

reg chair/stool

design

Robust and elegant, the wire reg chair is carefully proportioned for maximum comfort. Reg responds to a need for a visually light seating solution that is particularly useful as a slender barstool. With its classic proportions and beautiful form, the reg chair makes a great impact in offices and homes, but has been most widely used in bars, cafes and restaurants.

technical

Reg is constructed solely from mild steel rod, which is CNC formed then welded by hand. The finish is a zinc primed polyester powder coat suitable for both indoor and outdoor use. The chair and barstool both come with slender plastic glides for sound deadening and floor protection. *All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.
