**Parameters:**

The play equipment primarily involves rope net surfaces, space nets and loop ropes and balancing ropes, which are stretched in between steel or wooden posts.

As a rule, the grid dimension of the posts is 2.00 x 2.00 m.

The equipment is comprised of Corocord rope with a  $\varnothing$  von 19/21 mm, as well as 7.5 mm thick membranes made of polyester fabric with a rubber covering layer.

The play ropes are comprised of six hot-galvanised strands, which are wrapped in PES yarn. The PES yarn is inductively melted onto the strands.
