Tiledor (Hinged) Data Sheet

Description

This 80mm deep access panel is non-fire rated has a door fitted with moisture resistant board and is supplied with a beaded frame (which allows tiles to bond on to). The panel has a sliding bolt pin hinge; this allows the door to be fully removable when required. The panel is fitted with a budget lock as standard but other locking options are available.

Material

Our range of panels are made from 1.2mm Zintec steel for maximum rigidity, other materials are available on request such as stainless steel. As standard our panels are finished in a polyester powder coating - White RAL 9010. For other colours contact our office.

Dimensions

The actual size of the structural opening needs to be 12mm larger than the inside of the frame, i.e. structural opening for a 0600x0600 would need to be 0612x0612.

Additional Locking Options

The Hinged Tiledor is supplied with 3 way locking as standard but is available with additional locking options, castellated tamperproof lock, standard key lock, IP65 airtight tamperproof insert, 5mm bit tamperproof insert.
