

bounce chair

01

design

Called the bounce chair due to the independent movement of the seat and back, this flex provides a comfort not usually associated with steel and plywood chairs. Bounce also brings a level of sophistication to this type of product – a distinct lack of visible fixings and closely fitting components allow the careful form of the bounce chair to shine. The bounce chair is aimed across markets from casual meetings spaces, to cafes and educational situations and priced competitively to suit. Bounce chair is easy to lift and carry and stacks neatly.

technical

The bounce is constructed with a one piece steel tube frame, finished with a hard wearing polyester powder coated paint finish. Whitened oak, standard oak and walnut are standard veneers all finished with a super matt lacquer. *All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

Bounce chair designed by naughtone

general manufacture description

The Bounce chair frame is machine bent from mild steel tube which is then weld jointed together and hand polished to a smooth surface. The frame also has strengthening sleeves internally to assist the strength and bounce of the cantilever shape. The frame is finished with a polyester powder coat.

The Bounce chair seat and back are both made from moulded beech plywood and faced with either oak or walnut veneer. The surface finish is a hard wearing spray matt lacquer. The plywood pieces and frame are assembled together by hand using minimal fixings and can be easily disassembled if necessary.

facts

- 100% FSC certified timber
- naughtone is FISP and ISO14001 certified
- 6.5kg Total weight
- 70.2% Recyclable (frame, fixings & feet)
- 29.8% Compostable (seat/back)
- 42.7% Recycled content (frame & fixings)
- 29.8% Reuseable content
- 112.9% Recycled & Recyclable content

contents

- Frame (mild steel) - 69.8%
- Seat / Back (beech ply and oak veneer) - 29.8%
- Feet (polypropylene) - < 1%
