

STANDARD BASIN

The Standard basin is a compact yet roomy design with contemporary lines, perfect for the modern bathroom.

SUPPORT BASIN

The Support basin is generously proportioned with integral handgrips for assistance to standing and flat areas where personal accessories can be stored.

HOSPITAL BASIN

The Hospital Basin is generously proportioned with a curved front and easy to clean contours.

STANDARDLINE BASIN

Reliable and cost-effective height adjustable wash basin

The StandardLine is a functional quality washbasin suitable for private homes, institutions and hospitals. It features electrical height adjustment, with the option of the control switch placed on the right or left side of the basin. All the plumbing and electrics are concealed behind a cover to prevent damage and create an aesthetically appealing finish.

There are three types of washbasins to choose from depending on the users requirements,

- Standard:** A simple and stylish washbasin for users without any special needs
- Support:** A washbasin with good access and integrated handles that increases safety for users with limited physical capacity
- Hospital:** Porcelain washbasin with an inwardly curved front for hospitals

There is also the option of long lever or infra red controlled taps.
