

MATERIALS

The Matrix basin lifter is constructed from stylish aluminum and high quality damage resistant materials to keep it looking good for longer.

BASIN

Integrated controls and a mechanism cover combine to create a basin that is good looking and well protected from accidental damage.

CONCEALED

A white protective cover prevents damage to the plumbing and electrics and fits perfectly to the contours of the basin.

MATRIX HEIGHT ADJUSTABLE BASIN

The Matrix is a height adjustable basin that can be set at a convenient height range for the user. It can be adjusted at the press of a button with no manual effort required. A safety stop prevents any danger of crushing and the thermostatically controlled taps remove the risk of scalding for users with limited sensory abilities.

The unique inset buttons on the front of the Matrix basin provide an elegant and user friendly adjustment solution. They are discreet yet accessible, blending in with even the most design led bathroom.

There are a range of options for the Matrix basin, with either a square or curved front, available in a range of sizes, and a choice of long lever or infra red taps. The cover both protects and hides the plumbing and electrics, finished in white to blend in with contemporary bathrooms.

WHEELCHAIR FRIENDLY

WALL MOUNTED

HEIGHT ADJUSTABLE

MATRIX BASIN

HEIGHT
