Combine colours and materials to add a touch of individuality to your projects

Based on many years of experience, Maxwood has maintained steady growth on the strength of being designers, manufacturers and installers of the UK's finest washrooms.

This inspirational selection of colours and materials supports the collection of distinctive washrooms by Maxwood. Providing scope for creativity that will complement the quality of product design, the extent of finishes brought together into this one compilation is unrivalled.

Please contact our sales office on 024 7662 1122 for further advice or material samples.

Don't let the finite selection included in this Finishes selector limit your imagination! If you can't find the perfect colour or finish to realise the effect you had in mind, simply talk to us – we will do our utmost to help you fulfil the exact requirements for your project.

Our superb range of finishes allows you to achieve visual effects that are limited only by your imagination. Choose from warm, organic woods like maple and walnut, striking metals such as copper or titanium, or the simple beauty of vibrant colours.

We have a finish to suit every setting and visual style, from professional and classic through to relaxed and funky. Select complementary finishes from the same style, or branch out by combining different moods in the same space.

Real-wood laminates

Combining the natural beauty of wood veneers with the durability, ease of installation and low maintenance of a High Pressure Laminate (HPL). Contemporary or Classical it provides the quality. Where busy places must stay beautiful "Real-wood" HPL ticks all the boxes.

Mirage cubicles. Pilasters 30% etched, Doors RAL6034.

