

MULTI-CHANNEL CONTROL SYSTEM

Controlling products in the washroom

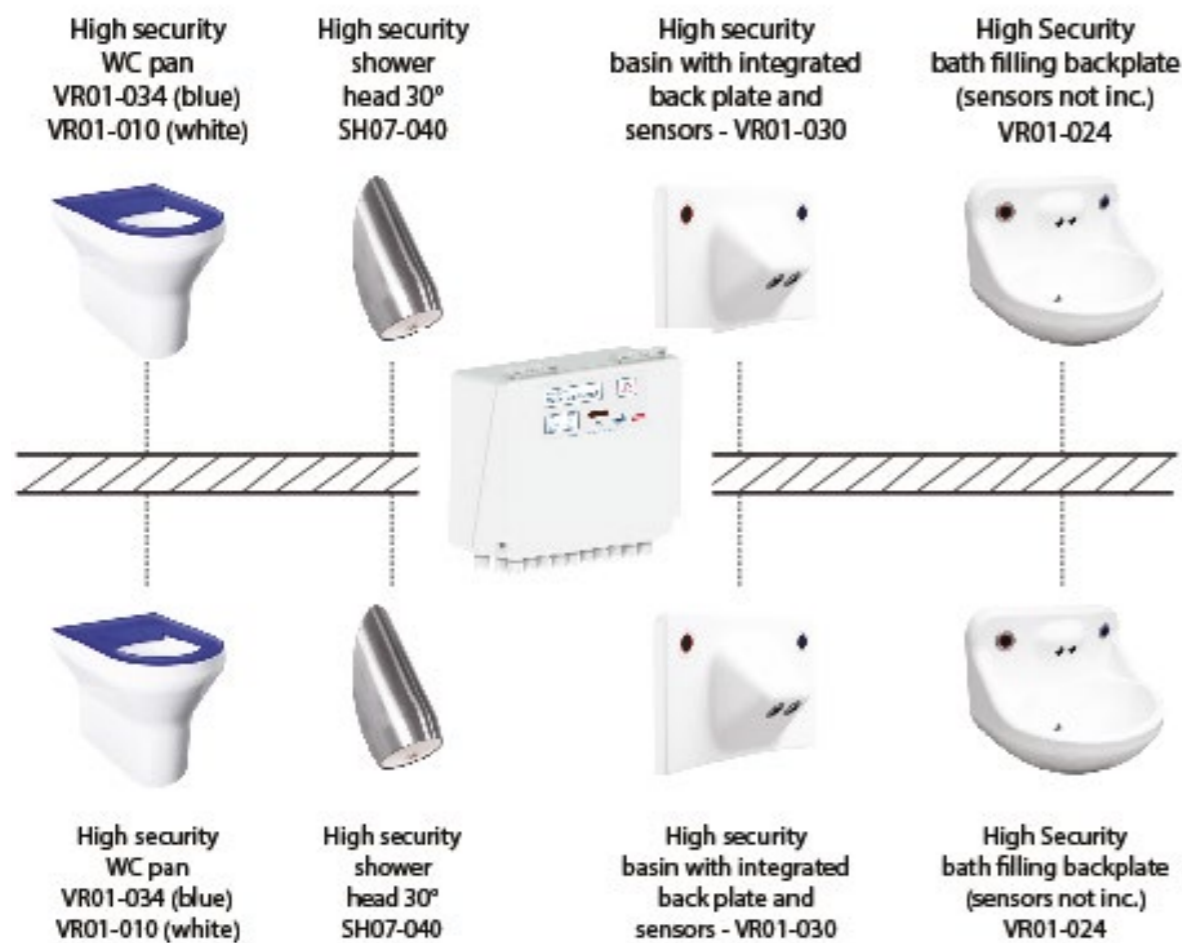

Key Features:

- Compatible with non-programmable sensors and tactile switches
- Compatible with 12 NC Solenoid Valves
- Ability to program 10 independent channels plus 2 flushvalves
- Timing and option settings are adjusted via the DVS Handheld Programmer.
- Can be used to control a multitude of washroom configurations
- Powered via fused spur (230V AC)
- Only works with tactile (piezo) switches and standard sensors (12V) - only through box.
- NOT programmable (6V) - work on own - classic, aquarius, programmable (above)
- Compatible with non-programmable sensors and tactile switches
- Compatible with 12 NC Solenoid Valves
- Ability to program 10 independent channels plus 2 flushvalves
- Timing and option settings are adjusted via the DVS Handheld Programmer.
- Can be used to control a multitude of washroom configurations
- Powered via fused spur (230V AC)
