

KALDEWEI

THE CLASSIC OF TOMORROW

Cayono – the new bath standard.

CAYONO

The bath.

When a pioneer introduces a new bath epoch, everything has to be perfect: forward-thinking design, uncompromising quality, and sustainable production. With a level base and a generously dimensioned interior, even in the smaller sizes, you achieve more standing convenience for better showering comfort. The bath's optional anti-slip finish, covering a visibly larger surface area, provides for more safety and quality is assured through the 30 year guarantee due to Kaldewei 3.5 mm steel enamel.

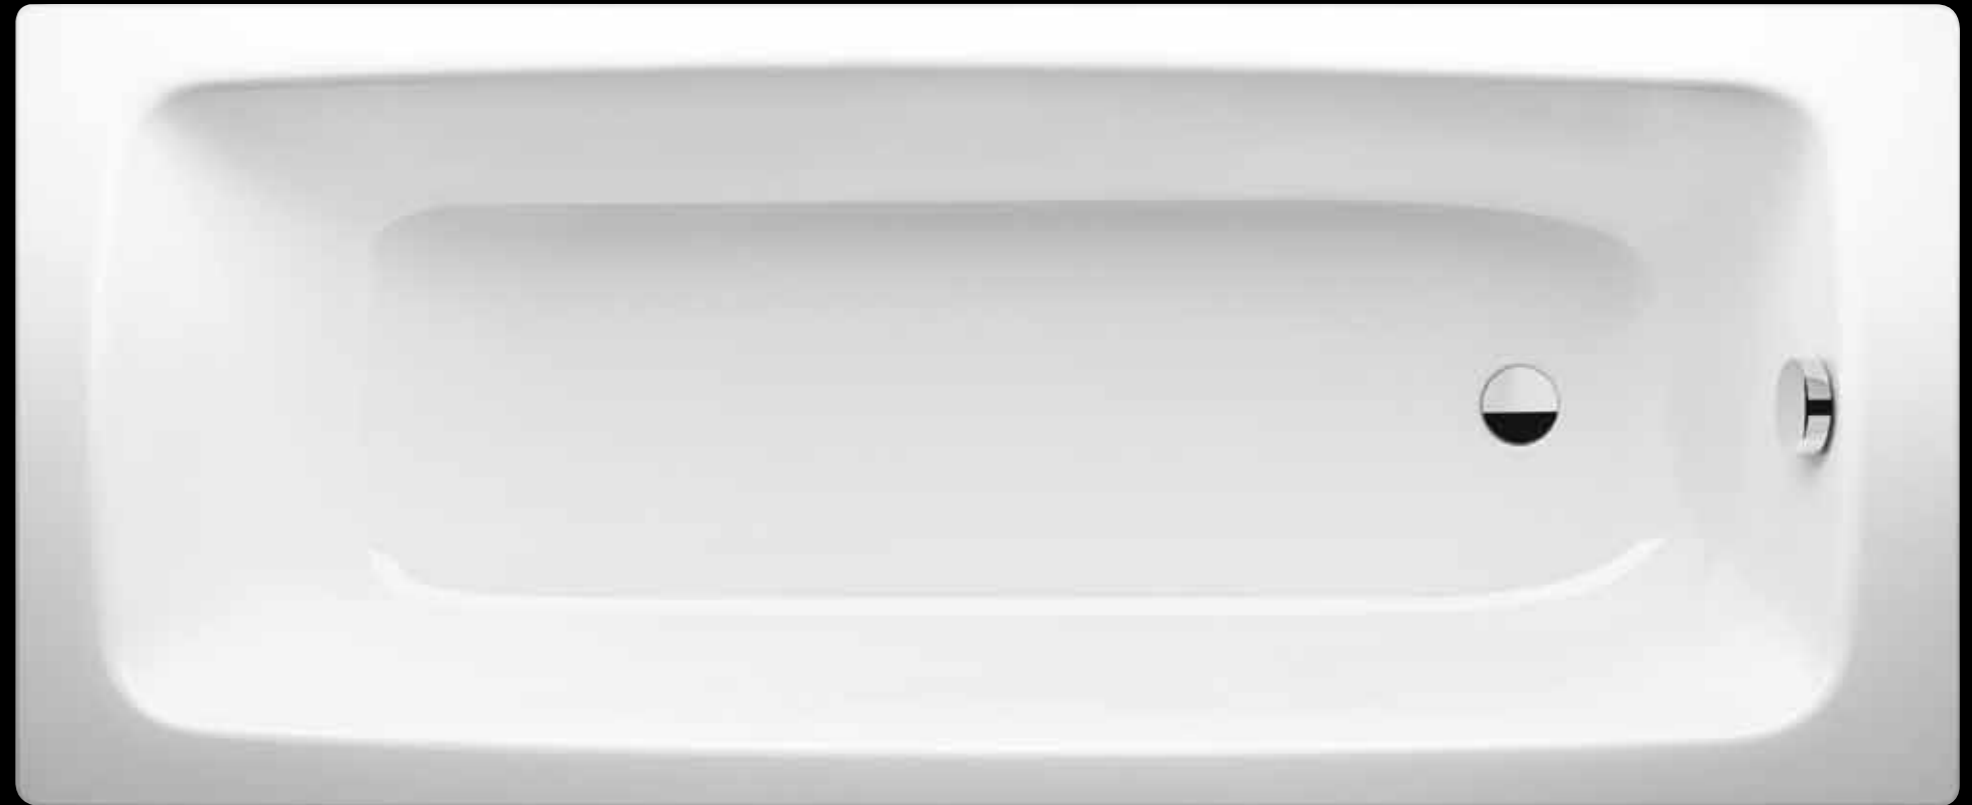

The more complex the challenge, the more pioneering the solutions must be. Experience the classic of tomorrow, available from March 2013.

COMFORT. SAFETY. DESIGN

Cayono – the new standard of bath.

- Available in 5 sizes: 150 x 70 cm, 160 x 70 cm, 170 x 70 cm, 170 x 75 cm and 180 x 80 cm
- The bath sizes allow for flexible bathroom planning. The CAYONO bath is thus the ideal solution, from small bathrooms to spacious bathroom havens.
- The level design of the bath floor allows for comfortable showering without compromise.
- Safe footing thanks to optional anti-slip enamelling.
- Attractive extension of the Advantage Collection.
- Simple, yet sophisticated. A timeless design that's adaptable to suit your aesthetic needs.
- With Kaldewei steel enamel 3.5 mm baths, a generation of opulence is always assured with our 30 year guarantee.

SUPERIOR SAFETY

The new anti-slip finish for the Cayono bath.

