

The Single BLOQX can stand alone, due to its slightly oversized proportions with three different panel colours. The climbing experience on this lonely module with its broader sides and therefore more roomy climbing area, is different from the more concentrated clustered structures. Also the less experienced climber can get the satisfaction of having reached a top with a view. Each side has 4 climbing grips arranged in a varied pattern to assist the climber. Different climbing events can be arranged when the climbers focus on using a special coloured grip or a panel colour. The Single BLOQX has a strong visual quality that is a powerful invitation to the climbing landscape that BLOQX offers. Together with a cluster of BLOQX the single module creates an interesting diverse climbing attraction.

Product Line	Urban climbing
Category	BLOQX™
Age group	8 - 15
Max. fall height (CM)	205
Total height (CM)	205
Safety Zone	19.8 m ²
