- **Available** In a range of attractive shades – and with options such as valances, heating and lighting.
- **Guaranteed** Full five years manufacturer's warranty.

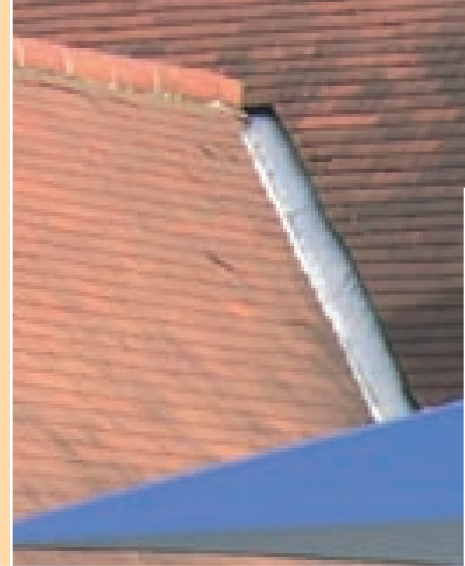

A Kaydee giant umbrella brings elegance under cover

## Open up - take the indoors outdoors with Kaydee Giant Integrated Commercial Umbrellas

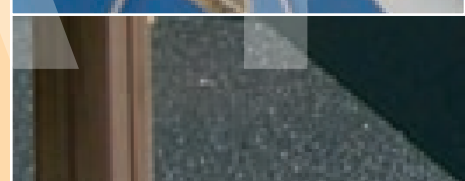

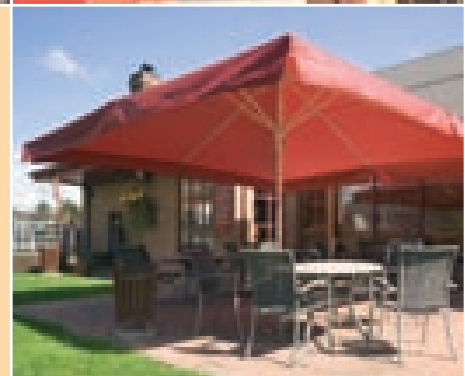

As a means of keeping the not-so-great British weather at bay, the umbrella is a concept that has been with us for generations. Now, thanks to Kaydee, the idea has been advanced - opening up a whole new spectrum of leisure, education, sport or business possibilities.

Think of the benefits offered by Kaydee Giant commercial umbrellas. Cost is a good starting point – how else can you provide complete weather protection for such a modest outlay? Then there's the space factor – whatever your needs, there are

surely few easier ways off adding extra leisure space than below the folds of a giant umbrella.

- **The 'wow' factor** There is something quite unique about providing leisure space in this way. Kaydee giant commercial umbrellas add a lot more than just shading from the sun and shelter from the rain – they have a special 'wow' factor all of their own, which gives you the leading edge.
- **External solar shading** Apart from giving year-round protection against the rain, they also shield ultraviolet rays. That's a real safety assurance for you – and for others to whom you may have responsibility.
- **Grace and space** Attractive, yes. But Kaydee commercial umbrellas are also a fast and effective way to expand your external space. Compared with fixed traditional structures that require planning, they also save you time and money.
- **Permanent or moveable** Permanent galvanised metal fixing sleeves can be set in concrete or the umbrella can be supplied with deck-fixing plates or heavy-duty portable stands to allow movement – so that you can multi-use your allocated space.
- **Hazard-free** Their easy-to-demount facility is supplemented by a cover plate that is flush with the ground – giving you maximum 'trip-free' use of the ground space when not in use.
- **Maintenance-free** In all normal use, these products need no maintenance – to give you years of hassle-free service.
- **Guaranteed peace of mind** Kaydee commercial umbrellas are strongly-built, quality engineered systems that are backed by a comprehensive five-year guarantee.
- **So much choice** There is a huge range of shapes and sizes, giving you the optimum choice to make best use of your space.
- **Robust, colourful fabrics** Choose from Airtex - a waterproof, tearproof and fire-resistant fabric or Dolan with its 100% acrylic base and Scotchgard protection – both available in many colours, to offer you the best range.

## Beauty and lasting strength brought together under one umbrella

Elegant to the eye they may be, but Kaydee Giant Umbrellas are also designed with strength and safety very much in mind.

- **Built to last** All moving components are of stainless steel or high-density plastic – quality materials that are designed to last.
- **Wind-resistant** With a robust 80mm diameter mast, Kaydee giant commercial umbrellas have been

with stainless steel connectors that allow them to be removed easily for cleaning.

- **Open and shut case** Operation of the umbrella is with a removable crank handle that operates through a special case-hardened gearbox with self-lubrication bushes. It makes opening and closing a simple operation and holds the umbrella arms safely at every stage of this process.

tested to withstand a range of wind forces of up to 105 km/hour\*.

- **Strong arm tactics** Umbrella arms built from high-grade aluminium section, with stainless steel inserts. This doesn't just give extra rigidity – it also ensures that the umbrella retains its shape and always looks great.
- **In good shape** The internal mechanism of the umbrella arms and the gearbox mechanism are both specially engineered to prevent the umbrella turning 'inside out' in windy conditions.
- **Fabulous fabrics** Membranes are of single-piece construction, manufactured from Airtex or Dolan fabric. Airtex is stable and highly resistant to dirt, while Dolan is a heavier fabric that is better suited to harsh conditions. Membranes are secured to the frame

- **Flexibility in every environment** Kaydee giant commercial umbrellas come with many choices and options so that you can match them perfectly to your environment.

For example, **colour-matched frames** and mast are available in most RAL or BS colours. Optional **side sheets** are available, manufactured from matching Airtex fabric, with vision panels included. **Guttering** is another option, made from matching fabric with sleeves that carry aluminium supporting rods. **Quartz heating** that is safe, economical, directional and fully compliant with BS7671 is offered, together with **lighting kits** that give you a choice of low-voltage directional down lighters or the warm glow of fluorescent lamps.