The new anti-slip enamelling, specially developed for the CAYONO bath, represents a functional and aesthetic combination of safety and design. A generous amount of anti-slip enamel is placed in the bathtub in the most ergonomically optimal position. This ensures that getting in and out of the bath is both safe and comfortable. In conjunction with the flat bathtub bottom the CAYONO is therefore also ideally suited for showering.

The Rhineland TÜV organisation (German Technical Inspection Association) has certified Kaldewei's anti-slip and optional full anti-slip systems as having anti-slip properties compliant with Quality Class B for barefoot wet areas (DIN 51097) and Quality Class R 10 for anti-slip characteristics in work spaces and working areas with an increased slip risk (DIN 51130).

QUALITY MADE IN GERMANY

Kaldewei steel enamel 3.5 mm.

California borax, quartz, Scandinavian feldspar and soda. These are just some of the glass-forming, natural raw materials used by Kaldewei in its own recipe to produce a special enamel that is permanently burnt into the steel enamel. The surface is guaranteed to remain resistant for 30 years. It is not only the combination of

steel and enamel that is decisive in this respect, but also the total thickness of 3.5 mm. The hygienic and durable surface also convinces in terms of its care properties: cleaning the already easy-care bath becomes even easier with the optionally available easy-clean finish. Even with almost no care the bath thus always looks like new.

- heat-conductive
- heat-resistant
- UV-resistant
- scratch-resistant
- impact-resistant
- chemical-resistant
- easy-clean finish
- easy to clean and hygienic
- 30 years guarantee
- ecologically sustainable
