

Two platforms in two different heights form this small structure. The child enters the structure via the curved boarding net and steps one level up to reach the slide. This way the two spaces function separately, reserving space for entrance and observation on the first level, while sliding takes place on the next level. A play switcher is added to complete the play possibilities in the panels and an antenna is an extra manipulative signal giver. Ground level is dedicated to physical play with a turnbar and a play shell. The oldest children of the age group will enjoy the challenging turnbar while the younger will find a place for hopping and jumping activities at the play shell.

Product Line	Multi play structures
Category	ELEMENTS™
Age group	2 - 6
Max. fall height (CM)	120
Total height (CM)	215
Safety Zone	28.5 m2
