

dalby
table

design

Your newest old friend. The Dalby table will inject warmth and quality into an interior without raising any eyebrows. Dalby provides a practical, robust surface and maximised leg positions for clear, useable access all round the table. The simple design easily scales across a wide range of sizes from small 3 to 4 people circular tables through to huge meeting tables. The Dalby table is built from solid materials the good old way and will therefore last as long as it's timeless aesthetic endures.

technical

Dalby table legs are CNC cut and shaped from solid oak and hand finished before receiving a coat of hard wearing matt lacquer. The under table structure is oak veneered and matt lacquered to match. The table frame is component based and is delivered fully disassembled for efficient delivery and installation. Dalby table is available with a wide range of table top finishes, from matching oak veneer through to striking coloured laminates. *All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.
