

Tiledor (Budget) Data Sheet

Tiledor (Budget) Data Sheet

Description

This 55mm deep access panel is non-fire rated has a door fitted with moisture resistant board and is supplied with a beaded frame (which allows tiles to bond on to). The panel has a simple hinge system with two pin and bracket locations built into the frame, this allows the door to be fully removable when required. The panel is fitted with a budget lock or touch catch as standard (please state when ordering) but other locking options are available.

Material

Our range of panels are made from 1.2mm Zintec steel for maximum rigidity, other materials are available on request such as stainless steel. As standard our panels are finished in a polyester powder coating - White RAL 9010. For other colours contact our office.

Dimensions

The actual size of the structural opening needs to be 12mm larger than the inside of the frame, i.e. structural opening for a 0600x0600 would need to be 0612x0612.

Additional Locking Options

The budget Tiledor is available with additional locking options, 5mm bit insert, castellated lock for anti-tamper or a standard key lock.