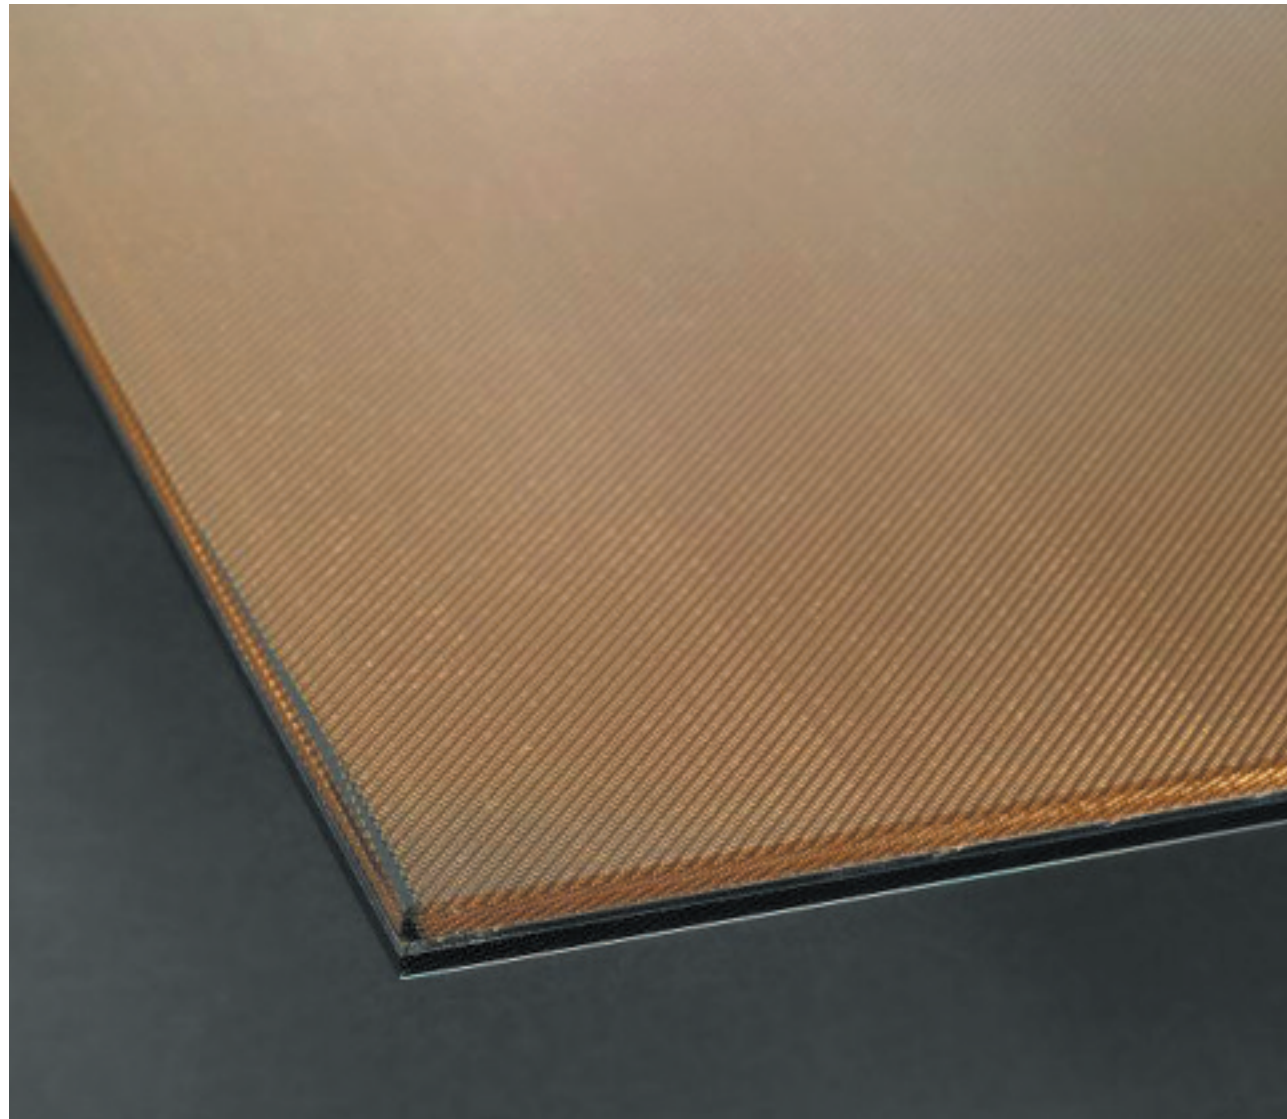

RAL6018 back-painted glass splashbacks with clear shelves.

Back-painted glass for WC and wall panelling. WC panelling in RAL1012 and washhand basin in RAL1015.

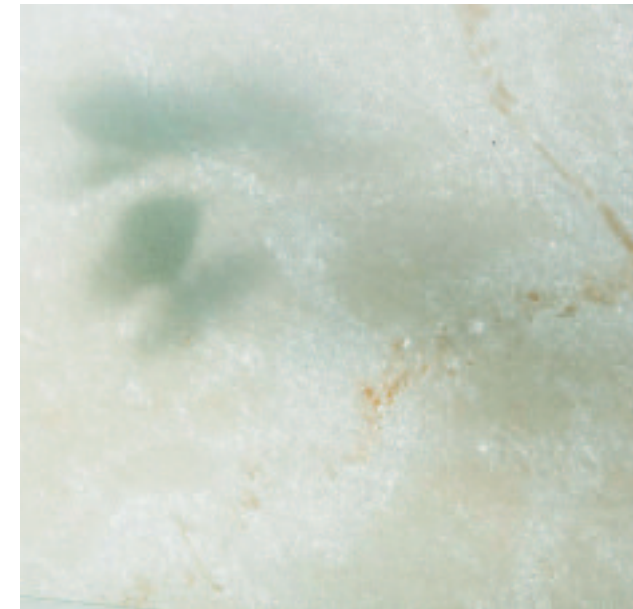

Any RAL colour can be specified for our coloured glass systems.

Inlaid glass offers a wealth of design possibilities. The laminated, single or double-sided metallic coated plastic creates a textile-like appearance.

Inlaid glass constantly presents itself in a new guise, depending on the incidence of light and angle of view, with a glorious play of colours arising from the many different reflections. In addition, the different web versions and mesh sizes enable a significant reduction in transparency and g-value.
