

## Maintenance Schedule – Non Filled Artificial Grass

Non filled artificial grass surfaces will perform satisfactorily with only a minimum degree of maintenance beyond good Housekeeping and provide good service for up to 20 years.

Nomow installers normally instruct the client at the time of handover of the surface on the, maintenance requirements.

### Regular maintenance

#### Cleaning

Under normal circumstances, rainfall will keep the grass clean. However heavier contaminants can be brushed wiped or hosed (low pressure) away. Normal domestic or wild animal mess will not harm the surface but should be removed and washed away using water and if necessary mild detergents. Nomow sell mild detergents that are specifically designed to be used on artificial grass and guaranteed not to damage the grass, can be found on Amazon ([www.amazon.co.uk/nomow-Scented-Artificial-Grass-Cleaner/dp/B07D4WBQMV](http://www.amazon.co.uk/nomow-Scented-Artificial-Grass-Cleaner/dp/B07D4WBQMV)) and Homebase.

#### Brushing

Brushing with a stiff bristle in two directions at right angles one against the lay of the pile will invigorates the pile to retain its natural looks.

#### Good Housekeeping

It is important to be "house-proud" and the removal of leaves, twigs and any other debris should be carried out on a regular basis.

#### Weeds

In areas with existing weed infestation weed treatment is a normal part of the installation process. However an artificial surface and its perimeter areas can provide a growth medium for windblown seeds, moss and algae. Nomow sell Weed and Moss Killer on Amazon ([www.amazon.co.uk/nomow-Artificial-Grass-Weed-Killer/dp/B07D45XN75/](http://www.amazon.co.uk/nomow-Artificial-Grass-Weed-Killer/dp/B07D45XN75/)).
