Think out of the square

Here at modulyss®, we've 25 years experience in making modular carpet that's square. A **50x50cm** square carpet, created to bring design flexibility and adapt quickly to interiors of all shapes and sizes. It is a favourite among interior designers and architects that want to bring the benefits of textile flooring to their projects. The square carpet tile from modulyss® is the default and reliable choice.

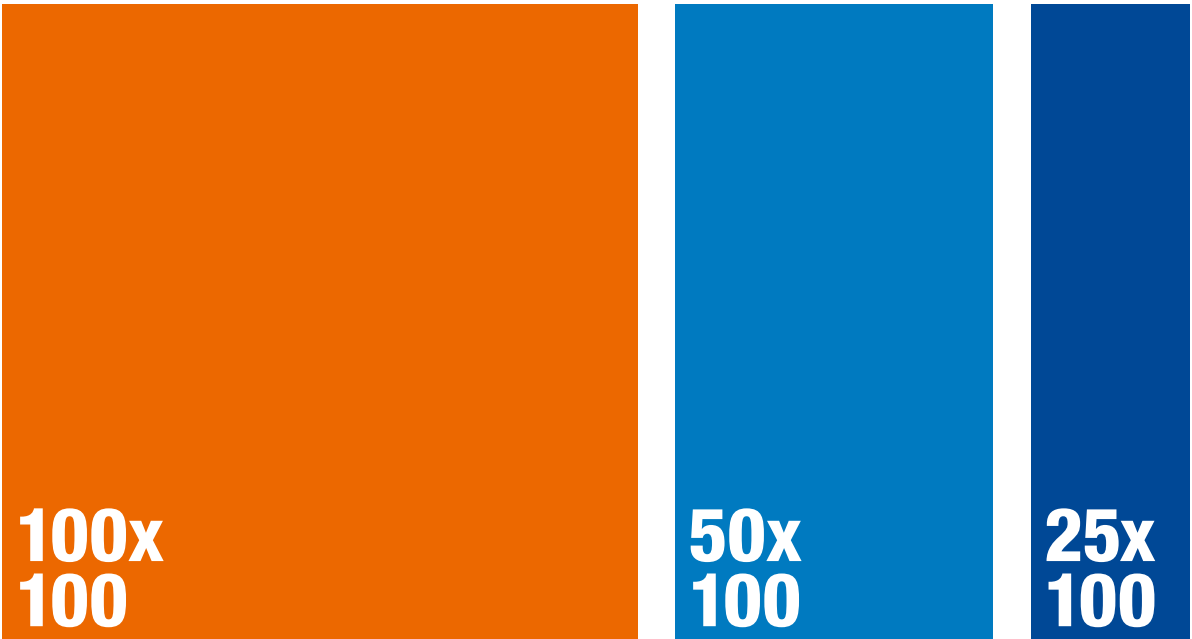

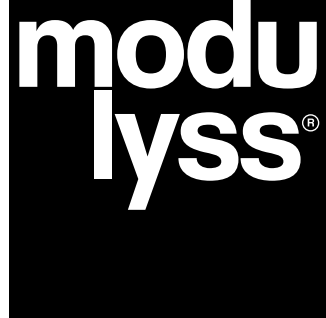

With such a diverse choice of colour, structure and pattern, modulyss® carpet tiles provide creative possibility, transforming the mood of interior environments and defining space. Yet, in order to offer an even wider range of products and to meet growing demand, modulyss® has created **New Shapes**, positively changing its modular carpet collection forever.

The concept

New Shapes makes the familiar **50x50cm** dimension a single element in a wider perspective. Changing the way we relate with modular carpet, this carpet tile collection heralds a new era of carpet design, redefining our relationship with textile flooring. New Shapes opens a fresh dimension of **creativity**.

Using the same geometric principles that have made modular carpet so adaptable and that keep it inherently flexible; New Shapes introduces **three different shapes** that come together to create limitless flooring layouts.

Mix & match

Mix it up

Using the same basis of geometrics, but improving on the **flexibility** of the traditional carpet tile, New Shapes is entirely adaptable, working individually, together and in combination with 50x50cm square formats. Explore endless combinations of layout, colour, texture and shape, all while discovering **new flooring design possibilities**.

Endless possibilities

So much more than a functional solution to a functional requirement, New Shapes adds dynamic intent to your floor. With structures, shades and designs sampled from as many as **34 modulyss® modular carpet collections**, you can create a floor that works for any interior.

