contractors
- The system requires minimal routine maintenance
