

LightLine Fusion Profiles

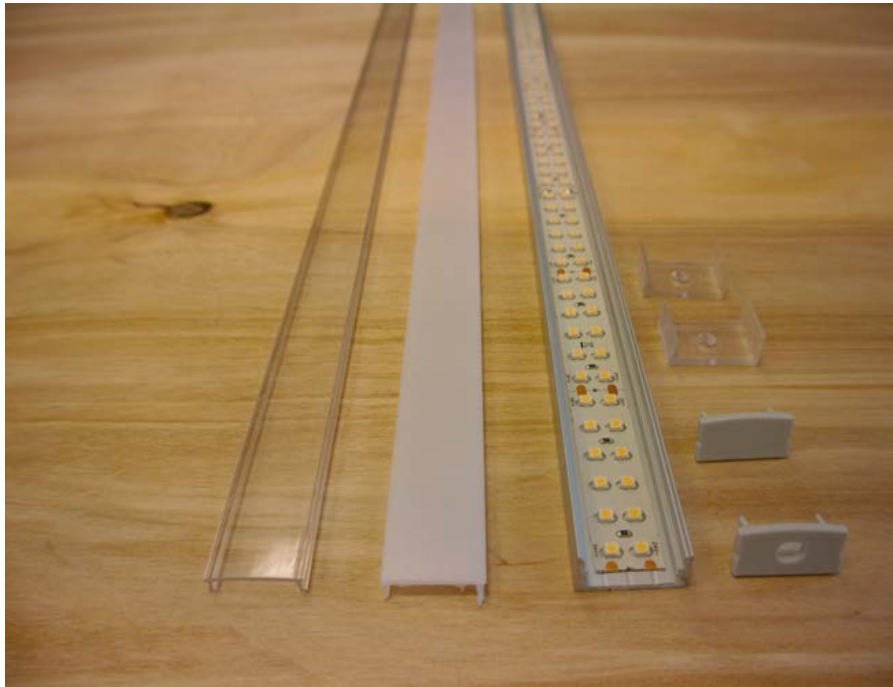

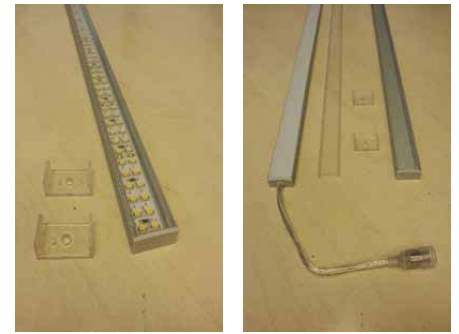

From our ever increasing profile range we have developed our new and improved LightLine Fusion Profiles.

Designed specifically for our popular Fusion Flex[®] LED this extrusion and its accessories will enable you to easily install this product into virtually any application.

From Light Boxes to cove lighting and joinery to signage lighting the fixing methods we have chosen together with the improved acrylic cover mounting systems make this our most popular linear lighting system.

Order in full lengths (standard 2.5mt) or cut to size with open or closed end caps and fixing clips. Alternatively save the onsite hassle and order as pre made fittings, with soldered plugs or tails then simply just clip and terminate on site.