When it comes to the secondary backing, New Shapes has no functional limitation either. New Shapes can be equipped with both Back2Back modified backing and silentBack acoustic backing.

The scaled geometric nature of New Shapes ensures an effortless installation and makes it easy to replace or change your floor design.

Easy to install

Thanks to the geometric principle adopted by New Shapes, this modular collection is simple to install, whether ashlar, brick ashlar, herringbone, monolithic or random.

New Shapes brings other advantages too:

- Simple to store and easy to transport
- Less waste compared to traditional carpet
- Can be loose laid, eliminating the need for permanent glue and facilitating speed and ease of replacement
- Layouts, designs and colours can be quickly changed

Outstanding performance

10

Just like conventional modulyss® modular flooring, New Shapes delivers the performance required to meet the demands of busy spaces.

EN 1307

This is the standard by which all modular carpet is judged, right across Europe. A standardised assessment of the technical performance of modular carpet, EN 1307 looks at castor chair suitability, light fastness, sound absorption, impact noise rating and more. New Shapes fully complies.

Use class

The use class indicates just how durable the carpet can be. Commercial applications can be either Class 32 Commercial General or Class 33 Commercial Heavy. New Shapes upholds the Use Class of the modulyss® carpet tile collections.

Fire safety

New Shapes is certified to the strictest European standard for fire safety, achieving a Bfl-s1 classification, the highest possible class for textile floorcoverings.

Environmental credentials

Whether Back2Back modified backing or silentBack, both secondary backings are made with recycled content, reducing the impact on the environment.

The products

The revolutionary New Shapes format is available on 34 modulyss® collections, bringing you unrivalled choice and versatility.

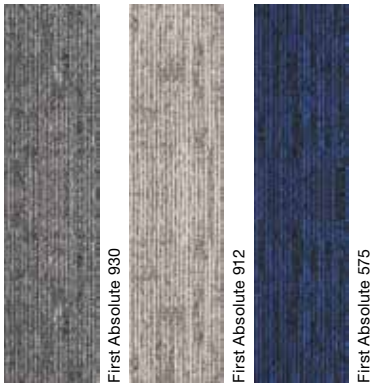

The following products in 25x100cm format can be delivered from stock:

- First Absolute 181, 575, 809, 912, 930, 993
- Xtra Cambridge 21F, 25F, 30F, 41F, 50F, 60F
- Alternative100 181, 312, 592, 900, 929, 965

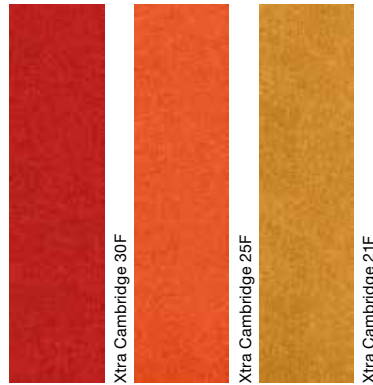

The designs and colours above are also available upon request in **50x100cm** and **100x100cm** formats. Remaining colours across these collections are also available in all formats upon request.

- Willow

The Basic Collection

A great place to start, the Basic collection takes some of the most trusted modulyss® collections, resizing the results into New Shapes:

- Affinity
- Alpha
- Cambridge
- Eco100 C
- First
- Millennium Nxtgen
- Perpetual
- Step

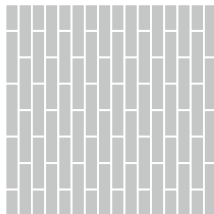

Note 1: Certain designs in the modulyss® collection cannot be transformed into the dimensions of New Shapes due to the restriction in design. These products include First Waves, Motion, Pure Air100, Shine-up, Reverse100, Opposite, Opposite Lines and Vision.

Note 2: With the exception of the 100x100cm version, the design of our New Shapes carpet tiles (25x100 & 50x100) can differ from that of our square carpet tiles (50x50).

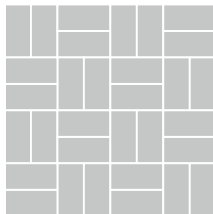

(*) As from 250sqm

A new dimension of creativity

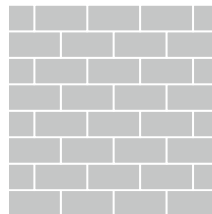

With New Shapes floor design evolves. Squares and rectangles combine to add flexibility and to ensure that modular carpet can work for any interior. From offices through to hotel rooms, bring new shape to your flooring with modulyss®.
