Play Tower with Banister Bars, Basic, Plastic Slide

Climbing and sliding are eternally popular with school age children. This dense play unit offers two variants of climbing and two variants of sliding: via the sturdy rungs of a steel ladder or a low climb up a climbing wall. The reward for reaching the top platform is a stomach tickling slide to the ground on the slide or, for the dare devils, a glide down the banister bars. On the ground level, a nice desk invites a break and a chat. Apart from being great fun, climbing and sliding also support fundamental motor skills of the child: the sense of space, the cross-body coordination and the sense of balance. Additionally, the arm, leg and core muscles of the child are trained when climbing.

Product Line	Multi play structures
Category	MOMENTS™ School age
Age group	4 - 10
Max. fall height (CM)	238
Total height (CM)	260
Safety Zone	31.2 m2
